## **Factors That Influence Curriculum Design:**

**Curriculum Design** P Yoga, 2018-08-20 This book deals with broad descriptions of purposes or ends stated in general terms without criteria of achievement or mastery. Curriculum aims or goals relate to educational aims and philosophy. They are programmatic and normally do not delineate the specific courses or specific items of content. The educational aims must be relevant to the times, both the present and the future, and furnish direction that is good for society and not for one particular group. Usually, they are considered to be specific in nature, written in terms of what students will know, be able to do, or behavior they will exhibit at the end of the instruction. Outcomes that students exhibit as a result of the experiences they receive from the curriculum. Immediate specific outcomes of instruction, daily taught and assessed. The intent of aims, goals, and objectives differ, but it must be remembered that congruence must be established between them if education is to be meaningful. Remember to use different levels of objectives and domains of learning to enhance your curriculum. Collaborative Curriculum Design for Sustainable Innovation and Teacher Learning Jules Pieters, Joke Voogt, Natalie Pareja Roblin, 2019-09-19 This open access book provides insight into what it takes to actively involve teachers in the curriculum design process. It examines different aspects of teacher involvement in collaborative curriculum design with specific attention to its implications for sustainable curriculum innovation and teacher learning. Divided into six sections, the book starts out by introducing the notion of collaborative curriculum design and discusses its historical and theoretical foundations. It describes various approaches commonly adopted to actively involve teachers in the co-design of curriculum materials. Sections two and three provide examples of what key phases in the curriculum design process, such as needs analysis, design and development, and implementation, look like across various collaborative curriculum design projects. Section four reports on the impact of collaborative curriculum design on student learning, teacher practices, teacher professional growth, and institutional change. Building on the research evidence about the outcomes of collaborative curriculum design, section five focuses on sustainability, scaling up, and curriculum leadership issues, which are key to the continuation and further evolution of curriculum innovations. Future perspectives are addressed in section six with emphasis on the infrastructure of a sustainable curriculum innovation. **Developing Person-Centred Cultures in Healthcare Education and Practice** Brendan McCormack, 2024-03-18 *Developing Person Centred Cultures in Healthcare Education and Practice* This book embarks on an ambitious journey to challenge existing paradigms and spark a radical shift in the way healthcare is perceived and delivered.
