Pines, Christopher R. Carpenter, Ali S. Raja, Jeremiah D. Schuur, 2013-01-22 This book for emergency physicians and fellows training in emergency medicine provides evidence based information on what diagnostic tests to ask for and when and how to use particular decision rules The new edition builds on the success of the current book by modifying the presentation of the evidence increasing the coverage and updating the current information throughout Evidence-Based Emergency Care Jesse M. Pines, Worth W. Everett, 2011-08-26 This useful handbook provides a concise compilation of the evidence supporting diagnostic testing and clinical decision rules in emergency care Clinical decision rules are now widely recognised as best practice for the ordering of diagnostic tests in the emergency department Aimed at all physicians working with emergency and acute patients the book begins with an overview of how to evaluate a diagnostic test using an evidence based approach followed by an explanation of the clinical decision rules and the methods of assessing the strength and applicability of the clinical prediction rule These introductory chapters are followed by sections covering the following clinical areas Traumatic Injuries Cardiology Infectious Disease Surgical and Abdominal Complaints Urology Neurology Ophthalmology Hematology Rheumatology Pulmonology For each test and clinical decision rule the most current and best available studies in the literature are discussed and applied to emergency department and acute care patients in addressing the question at hand followed by an overall recommendation on how to use the test or rule in the clinical context Evidence Based Emergency Care is an accessible and extremely useful reference for physicians at all levels to use in applying an evidence based approach to

ordering and interpreting tests in an acute care environment **Doing Research in Emergency and Acute Care** Michael P. Wilson, Kama Z. Guluma, Stephen R. Hayden, 2016-03-02 A practical guide to understanding and navigating the unique challenges faced by physicians and other professionals who wish to undertake research in the ED or other acute care setting Focusing on the hyper acute and acute care environment and fulfilling two closely related needs 1 the need for even seasoned researchers to understand the specific logistics and issues of doing research in the ED and 2 the need to educate clinically active physicians in research methodology This new text is not designed to be a complex encyclopedic resource but instead a concise easy to read resource designed to convey key need to know information within a comprehensive framework Aimed at the busy brain either as a sit down read or as a selectively read reference guide to fill in knowledge gaps chapters are short compartmentalized and are used strategically throughout the text in order to introduce and frame concepts This format makes it easy and even entertaining for the research novice to integrate and absorb completely new and typically dry material The textbook addresses aspects of feasibility efficiency ethics statistics safety logistics and collaboration in acute research Overall it grants access for the seasoned researcher seeking to learn about acute research to empathically integrate learning points into his or her knowledge base As the ED is the primary setting for hyper acute and acute care and therefore a prime site for related clinical trial recruitment and interventions the book presents specific logistical research challenges that researchers from any discipline including physicians research nurse coordinators study monitors or industry partners need to understand in order to succeed Bailey's Research & Evidence-Based Practice for the Health Professional Jennifer E. Lape, Angela N.
