J. Peter Zetterberg

Evolution Versus Creationism The Public Education Controversy:

Evolution Versus Creationism J. Peter Zetterberg, 1983 The University of Minnesota organized a conference Evolution and Public Education December 5 1981 to help clarify issues in the creation evolution controversy and to examine arguments of the proponents of scientific creationism This six part book a revised version of a resource manual compiled for the conference 1 discusses the theory of evolution and its place in science education 2 examines the creationist movement 3 states the position of scientific creationists 4 responds to creationists arguments against evolution 5 explores legal issues in the controversy and 6 provides some perspectives on attempts to treat the Genesis creation account as science The fifth section on legal issues includes Judge Overton's decision striking down the Arkansas Creationism Act as well as pieces of legislation which reveal the changing tactics of creationists who first sought to ban the teaching of evolution in the 1920s then sought equal time for biblical creationism in the late 1960s and early 1970s and now seek a two model approach to earth science biology teaching evolution as one model scientific creationism as the other A comprehensive bibliography lists most of the important works that directly address the controversy as well as many publications on the philosophy of science and faith issues JN

Creation Or Evolution Edward Ottway Dodson, George Franklin Howe, 1990 With the publication of these letters readers gain rare access to the hearts and minds of two men searching earnestly for truth Over a five year period Edward O Dodson and George F Howe two biologists who had never met exchanged almost fifty personal letters Both writers are dedicated men of science but they differ sharply in the faith that underlies their work Says Edward Dodson a practicing Roman Catholic I believe that the entire phenomenal universe is God's handiwork I believe however that He ordinarily works through natural processes including evolution Says George Howe a born again Baptist I believe the Creator did use miracles creating the universe the world plants animals and man in six real days At the end they share an undiminished perhaps strengthened acceptance of the right of each to hold to his own position with integrity Dodson writes to Howe I am sure that you are right that there will be no I told you so attitude in Heaven We will all rejoice in the understanding of the whole truth

Jewish Tradition and the Challenge of Darwinism Geoffrey Cantor, Marc Swetlitz, 2008-09-15 Darwin's theory of evolution transformed the life sciences and made profound claims about human origins and the human condition topics often viewed as the prerogative of religion As a result evolution has provoked a wide variety of religious responses ranging from angry rejection to enthusiastic acceptance While Christian responses to evolution have been studied extensively little scholarly attention has been paid to Jewish reactions Jewish Tradition and the Challenge of Darwinism is the first extended meditation on the Jewish engagement with this crucial and controversial theory The contributors to Jewish Tradition and the Challenge of Darwinism from several academic disciplines and two branches of the rabbinate present case studies showing how Jewish discussions of evolution have been shaped by the intersections of faith science philosophy and ideology in specific historical contexts Furthermore they examine how evolutionary theory has been

deployed when characterizing Jews as a race both by Zionists and by anti Semites Jewish Tradition and the Challenge of Darwinism addresses historical and contemporary as well as progressive and Orthodox responses to evolution in America Europe and Israel ultimately extending the history of Darwinism into new religious domains Evolution , **Evolution Vs. Creationism** Eugenie Carol Scott,2005 Almost eighty years after the Scopes trial the debate over the teaching of evolution continues to rage There is no easy resolution it is a complex topic with profound scientific religious educational and legal implications How can a student or parent understand this issue which is such a vital part of education Evolution vs Creationism provides a badly needed comprehensive and balanced survey Written by one of the leading advocates for the teaching of evolution in the United states this accessible resource provides an introduction to the many facets of the current debate the scientific evidence for evolution the legal and educational basis for its teaching and the various religious points of view as well as a concise history of the evolution creationism controversy Each of the four sections of Evolution vs Creationism provides a resource that will assist the reader in better understanding these issues The first section addresses the nature of how evolution works as part of the scientific enterprise as well as a summary of the relationship between religious beliefs and science A section on the history of the controversy provides a handy synopsis of the lengthy struggles from before Darwin to the present day between advocates of creationism and the proponents of evolution A collection of primary source documents addressing cosmology law education and religious issues from all sides of the debate constitute the third section The book concludes with a selection of resources for further information for those who wish to study the topic in more depth **Evolution** Monroe W. Strickberger,2005 Myths and Fictions Biderman,Scharfstein,2021-11-22 Myths and Fictions the third in a series of books on comparative philosophy and religion is a collection of original essays none previously published on the theory and the actuality of myths and fictions in the different cultures of the world Through all the essays there runs the question of the relation of literal truth to truth conceived in other ways or dimensions Taken as a whole the book makes a serious attempt to get beyond the confines of any single culture and enter into the mythical imagination of the ancient Hindus Chinese Hebrews and Christians and by this act of imagination to escape in Italo Calvino s words the limited perspective of the individual ego not only to enter into selves like our own but to give speech to that which has no language **Striving for Excellence** ,1995 Each vol a compilation of ERIC digests **The Darwinian Delusion** Michael Ebifegha,2011-10-14 The postulate of molecules to human evolution by natural selection evolutionism like creationism cannot be demonstrated empirically Therefore the creationism evolutionism controversy offers a choice between intelligent design by God and unintelligent design by evolutionary selection Scientists are split on philosophical grounds since events in the immaterial realm are outside the purview of science In reality designers claim products no product of a process can account for how it was designed or for its ontology Accordingly Scientific American Editor John Rennie suggested that one way to override a purely evolutionary worldview is if the creator s appeared and claimed credit Author

Michael Ebifegha's previous book *The Death of Evolution* provides the historical details of God's ancient claim for creating the universe before an audience. Dawkins in his *The God Delusion* failed to address this historical event hence his statement that 'There almost certainly is no God' is flawed. *The Darwinian Delusion* discusses the fossil record, the role of natural selection, the mystery of the origin of life and God's affirmation of agency in world history. Ebifegha argues that both the scientific and philosophical analysis point to God as the Creator and hence the delusion as such is not about God but about the Darwinian paradigm of materialism.

The Creation-Evolution Debate Edward J. Larson, 2010-01-25 Few issues besides evolution have so strained Americans professed tradition of tolerance Few historians besides Pulitzer Prize winner Edward J Larson have so perceptively chronicled evolution s divisive presence on the American scene This slim volume reviews the key aspects current and historical of the creation evolution debate in the United States Larson discusses such topics as the transatlantic response to Darwinism the American controversy over teaching evolution in public schools and the religious views of American scientists He recalls the theological qualms about evolution held by some leading scientists of Darwin s time He looks at the 2006 Dover Pennsylvania court decision on teaching Intelligent Design and other cases leading back to the landmark 1925 Scopes trial Drawing on surveys that Larson conducted he discusses attitudes of American scientists toward the existence of God and the afterlife By looking at the changing motivations and backgrounds of the stakeholders in the creation evolution debate clergy scientists lawmakers educators and others Larson promotes a more nuanced view of the question than most of us have This is no incidental benefit for Larson s readers it is one of the book s driving purposes If we cede the debate to those who would frame it simplistically rather than embrace its complexity warns Larson we will not advance beyond the naive regard of organized religion as the enemy of intellectual freedom or the equally myopic myth of the scientist as courageous loner willing to die for the truth
