Faces In A Cloud Intersubjectivity In Personality Theory:

Faces in a Cloud George E. Atwood, Robert D. Stolorow, 1993 In this new edition of their now classic work George Atwood and Robert Stolorow explore the ways in which a theory of personality is influenced and colored by the subjective world of the theorist Using psychobiographical analyses of Sigmund Freud Carl Jung Wilhelm Reich and Otto Rank as illustrations the authors show how the central constructs of personality theories universalize their creators personal solutions to the nuclear crises and dilemmas of their own life histories Illuminating the subjective origins of a personality theory does not invalidate the theory according to Atwood and Stolorow but rather contributes to establishing the scope of the theory as well as its applicability to particular clinical situations The first edition of Faces in a Cloud published in 1979 was the seminal work out of which emerged the now influential theory of intersubjectivity a framework that calls for a radical revision of all aspects of psychoanalytic thought This revised edition incorporates significant new material into the psychobiographical analyses and has been completely updated and rewritten to reflect the development of the authors viewpoint The terminology used throughout the book to describe personal worlds of experience has been updated and refined in consonance with this contemporary theoretical perspective The final chapter summarizes key aspects of this new perspective and offers reflections on the subjective origins of intersubjectivity theory itself

The Intersubjective Perspective Robert D. Stolorow, George E. Atwood, Bernard Branchaft, 1994 A collection of previously published chapters and papers , Structures of Subjectivity George E. Longing for Nothingness Andrew Stein,2010-01-25 In *Longing for Nothingness Resistance Denial and the Place of Death* in the Nursing Home Andrew Stein offers a groundbreaking new psychoanalytic treatment of the depression and other mental conflicts suffered by residents living in nursing homes Freud famously argued that humans had a dual drive toward life and toward death and in this new study Stein shows that residents may suffer because they cannot control one part of that dualism their longing for nothingness Weaving together elements of Freud's life and writings Lacanian and Kleinian notions and clinical material in a new and surprising manner Stein shows that a frightening breakdown of symbolic and imaginary defenses opens nursing home residents to these deeply repressed longings Because they often do not know how to respond the result is an increase in their suffering and tendency to despair *Longing for Nothingness* makes an impassioned plea for all people not only residents of nursing homes to fully acknowledge the role of death in the structures of their desires By doing this they will be spared the unnecessary suffering caused by the struggle to keep their longings for death repressed Stein presents an alternate strategy bringing the longings for death a little more into consciousness where they can be addressed without fueling debilitating symptoms like depression and rage *Building on Bion-- Roots* Robert M.

Progress in Self Psychology, V. 19 Mark J. Gehrie, 2013-05-13 The contributors to Explorations in Self Psychology volume 19 of the Progress in Self Psychology series wrestle with two interrelated questions at the nexus of contemporary discussions of technique How authentic and relationally invested should the self psychologically informed analyst be and what role should self disclosure play in the treatment process The responses to these questions embrace the full range of clinical possibilities Dudley and Walker argue that empathically based interpretation precludes self disclosure whereas Miller argues in favor of authentic self expression and against the self

psychologist's frustrating attempt to decenter from frustration or anger. Consideration of the utility of a consistently empathic stance continues with Weisel Barth's clinical presentation and the discussions that it elicits about management of her patient's primary destructiveness. Lenoff's critical rereading of Kohut's *Examination of the Relationship Between Mode of Observation and Theory* and Rieveschl's self psychological work with adolescents and Neville Symington's theory of narcissism. Contributions to applied analysis explore topics as diverse as an exchange of dreams between John Adams and Benjamin Rush. Mann's *Death in Venice* the films of Ingmar Bergman psychotherapy of the elderly and disabilities in the sensory motor integration in children. And Volume 19 concludes with Constance Goldberg's candid and enlightening reminiscence of Heinz Kohut, a very complex man with whom to be in a relationship. *Elements of Reparation* Brent Potter, 2018-05-15. Damage and reparation are central themes of human existence. Melanie Klein among other pivotal discoveries noted our capacity for destructiveness towards others and ourselves. More importantly she accented the centrality of reparation for mental health. Acceptance of the truth inner and outer is essential to this process. The author goes on to explain the phenomenon of reparation around the themes of truth, aletheia, faith, pistis and repentance, transformation, metanoia, especially as they appear in the philosophical works of Martin Heidegger and the psychoanalyst Wilfred Bion. He then continues following the phenomenon of metanoia, tracing it sequentially in the works of Melanie Klein, Wilfred Bion, Martin Heidegger, C. G. Jung and R. D. Laing. These thinkers have a surprisingly high degree of reflection upon and import into common everyday lived experience. Brent Potter's work concludes with a critique of psychiatry, cognitive behavioral and manualised approaches to psychological distress. He then presents modalities and programs utilizing a metanoia perspective that are rising to replace them.

Clinical Implications of the Psychoanalyst's Life Experience Steven Kuchuck, 2013-10-23. 2015 Gradiva Award Winner. *Clinical Implications of the Psychoanalyst's Life Experience* explores how leaders in the fields of psychoanalysis and psychotherapy address the phenomena of the psychoanalyst's personal life and psychology. In this edited book, each author describes pivotal childhood and adult life events and crises that have contributed to personality formation, personal and professional functioning, choices of theoretical positions and clinical technique. By expanding psychoanalytic study beyond clinical theory and technique to include a more careful examination of the psychoanalyst's life events and other subjective phenomena, readers will have an opportunity to focus on specific ways in which these events and crises affect the tenor of the therapist's presence in the consulting room and how these occurrences affect clinical choices. Chapters cover a broad range of topics including illness, adoption, sexual identity and experience, trauma, surviving the death of one's own analyst, working during 9/11, cross-cultural issues, growing up in a communist household and other family dynamics. Throughout, Steven Kuchuck, ed., shows how contemporary psychoanalysis teaches that it is only by acknowledging the therapist's life experience and resulting psychological makeup that analysts can be most effective in helping their patients. However, to date, few articles and fewer books have been entirely devoted to this topic. *Clinical Implications of the Psychoanalyst's Life Experience* forges

new ground in exploring these under researched areas It will be essential reading for practicing psychoanalysts psychotherapists psychologists social workers those working in other mental health fields and graduate students alike

Talking with Patients Sanford Shapiro, 2008-09-26 In the twelve years since the first edition of Talking With Patients was published contributions from relational psychoanalysis and from neuroscience have been integrated into much of the work done by self psychologists The relational focus on the impact of the treatment relationship on the psychoanalytic process while implicit in self psychology is made explicit in this new edition Additionally the concept of implicit memory a contribution from neuroscience has opened the door to new ways of understanding and dealing with patients who were severely abused as children In the second edition of Talking with Patients the author discuss how we are guided by non verbal cues as much as by verbal ones and continues to expand on the idea that therapists learn how to do therapy as much from their patients as from supervisors or theories
