

Evolution by Natural Selection

Describe what is happening in figures 1-3. Is the population of mice different in figure 3 than in figure 1? Explain why. **YES: THERE ARE MORE BROWN MICE IN FIGURE 3 THAN IN FIGURE 1.**

Living things that are well adapted to their environment survive and reproduce. Those that are not well adapted don't survive and reproduce. An **adaptation** is any characteristic that **increases fitness**, which is **defined as the ability to survive and reproduce**. What characteristic of the mice is an adaptation that increased their fitness?

The table below gives descriptions of four female mice that live in a beach area, which is mostly tan sand with scattered plants. According to the definition given for fitness, which mouse would biologists consider the fittest? Explain why this mouse would be the fittest.

Color of Mouse Fur	Black	Tan	Tan and Black	Cream
Age at Death	2 months	8 months	4 months	2 months
# pups produced by each female	0	11	3	0
Running Speed	8 cm/sec	6 cm/sec	7 cm/sec	5 cm/sec

FITNESS BY DEFINITION IS THE ABILITY TO SURVIVE, AND GENERATE OFFSPRING THAT WILL REACH SEXUAL MATURITY AND REPRODUCE AGAIN SO, THE FITTEST MOUSE IS THE TAN MOUSE BECAUSE IT LIVED THE LONGEST, AND PRODUCED THE LARGEST SIZE OFFSPRING.

If a mouse's fur color is generally similar to its mother's color, what color fur would be most common among the pups?

TAN COLOR.

A more complete definition of fitness is the ability to survive and produce offspring who can also survive and reproduce. Below are descriptions of four male lions. According to this definition of fitness, which lion would biologists consider the "fittest"? Explain why. **TYRONE IS THE FITTEST LION BECAUSE IN THE END, IT GENERATED THE LARGEST NUMBER OF CUBS THAT SURVIVED TO ADULTHOOD (AND THEREFORE WERE ABLE TO REPRODUCE)**

Lion Name	George	Dwayne	Spot	Tyrone
Age at death	13 years	16 years	12 years	10 years
# cubs fathered	19	25	20	20
# cubs surviving to adulthood	15	14	14	19
Size	10 feet	8.5 feet	9 feet	9 feet

Suppose that Tyrone had genes that he passed on to his cubs that helped his cubs to resist infections, so they were more likely to survive to adulthood. These genes would be more common in the next generation, since more of the cubs with these genes would survive to reproduce.

The Battle of Beginnings Del Ratzsch,2010-02-28 Voted one of Christianity Today s 1997 Books of the Year Creation versus evolution The debate is growing louder and hotter whether in lecture halls or in between the pages of bestselling books But neither side seems to be winning Why In The Battle of Beginnings Del Ratzsch examines the history of the debate and critiques the entrenched positions that he argues merely impede progress toward the truth Dissatisfied with both creationist fallacies and materialist misconstruals he seeks to lay the groundwork for more fruitful dialogue In considerable detail Ratzsch looks at the history and development of Darwin s theory and common creationist misunderstandings of evolution He then moves on to examine the history and development of creationist theory and pervasive evolutionist misunderstandings of it He also discusses the nature of science and common creationist and evolutionist abuses as a prelude to showing why both sides have remained critical of theistic evolution Above all Ratzsch argues that until philosophical confusion logical missteps and various other snarls have been untangled little real progress can be made in sorting out competing theories of life and its origin With this book he challenges and equips all of us to think more clearly

Fundamentals of Intracellular Calcium Anthony K. Campbell,2017-08-29 The definitive text on the key component for cell functions intracellular calcium This comprehensive book reveals the evidence for intracellular calcium as a universal switch in all animal plant fungal and microbial cells It shows how the components required for calcium signaling are named and classified covers the technology that has been developed to study intracellular calcium describes how calcium is regulated inside cells and how it works to trigger an event explains the role of intracellular calcium in disease cell injury and cell death reveals how many drugs work through the calcium signaling system and demonstrates how intracellular calcium is involved in the action of many natural toxins The book also illustrates how the

intracellular calcium signaling system has evolved over millions of years showing why it was crucial to the origin of life. Additionally, the book promotes the importance of the molecular variation upon which the intracellular calcium signalling system depends. Featuring more than 100 figures including detailed chemical structures as well as pictures of key pioneers in the field, a bibliography of some 1000 references and a detailed subject index, this definitive work provides a unique source of scholarship for teachers and researchers in the biomedical sciences and beyond. Emphasizes two key scientific principles: the first to show how intracellular Ca^{2+} acts as a switch to activate a wide range of cellular events and the second demonstrating how an analogue mechanism can be superimposed on such a process. Written by an internationally recognized expert in the field. Filled with images and references to facilitate learning. **Fundamentals of Intracellular Calcium** is an all important text for post graduate students and researchers working in biomedicine and biochemistry.
