USAF F-105 Thunderchief vs VPAF MiG-17 Peter E. Davies, 2019-07-25 The F 105D Thunderchief was originally designed as a low altitude nuclear strike aircraft but the outbreak of the Vietnam War led to it being used instead as the USAF s primary conventional striker against the exceptionally well defended targets in North Vietnam and Laos F 105 crews conducted long distance missions from bases in Thailand refuelling in flight several times and carrying heavy external bombloads The MiG 17 was the lightweight highly manoeuvrable defending fighter it encountered most often in 1965 68 during Operation Rolling Thunder A development of the MiG 15 which shocked UN forces during the Korean War its emphasis was on simplicity and ease of maintenance in potentially primitive conditions Fully illustrated with stunning artwork this book shows how these two aircraft totally different in design and purpose fought in a series of duels that cost both sides dearly

Republic F-105 Thunderchief Peter E. Davies, 2012-09-20 The Republic F 105 Thunderchief was the fastest and most successful strike fighter of the Cold War Designed to deliver nuclear weapons at low altitude and then fight its way back to base by the early 1960s it was the primary

weapon in the USAF's tactical strike arsenal Thunderchief pilots in Europe the Far East and the USA stood on short notice alert ready to take on the formidable defenses of their Communist Bloc targets The F 105 was however to become a legend in a very different conflict As direct American involvement in Vietnam increased F 105s were deployed initially as a deterrent but ever more as conventional attack fighters against insurgency in Laos and Vietnam With the start of the bombing campaign against North Vietnam the Thunderchief became a vital element in attacks against some of the most heavily defended territory in modern history

F-104 Starfighter Units in Combat Peter E. Davies, 2014-11-20 This title covers the technical characteristics of the F 104 Starfighter one of the most widely used and popular aircraft in history Although built in small numbers for the USAF the F 104C fought and survived for almost three years in Vietnam There it was engaged in some of the war's most famous battles including the legendary operation Bolo where seven North Vietnamese MiGs were destroyed without the loss of a single US fighter This small tough and very fast fighter dubbed The Missile with a Man in It was called upon to do things it was not specifically designed for and did them admirably Featuring illustrations and photographs detailing the variety of nose paint schemes and weapons configurations this comprehensive appraisal of the F 104 Starfighter is ideal for modelling and aviation enthusiasts alike

MiG-17 and MiG-19 Units of the Vietnam War István Toperczer, 2012-11-20 A detailed history of the MiG 17 and MiG 19 units of the Vietnamese People's Air Force packed with first hand accounts and colour profiles The erstwhile enemy of the USAF and US Navy during the nine years of American involvement in the Vietnam War the Vietnamese People's Air Force VPAF quickly grew from an ill organised rabble of poorly trained pilots flying antiquated communist aircraft into a highly effective fighting force that more than held its own over the skies of North Vietnam As this book explores flying Soviet fighters like the MiG 17 and 19 the VPAF produced over a dozen aces whilst the Americans managed just two pilots and three navigators in the same period

F-105 Thunderchief MiG Killers of the Vietnam War Peter E. Davies, 2014-10-20 An illustrated history of the F 105's success against MiGs a relatively little known aspect of the Vietnam War and a testament to the jet's versatility and the skill of the pilots involved Despite its F for fighter designation the F 105 was designed and purchased to give the USAF an aircraft capable of the delivery of nuclear weapons at very high speed long range and below the radar altitudes However when the Vietnam War began it also emerged as USAF's best available tactical bomber for a limited conventional war as well Extensively targeted by MiG 17s and MiG 21s the F 105 pilots developed innovative tactics that allowed them to compete in air to air duels with their smaller more manoeuvrable enemies Illustrated throughout with extensive photographs detailing weapon loads internal features and action shots of actual engagements this volume examines the conduct of the Rolling Thunder strike missions and the tactics used for attack and defence by the attack escort fighter and radar monitoring elements within strike formations

F9F Panther Units of the Korean War Warren Thompson, 2014-06-20 In 1948 the USAF Marine Corps and US Navy were concentrating on converting over to an all jet force When the Korean War started in June 1950 the USAF had

built up a sizable jet force in the Far East while the US Navy was in the early stages of getting F9F Panthers operational as replacements for its piston engined F8F Bearcats. At about this time the Marine Corps had also begun using the Panthers in limited numbers. Operating from aircraft carriers off the Korean coast, F9Fs helped stop the North Korean invasion within two weeks of the communists crossing the 38th Parallel. The Panthers, escorting carrier-based AD Skyraiders and F4U Corsairs, penetrated as far north as Pyongyang where they bombed and strafed targets that the North Koreans thought were out of range. The Panthers also took the battle all the way to the Yalu River long before the MiG 15s became a threat. The F9F's basic tasking was aerial supremacy and combat air patrols, but they also excelled in bombing and strafing attacks. This illustrated volume charts the Panther's solid performance as a fighter bomber in Korea, which accelerated the development of swept wing carrier fighters during the remainder of the 1950s and well into the Cold War with the Soviet Union. **F-105**

Thunderchief Dennis R. Jenkins, 2000. Meeting demand for small thermonuclear weaponry capable of penetrating Soviet defences, the F 105 evolved through many generations of prototype. This work includes technical detail, balanced by facts and insider stories, missions, production, avionics development, the people and the works. **F-105 Wild Weasel vs SA-2**

'Guideline' SAM Peter E. Davies, 2011-12-20. A detailed account of the suppression of North Vietnam's surface to air missile defences during the Vietnam War, initiating a totally new concept of air war. The Vietnam War was the first conflict that saw extensive use of surface to air anti-aircraft missiles and thus became a training ground for the tactics of this new type of battle. As USAF pilots battled with supersonic Soviet ground to air missiles, featuring illustrations throughout, this instalment in Osprey's Duel series presents this story in the context of two of the main opponents: America's top fighter bomber and the NVA's best anti-aircraft missile. **MiG-21 Aces of the Vietnam War** István Toperczer, 2017-09-21. Having learned their

trade on the subsonic MiG 17, pilots of the Vietnamese People's Air Force (VPAF) received their first examples of the legendary MiG 21 supersonic fighter in 1966. Soon thrown into combat over North Vietnam, the guided missile equipped MiG 21 proved a deadly opponent for the US Air Force, US Navy and US Marine Corps crews striking at targets deep in communist territory. Although the communist pilots initially struggled to come to terms with the fighter's air search radar and weapons systems, the ceaseless cycle of combat operations quickly honed their skills. Indeed, by the time the last US aircraft, a B 52, was claimed by the VPAF on 28 December 1972, no fewer than 13 pilots had become aces flying the MiG 21. Fully illustrated with wartime photographs and detailed colour artwork plates, and including enthralling combat reports, this book examines the many variants of the MiG 21 that fought in the conflict, the schemes they wore, and the pilots that flew them. *MiG-17/19 Aces of the Vietnam War* István Toperczer, 2016-10-20. At the beginning of the Vietnam War, the Vietnam People's Air Force (VPAF) were equipped with slow, old Korean War generation fighters, a combination of MiG 17s and MiG 19s, types that should have offered little opposition to the cutting edge fighter bombers such as the F 4 Phantom II, F 105 Thunderchief and the F 8 Crusader. Yet when the USAF and US Navy unleashed their aircraft on North Vietnam in 1965, the inexperienced pilots of the

built up a sizable jet force in the Far East while the US Navy was in the early stages of getting F9F Panthers operational as replacements for its piston engined F8F Bearcats. At about this time the Marine Corps had also begun using the Panthers in limited numbers. Operating from aircraft carriers off the Korean coast, F9Fs helped stop the North Korean invasion within two weeks of the communists crossing the 38th Parallel. VPAF were able to shatter the illusion of US air superiority Taking advantage of their jet s unequalled low speed maneuverability small size and powerful cannon armament they were able to take the fight to their missile guided opponents with a number of Vietnamese pilots racking up ace scores Packed with information previously unavailable in the west and only recently released from archives in Vietnam this is the first major analysis of the exploits of Vietnamese pilots in the David and Goliath contest with the US over the skies of Vietnam **F-105 Thunderchiefs** W. Howard Plunkett,2016-05-01 One of the U S Air Force s most important fighter bombers the F 105 Thunderchief was in operation for almost thirty years It played a key role in the Vietnam War This book details the histories of the 103 F 105s that are displayed around the world Part One of the work summarizes the 29 years of F 105 operations focusing on events aircraft configurations units and bases The individual histories and photographs of each surviving F 105 from its production to its static display are contained in Part Two Appendices provide a mapped out state by state Thunderchief Tour and the fate by serial number of all 117 of the F 105s that survived their operational career only to end up in scrap yards MiG-21 "FISHBED" István Toperczer,2023-08-17 Using archival photographs sourced directly from Vietnam specially commissioned diagrams and combat accounts from veterans Istv n Toperczer reveals how the MiG 21 defended Vietnam between 1966 and 1968 One of the most successful communist jet fighters ever built the MiG 21 Fishbed was involved in a series of deadly duels with American fighters over North Vietnam as the USAF and US Navy ramped up strike missions during Operation Rolling Thunder culminating in the destruction of over 70 US aircraft for the loss of 35 Fishbeds Having honed their skills on the subsonic MiG 17 pilots of the Vietnam People s Air Force received their first examples of the legendary MiG 21 supersonic fighter in 1966 Soon thrown into combat over North Vietnam the guided missile equipped MiG 21 proved a deadly opponent for the American crews striking at targets deep into communist territory Although the communist pilots initially struggled to come to terms with the fighter s air search radar and weapons systems the ceaseless cycle of combat operations quickly honed their skills The best fighter then available to the VPAF more than 200 MiG 21s of various sub types were supplied to the North Vietnamese In this study leading VPAF authority Istv n Toperczer analyzes the tactics used by the MiG 21 pilots over the bitter fighting in North Vietnam during Rolling Thunder The highspeed hit and run attacks employed by the communist pilots proved to be very successful with both R 3S air to air missiles and heavy caliber cannon inflicting a rising toll on American jets Using first hand accounts from MiG 21 pilots battlescene artwork combat ribbon diagrams and armament views the author details the important role played by the Fishbed in the defense of North Vietnam **F-105 Thunderchief MiG Killers of the Vietnam War** Peter E. Davies,2014-10-20 An illustrated history of the F 105 s success against MiGs a relatively little known aspect of the Vietnam War and a testament to the jet s versatility and the skill of the pilots involved Despite its F for fighter designation the F 105 was designed and purchased to give the USAF an aircraft capable of the delivery of nuclear weapons at very high speed long range and below the radar altitudes However when the Vietnam War began it also emerged as USAF

s best available tactical bomber for a limited conventional war as well Extensively targeted by MiG 17s and MiG 21s the F 105 pilots developed innovative tactics that allowed them to compete in air to air duels with their smaller more manoeuvrable enemies Illustrated throughout with extensive photographs detailing weapon loads internal features and action shots of actual engagements this volume examines the conduct of the Rolling Thunder strike missions and the tactics used for attack and defence by the attack escort fighter and radar monitoring elements within strike formations **Rolling Thunder**

1965-68 Richard P. Hallion, 2018-02-22 Operation Rolling Thunder was the campaign that was meant to keep South Vietnam secure and dissuade the North from arming and supplying the Viet Cong It pitted the world s strongest air forces against the MiGs and missiles of a small Soviet client state But the US airmen who flew Rolling Thunder missions were crippled by a badly thought out strategy rampant political interference in operational matters and aircraft optimised for Cold War nuclear strikes rather than conventional warfare Ironically Rolling Thunder was one of the most influential episodes of the Cold War its failure spurring the 1970s US renaissance in professionalism fighter design and combat pilot training Dr Richard P Hallion one of America s most eminent air power experts explains how Rolling Thunder was conceived and fought and why it became shorthand for how not to fight an air campaign Instruments of War Spencer C. Tucker, 2015-07-28 This highly detailed and well illustrated single volume work documents the evolution of warfare across history through weaponry and technological change In war the weapons and technologies employed have direct effects on how battles are waged When new weapons are introduced they can dramatically alter the outcomes of warfare and consequently change the course of history itself This reference work provides a fascinating overview of the major weapon systems and military technologies that have had a major impact on world history Addressing weapons as crude as the club used by primitive man to the high tech weapons of today such as unmanned drones Instruments of War Weapons and Technologies That Have Changed History offers nearly 270 profusely illustrated entries that examine the key roles played by specific weapons and identify their success and failures The book begins with an introductory essay that frames the subject matter of the work and discusses the history of weapons as a whole The text is concise and accessible to general readers without extensive backgrounds in military history yet provides the detailed information necessary to convey the complexity of the evolution of warfare through technological change *Combat Aircraft of the United States Air Force* Michael Green, 2016-07-30 When the United States Army Signal Corps created the Aeronautical Division in August 1907 it had a mission to take charge of all matters pertaining to military ballooning air machines and all kindred matters That small inconsequential portion of the US Army would grow progressively over the many decades to become a separate service named the US Air Force in 1947 following the Second World War Overnight it became the worlds most powerful military establishment able to deliver conventional and nuclear ordnance anywhere around the globe Todays cutting edge example of this power projection is the supersonic bat winged B 2 Spirit stealth bomber which can fly at an altitude of 50 000 feet and is built of carbon graphite composite materials The B 2

Spirit is a far cry from the early days of the service when it relied on fragile prop driven wood and fabric aerial platforms such as the Wright Type B which could barely reach an altitude of 100 feet. In between have been such iconic Second World War aircraft as the P 51 Mustang and P 47 Thunderbolt fighters and bombers such as the B 25 Mitchell B 17 Flying Fortress and B 29 Super Fortress which dropped the first Atomic Bomb in 1945. The Cold War demanded ever more powerful aircraft such as the B 58 Hustler and B 52 Stratofortress and fighters including the F 86 Sabre F 104 Starfighter and F 4 Phantom. All these aircraft and more are vividly illustrated and described in detail in this superb Images of War publication.

Air Power's Lost Cause
Brian D. Laslie, 2021-05-14. The first comprehensive treatment of the air wars in Vietnam. Filling a substantial void in our understanding of the history of airpower in Vietnam, this book provides the first comprehensive treatment of the air wars in Vietnam. Brian Laslie traces the complete history of these air wars from the beginning of American involvement until final withdrawal. Detailing the competing roles and actions of the air elements of the United States Army, Navy, and Air Force, the author considers the strategic, operational, and tactical levels of war. He also looks at the air war from the perspective of the North Vietnamese Air Force. Most important for understanding the US defeat, Laslie illustrates the perils of a nation building a one-dimensional fighting force capable of supporting only one type of war.
