Theorizing Teaching and Learning in Asia and Europe John Chi-Kin Lee, Kerry J. Kennedy, 2017-03-27 There has been much debate in recent times between the Anglo American tradition of curriculum studies and the Continental and North European tradition of didactics Didaktik As important as such debate has been this book seeks to add new voices to the debate representing ideas and traditions from a different part of the world The focus is on Chinese curriculum thinking that has passed through a number of stages and currently represents a blend of some aspects of the American tradition and Chinese cultural traditions How does Chinese thinking about curriculum teaching and learning resonate with European didactic traditions and what are the implications for theorizing an expanded field of curriculum studies This book deliberately transcends borders and cultures to explore new territory to provide a platform for open dialogue and to open up new areas of investigation Chapters include Curriculum Reform and Research in China A Social Historical Perspective What Mathematics Did Teachers Learn Comparison of the School and the Pre Service Teacher Mathematics Curricula in Germany and Taiwan Living in Parallel Worlds A Transatlantic Dialogue between General Didactics and Instructional Design

Teacher Education: Curriculum and change David Hartley, Maurice Whitehead, 2006

Inside/Outside Marilyn Cochran-Smith, Susan L. Lytle, 1993 The central concern of Inside Outside is the assumption that pedagogical knowledge is generated outside in that is from the university to be applied at schools The first half provides a thoughtful conceptual framework for reading and understanding teacher research exploring its history potential and relationship to university based research In the second half the voices of teacher researchers contrast engage and combine as contributors explore the meaning and significance of their approaches and findings These authors enter into the national conversation about school reform teacher professionalism multicultural curriculum and pedagogy and language and literacy education

New Perspectives in Teaching and Learning With ICTs in Global Higher Education Systems Armie, Madalina, Asensio, Germán, de los Ríos, Maria Enriqueta Cortés, Jordán Soriano, Angeles, 2023-09-12 New Perspectives in Teaching and Learning With ICTs in Global Higher Education Systems addresses the challenges faced by higher education systems worldwide in adapting to new technologies and incorporating them into teaching and learning methodologies The book offers solutions for educators and students by emphasizing the significance of creating inclusive learning environments that support diverse learners adapting teaching methodologies accordingly and integrating technology into higher education

Research-Based Learning: Case Studies from Maastricht University Ellen Bastiaens, Jonathan van Tilburg, Jeroen van Merriënboer, 2017-03-20 This book describes lessons learned from the implementation of research-based learning at Maastricht University. Well-known for its problem-based learning (PBL) educational model, Maastricht University implemented research-based learning (RBL) as a new educational concept in addition to PBL around 2009. The model has taken the shape of an excellence programme offering third-year bachelor students an opportunity to conduct academic research together with academic staff. The introduction of the research-based learning concept into the programmes of all Maastricht University's faculties has resulted in a range of RBL models that vary to fit the various disciplines and programmes offered by the faculties. The book first presents theoretical models and a description of the concepts of research-based learning and undergraduate research (UGR). Next, by means of case studies, it describes the formulas developed to suit the various programmes, the challenges encountered, the initial reservations on the part of the staff, the limitations caused by regulations and demands of the curricula, as well as the successes and results of the excellence programme. The disciplines described in the case studies include psychology and neuroscience, knowledge engineering, social and cultural sciences, law and business, and economics.
