contributions by numerous experts **Principles of Educational and Psychological Testing** Frederick Gramm Brown, 1970 **Individual Differences in Children and Adolescents** Donald H. Saklofske, Sybil B. G. Eysenck, This uniquely authoritative collection of original papers with contributions from over twenty countries provides a rare insight into research and applied programs in the study of individual differences in children and adolescents worldwide While delinquency proves to be one of the most common areas of interest a wide range of cognitive personality and social

characteristics are examined and the use of the Eysenck Personality Questionnaire in many studies allows uniform comparisons to be made between countries. The editors have not only overcome the language barriers which hitherto have made such information virtually inaccessible to the English speaking world. They have also succeeded in bringing together studies from developed and developing countries East and West to present a global picture of adolescent and child psychology. In particular the book highlights the general and specific cultural influences on child development and adolescent psychology in different countries and reflects the social and research concerns of the countries and cultures represented. The authors comprise a cross section of professionals in the social and behavioral sciences working in university and clinical settings. While North America is well represented by six chapters including Puerto Rico as is Europe particular efforts were made to obtain contributions from Eastern Europe Asia and Africa. At the time this book was developed information exchange with eastern European countries was most difficult. It is very exciting to present chapters from Hungary Lithuania Romania Russia and Yugoslavia. The inclusion of articles from Japan Korea Singapore Sri Lanka and Uganda also add another dimension to studies of individual differences in children. Contributions from Australia Israel and New Zealand also allow the book to take on much more of an international perspective on topics ranging from delinquency fears and motivation to intelligence personality and assessment issues. This volume provides a plethora of international perspectives on the study of children. It will be essential to sociologists psychologists educators and child study specialists.
