Consumer Financial Protection Bureau,2012 **Consumer Credit and the American Economy** Thomas A. Durkin,Gregory Elliehausen,Michael E. Staten,Todd J. Zywicki,2014-07-16 *Consumer Credit and the American Economy* examines the economics behavioral science sociology history institutions law and regulation of consumer credit in the United States After discussing the origins and various kinds of consumer credit available in today s marketplace this book reviews at some length the long run growth of consumer credit to explore the widely held belief that somehow consumer credit has risen too fast for too long It then turns to demand and supply with chapters discussing neoclassical theories of demand new behavioral economics and evidence on production costs and why consumer credit might seem expensive compared to some

other kinds of credit like government finance This discussion includes review of the economics of risk management and funding sources as well discussion of the economic theory of why some people might be limited in their credit search the phenomenon of credit rationing This examination includes review of issues of risk management through mathematical methods of borrower screening known as credit scoring and financial market sources of funding for offerings of consumer credit The book then discusses technological change in credit granting It examines how modern automated information systems called credit reporting agencies or more popularly credit bureaus reduce the costs of information acquisition and permit greater credit availability at less cost This discussion is followed by examination of the logical offspring of technology the ubiquitous credit card that permits consumers access to both payments and credit services worldwide virtually instantly After a chapter on institutions that have arisen to supply credit to individuals for whom mainstream credit is often unavailable including payday loans and other small dollar sources of loans discussion turns to legal structure and the regulation of consumer credit There are separate chapters on the theories behind the two main thrusts of federal regulation to this point fairness for all and financial disclosure Following these chapters there is another on state regulation that has long focused on marketplace access and pricing Before a final concluding chapter another chapter focuses on two noncredit marketplace products that are closely related to credit The first of them debt protection including credit insurance and other forms of credit protection is economically a complement The second product consumer leasing is a substitute for credit use in many situations especially involving acquisition of automobiles This chapter is followed by a full review of consumer bankruptcy what happens in the worst of cases when consumers find themselves unable to repay their loans Because of the importance of consumer credit in consumers financial affairs the intended audience includes anyone interested in these issues not only specialists who spend much of their time focused on them For this reason the authors have carefully avoided academic jargon and the mathematics that is the modern language of economics It also examines the psychological sociological historical and especially legal traditions that go into fully understanding what has led to the demand for consumer credit and to what the markets and institutions that provide these products have become today

Mills, 2024-06-21 Small businesses are the backbone of the U S economy They are the biggest job creators and offer a path to the American Dream But for many it is difficult to get the capital they need to operate and succeed In Fintech Small Business one day the borrower is a dry cleaner and the next a parts supplier making it difficult for lenders to understand each business s unique circumstances Today however big data and artificial intelligence have the power to illuminate the opaque nature of a small business s finances and make it easier for them access capital to weather bumpy cash flows or to invest in growth opportunities Beginning in the dark days following the 2008 9 recession and continuing through the crisis of the Covid 19 Pandemic Mills charts how fintech has changed and will continue to change small business lending In the new fintech landscape financial products are embedded in applications that small business owners use on daily basis and data powered algorithms provide automated insights to determine which businesses are creditworthy Digital challenger banks big tech and traditional banks and credit card companies are deciding how they want to engage in the new lending ecosystem Who will be the winners and losers How should regulators respond In this pivotal moment Mills elucidates how financial innovation and wise regulation can restore a path to the American Dream by improving access to small business credit An ambitious book grappling with the broad significance of small business to the economy the historical role of credit markets the dynamics of innovation cycles and the policy implications for regulation this second edition of Fintech Small Business in fact to anyone who is interested in the future of small business in America Privatizing Justice Sarah L. Staszak, 2024 One of the primary goals of the 1970s era conservative legal movement was to undo New Deal policies that favored labor at the expense of capital One of the movement s most effective strategies turned out to be advancing bipartisan legislation on arbitration and convincing the courts that settling disputes that way was preferable to litigation Today most consumers and

employees today are bound by arbitration agreements in which they are required to submit all future grievances to a private binding system of arbitration and forfeit access to the legal system Arbitration as originally conceived well over a century ago however stands in stark contrast to the arbitration in practice today What changed is that Congress the Supreme Court and the private sector began to promote its use in the late twentieth century as a means of protecting corporate and other powerful institutional defendants from the costs of litigation and government regulation itself How did arbitration shift from providing a low cost less adversarial and more efficient way of handling disputes between entities of equal bargaining power to a private non reviewable compulsory forum for resolving disputes between individuals and corporations often on unilateral terms By examining the broader institutional political and legal dynamics that shaped and enabled these processes of change over the past 150 years Privatizing Justice examines how this transformation came about The product of a broad range of actors and institutions interacting with each other Congress presidents the courts the administrative state interest groups and the business community the system that emerged has not only transformed the American state in profound ways but exacerbated economic inequality and eroded democracy
