Examined Life Advanced Philosophy For Kids:

The Examined Life David A. White, 2021-09-03 In this book the follow up to the best selling *Philosophy for Kids* Dr David White delves deeper into the philosophical questions kids and adults care about deeply Through vibrant discussions and debate the book offers ways teachers can help students grapple with age old questions about the nature of friendship Aristotle time Augustine knowledge Plato existence of God Aquinas perception Berkeley freedom and society Rousseau and many more The book is divided into three sections Part 1 presents primary source readings that will encourage discussion and debate Part 2 offers easy to use activities that focus on the direct application of philosophy to areas such as critical thinking language and the arts and Part 3 offers a unique perspective just for teachers a philosophical look at how teachers can become more reflective philosophers themselves This is an excellent teachers handbook for using advanced philosophy in the classroom Grades 7-12

Morality, Ethics, and Gifted Minds Don Ambrose, Tracy Cross, 2009-04-21 *Morality Ethics and Gifted Minds* explores much of the current wisdom on ethics and morality while developing new perspectives on the ethical dimensions of high ability Prominent authors from diverse disciplines are brought together recognizing that no single discipline can capture the essence and entirety of nettlesome complex multidimensional moral issues More specifically the book explores new dimensions of ethics and morality magnifies the importance of applying highly intelligent minds to ethical issues while developing ways to strengthen the ethical awareness of the creative and gifted and brings diverse interdisciplinary perspectives to bear on these issues

The Interdependence of Teaching and Learning Bryant Griffith, Douglas J. Loveless, 2013-03-01 The varied chapters of this book seek to capture the complexities of teaching and learning in today's schools and they share an interest in exploring the influences of knowledge construction in the moment and over time Teaching and learning are human processes interrelated and dynamic We assembled this collection to unpack what it means to teach and to learn teasing out some of the implications and challenges of such complicated educational processes that are often misconstrued as causal or linear As educators currently residing in the United States we find this a particularly pressing agenda given the current focus on common core standards and reducing teaching and learning to conceptual and pedagogical step by step procedures Our primary concern in putting together this book was to provide a conceptual and political foundation from which to construct and defend understandings and practices of teaching and learning that embody the complexity of educational endeavors and relationships The isolation of teaching from learning and the othering of both teachers and students one from the other suggests that knowledge is synonymous with information This book challenges such assumptions The project underlying this text can be seen as a means of rethinking how teachers and students perspectives of practice and curriculum influence what learning opportunities are provided to students Chapters written by established and new thinkers in the field of education demonstrate the ways in which teachers reformulate relationships between teaching and learning in school settings Our second objective is to examine local constructions of

knowledge over time and how those constructions are consequential for teacher and student learning By examining patterns of practice and processes of knowledge construction in elementary secondary and undergraduate classrooms the authors of these chapters lay a foundation for examining commonalities and differences in the construction of knowledge and practices across educational levels disciplines and in school and out of school settings
