Evolution of 3G Networks Gottfried Punz, 2009-12-16 In this chapter we describe the motivation for writing this book and explain its scope Some remarks on nomenclature are given in order to help the reader with a fast and easy start The concept and structure of the material compiled is presented followed by some hints on how to make best use of it Finally the status of standardization on which this book is based is described

1 Motivation Probably the main motivation for starting to draft the script for this book and eventually to finish it was the desire to have a more or less complete up to date overview of mobile network technology for myself not only when starting my work in 3GPP standardization but also continuously afterwards I realized that some of my colleagues were in search of the same and I extrapolated to the point where after 3G technology is in the field for some time the huge new step of development would be implemented and finally exist in reality a manifold of system designers SW engineers solution consultants test personnel field technicians and service staff would have to deal with the underlying architecture concepts and detailed procedures Yet I noticed in my roughly two decades of work as an engineer in a few diverse fields that compact consistent and balanced overview material suitable for the wider audience is scarce
