Factory Girls From Village To City In A Changing China:

Factory Girls Leslie T. Chang, 2008-10-07 An eye opening and previously untold story *Factory Girls* is the first look into the everyday lives of the migrant factory population in China. China has 130 million migrant workers the largest migration in human history. In *Factory Girls* Leslie T. Chang a former correspondent for the Wall Street Journal in Beijing tells the story of these workers primarily through the lives of two young women whom she follows over the course of three years as they attempt to rise from the assembly lines of Dongguan an industrial city in China's Pearl River Delta. As she tracks their lives Chang paints a never before seen picture of migrant life a world where nearly everyone is under thirty where you can lose your boyfriend and your friends with the loss of a mobile phone where a few computer or English lessons can catapult you into a completely different social class. Chang takes us inside a sneaker factory so large that it has its own hospital movie theater and fire department to posh karaoke bars that are fronts for prostitution to makeshift English classes where students shave their heads in monklike devotion and sit day after day in front of machines watching English words flash by and back to a farming village for the Chinese New Year revealing the poverty and idleness of rural life that drive young girls to leave home in the first place. Throughout this riveting portrait Chang also interweaves the story of her own family's migrations within China and to the West providing historical and personal frames of reference for her investigation. A book of global significance that provides new insight into China. *Factory Girls* demonstrates how the mass movement from rural villages to cities is remaking individual lives and transforming Chinese society much as immigration to America's shores remade our own country a century ago.

Politics in China William A. Joseph, 2014 On October 1 2009 the People's Republic of China PRC celebrated the 60th anniversary of its founding And what an eventful and tumultuous six decades it had been During that time under the leadership of the Chinese Communist Party CCP China was transformed from one of the world's poorest countries into the world's fastest growing major economy and from a weak state barely able to govern or protect its own territory to a rising power that is challenging the United States for global influence Over those same years the PRC also experienced the most deadly famine in human history caused largely by the actions and inactions of its political leaders Not long after there was a collapse of government authority that pushed the country to the brink of and in some places actually into civil war and anarchy Today China is for the most part peaceful prospering and proud This is the China that was on display for the world to see during the Beijing Olympics in 2008 The CCP maintains a firm grip on power through a combination of popular support largely based on its recent record of promoting rapid economic growth and harsh repression of political opposition Yet the party and country face serious challenges on many fronts including a slowing economy environmental desecration pervasive corruption extreme inequalities and a rising tide of social protest Politics in China is an authoritative introduction to how the world's most populous nation and rapidly rising global power is governed

today Written by leading China scholars the book's chapters offers accessible overviews of major periods in China's modern political history from the mid nineteenth century to the present key topics in contemporary Chinese politics and developments in four important areas located on China's geographic periphery Tibet Xinjiang Hong Kong and Taiwan

The Next Factory of the World Irene Yuan Sun, 2017-10-17 A Best Business Book of 2017 The Financial Times China is now the biggest foreign player in Africa It's Africa's largest trade partner the largest infrastructure financier and the fastest growing source of foreign direct investment Chinese entrepreneurs are flooding into the continent investing in long term assets such as factories and heavy equipment Considering Africa's difficult history of colonialism one might suspect that China's activity there is another instance of a foreign power exploiting resources But as author Irene Yuan Sun vividly shows in this remarkable book it is really a story about resilient Chinese entrepreneurs building in Africa what they so recently learned to build in China a global manufacturing powerhouse The fact that China sees Africa not for its poverty but for its potential wealth is a striking departure from the attitude of the West particularly that of the United States Despite fifty years of Western aid programs Africa still has more people living in extreme poverty than any other region in the world Those who are serious about raising living standards across the continent know that another strategy is needed Chinese investment gives rise to a tantalizing possibility that Africa can industrialize in the coming generation With a manufacturing led transformation Africa would be following in the footsteps of the United States in the nineteenth century Japan in the early twentieth and the Asian Tigers in

the late twentieth Many may consider this an old fashioned way to develop but as Sun argues it s the only one that s proven to raise living standards across entire societies in a lasting way And with every new Chinese factory boss setting up machinery and hiring African workers and managers that possibility becomes more real for Africa With fascinating and moving human stories along with incisive business and economic analysis The Next Factory of the World will make you rethink both China s role in the world and Africa s future in the globalized economy
