Curriculum-Based Library Instruction Amy Blevins, Megan Inman, 2014-09-26 The rampant nature of technology has caused a shift in information seeking behaviors In addition current trends such as evidence based medicine and information literacy mean that one time instructional sessions cannot provide our patrons with all of the skills they need For this reason many librarians are working to develop curriculum based instruction that is semester long or consisting of many sessions throughout an academic program In addition to teaching librarians are also becoming embedded in the curriculums they support by serving as web based course designers problem based learning facilitators or members of curriculum committees Although it is fairly obvious that library instruction is important and that librarians should be equipped to provide this instruction the majority of ALA accredited programs offer only one course on library instruction the courses are only available as electives and they are often only offered once a year Librarians need to gain their instructional experiences through real life experiences mentors and of course books like this one Many books commonly discuss one shot sessions and provide tips for getting the most out of that type of instruction There are not as many that discuss curriculum based instruction in a section let alone an entire book Curriculum Based Library Instruction From Cultivating Faculty Relationships to Assessment highlights the movement beyond one shot instruction sessions specifically focusing on situations where academic librarians have developed curriculum based sessions and or become involved in curriculum committees This volume describes and provides examples of librarians varied roles in the curriculum of education programs These roles include semester long or multi session instructor web based course designer problem based learning facilitator and member of a curriculum committee In addition to describing the roles that librarians have in supporting curriculum the book describes how to carry out those roles with sections devoted to adult learning theory teaching methods developing learning

objectives and working with faculty to develop curriculum Examples of library sessions devoted to information literacy evidence based practice information literacy and biomedical informatics are included This book is not limited to one mode of delivering information and covers examples of face to face distance and blended learning initiatives

distinguished protagonists and antagonists about what gets called evidence based practice Reading it all involved in education policymakers and practitioners alike can proceed more confidently Professor Tim Brighouse London Schools Commissioner The movement to evidence based practice in education is as important as it is controversial and this book explores the arguments of leading advocates and critics The book begins with an explication of evidence based practice Some of the ideas of its proponents are discussed including the Campbell Collaboration and the application to education of Cochrane style reviews and meta analyses The thinking behind evidence based practice has been the subject of much criticism particularly in education and this criticism is aired in the second part of the book Questions have been raised about what we mean by evidence about how particular kinds of evidence may be privileged over other kinds of evidence about the transferability of research findings to practice and about the consequences of a move to evidence based practice for governance in education Given that the origins of the interest in evidence based practice come largely from its use in medicine questions arise about the validity of the transposition and contributors to the third part of the book address this transposition The issues raised in the book while primarily those raised by educators are of relevance also to professionals in medicine social work and psychology Evidence-based Practice - Modernising the Knowledge Base of Social Work?
