Evolutionary Ecology Of Marsupials Monographs On Marsupial Biology:

Evolutionary Ecology of Marsupials Anthony Kingston Lee, Andrew Cockburn, 1985-03-21 This book documents the excellent potential the study of marsupials provides for resolution of theoretical questions of general importance in biology

Evolutionary Ecology of Marsupials Anthony K. Lee, Andrew Cockburn, 1985-03-21 The ecological literature on marsupials is dominated by descriptive natural history and there has hitherto been little attempt at either synthesis or evolutionary interpretation This book attempts to provide such a synthesis by drawing on both the descriptive data base and predictions from the burgeoning literature on behavioural and evolutionary ecology It documents the excellent potential the study of marsupials provides for resolution of theoretical questions of general importance in biology It does this in three ways First by describing the impressive diversity of marsupial life history strategies and trophic roles Second by careful comparison with the eutherians the scope of the marsupial radiation is used to analyse the role of developmental constraints and adaptive radiation in determining the diversification of higher taxa Lastly it is suggested that the accessibility of marsupial young during their obligatory pouch life facilitates measurement manipulation and assessment of kinship not possible in other mammalian groups Further special topics include marsupial plant mutualism marsupial competition and the empirical uses of mammals with simple life histories

A Brief History of South American Metatherians Francisco Goin, Michael Woodburne, Ana Natalia Zimicz, Gabriel M. Martin, Laura Chornogubsky, 2015-10-16 This book summarizes major aspects of the evolution of South American metatherians including their epistemologic phylogenetic biogeographic faunal tectonic paleoclimatic and metabolic contexts A brief overview of the evolution of each major South American lineage Ameridelphia Sparassodonta Didelphimorphia Paucituberculata Microbiotheria and Polydolopimorphia is provided It is argued that due to physiological constraints metatherian evolution closely followed the conditions imposed by global temperatures In general terms during the Paleocene and the early Eocene multiple radiations of metatherian lineages occurred with many adaptive types exploiting insectivorous frugivorous and omnivorous adaptive zones In turn a mixture of generalized and specialized types the latter mainly exploiting carnivorous and granivorous folivorous adaptive zones characterized the second half of the Cenozoic In both periods climate was the critical driver of their radiation and turnovers

Possums Anne Kerle, 2001 Possums are the most common arboreal mammals in Australia This book is concerned with the larger possums of Australia those 13 species that belong to the Brushtail and Ringtail families including the Greater Glider and the Spotted Cuscus

Marsupial Biology Norman Saunders, Lyn Hinds, 1997 Marsupial Biology developed from contributions commissioned from those attending an international symposium held in honour of Hugh Tyndale Biscoe Australia's most celebrated marsupial biology authority and co author of the previous leading marsupial biology text published more than 15 years ago The book does not comprise papers of narrow focus read at the symposium but chapters reviewing the knowledge in each key area written to a book format It has been tightly edited to ensure a great degree of harmony and is suitable as a

Risk And

Uncertainty In Tribal And Peasant Economies Elizabeth Cashdan,2019-09-05 This book is concerned with how people respond to unpredictable variation in environmental and economic conditions risk and lack of information uncertainty about those risks The papers focus on tribal and peasant societies These societies lack many of the formal institutions that we in the industrialized West rely on to buffer us against unpredictable resource fluctuations As the papers in this volume show people in these societies are directly and profoundly affected by such risks The contributors to this volume are primarily ecological and economic anthropologists who have in common a familiarity with both the formal theory of behavioral ecology and or economics and the anthropological literature on tribal and peasant societies
