Kelly, 2010-02-08 School Social Work An Evidence Informed Framework for Practice offers school social work

students and veteran practitioners a new framework for choosing their interventions based on the best available evidence. It is the first work that synthesizes the evidence based practice EBP process with recent conceptual frameworks of school social work clinical practice offered by leading scholars and policymakers. Many other books on EBP try to fit empirically validated treatments into practice contexts without considering the multiple barriers to implementing evidence based practices in places as complicated and multi faceted as schools. Additionally there are vital questions in the literature about what the best levels for intervention are in school social work. Responding to the complexity of applying EBP in schools this volume offers a conceptual framework that addresses the real world concerns of practitioners as they work to provide the best services to their school clients. For each domain of school social work practice the authors critically review interventions presenting the current research with guidelines for addressing such implementation issues as cost school culture adaptations for special populations and negotiating multiple arenas of practice. In addition the chapters are grounded in the process of evidence based practice illustrating how school practitioners can pose useful questions search for relevant evidence appraise the evidence apply it in keeping with client values and monitor the results. Written by four school social work scholars with over four decades of theoretical research and practice experience this volume will be relevant to both research faculty studying school social work interventions and students learning about school social work practice.

Handbook of Community Psychiatry Hunter L. McQuiston, Wesley E. Sowers, Jules M. Ranz, Jacqueline Maus Feldman, 2012-06-05. During the past decade or more there has been a rapid evolution of mental health services and treatment technologies shifting psychiatric epidemiology changes in public behavioral health policy and increased understanding in medicine regarding approaches to clinical work that focus on patient centeredness. These contemporary issues need to be articulated in a comprehensive format. The American Association of Community Psychiatrists AACP a professional organization internationally recognized as holding the greatest concentration of expertise in the field has launched a methodical process to create a competency certification in community psychiatry. As a reference for a certification examination that effort will benefit enormously from a comprehensive handbook on the subject.
