Bilingualism Across the Lifespan Kenneth

Hyltenstam, Loraine K. Obler, 1989-09-29 *Bilingualism Across the Lifespan* examines the dynamics of bilingual language processing over time from the perspectives of neurolinguistics, psycholinguistics, and sociolinguistics. This multidisciplinary approach is fundamental to an understanding of how the bilingual's two or more language systems interact with each other and with other higher cognitive systems, neurological substrates, and social systems, a central theme of this volume. Contributors examine the nature of bilingualism during various phases of the lifecycle: childhood, adulthood, and old age, and in various health pathology conditions. Topics range from code separation in the young bilingual child across various types of language pathologies in adult bilinguals to language choice problems in dementia. The volume thus offers a broad overview of current theoretical and empirical approaches to the study of bilingualism. It will interest and stimulate researchers and graduate students in the fields of linguistics, neuropsychology, and developmental psychology, as well as in foreign language teaching, speech pathology, educational psychology, and special education. **The Oxford Handbook of Language**

Attrition Monika S. Schmid, Barbara Köpcke, 2019-07-17 This volume is the first handbook dedicated to language attrition, the study of how a speaker's language may be affected by crosslinguistic interference and non-use. The effects of language attrition can be felt in all aspects of language knowledge, processing, and production, and can offer unique insights into the mind of bilingual language users. In this book, international experts in the field explore a comprehensive range of topics in language attrition, examining its theoretical implications, psycho- and neurolinguistic approaches, linguistic and extralinguistic factors, L2 attrition, and heritage languages. The chapters summarize current research and draw on insights from related fields such as child language development, language contact, language change, pathological developments, and second language acquisition.
