## **Crocodile Reaktion S Animal:**

*Critical Animal Geographies* Kathryn Gillespie, Rosemary-Claire Collard, 2015-01-30 *Critical Animal Geographies* provides new geographical perspectives on critical animal studies exploring the spatial political and ethical dimensions of animals lived experience and human animal encounter It works toward a more radical politics and theory directed at the shifting boundary between human and animal Chapters draw together feminist political economic post humanist anarchist post colonial and critical race literatures with original case studies in order to see how efforts by some humans to control and order life human and not violate constrain and impinge upon others Central to all chapters is a commitment to grappling with the stakes violence death life autonomy of human animal encounters Equally the work in the collection addresses head on the dominant forces shaping and dependent on these encounters capitalism racism colonialism and so on In doing so the book pushes readers to confront how human animal relations are mixed up with overlapping axes of power and exploitation including gender race class and species

**Animals and the Environment** Lisa Kemmerer, 2015-05-01 Contemporary Earth and animal activists rarely collaborate perhaps because environmentalists focus on species and ecosystems while animal advocates look to the individual and neither seems to have much respect for the other This diverse collection of essays highlights common ground between earth and animal advocates most notably the protection of wildlife and personal dietary choice If earth and animal advocates move beyond philosophical differences and resultant divergent priorities turning attention to shared goals both will be more effective and both animals and the environment will benefit Given the undeniable seriousness of the environmental problems that we face including climate change and species extinction it is essential that activists join forces Drawing on a wide range of issues and disciplines ranging from wildlife management hunting and the work of NGOs to ethics ecofeminism religion and animal welfare this volume provides a stimulating collection of ideas and challenges for anyone else who cares about the environment or animals

**Brute Force** Dominic Lennard, 2019-11-01 Considers how dangerous beasts in horror films illuminate the human animal relationship It s always been a wild world with humans telling stories of killer animals as soon as they could tell stories at all Movies are an especially popular vehicle for our fascination with fierce creatures In *Brute Force* Dominic Lennard takes a close look at a range of cinematic animal attackers including killer gorillas sharks snakes bears wolves spiders and even a few dinosaurs Lennard argues that animal horror is not so much a focused genre as it is an impulse tapping into age old fears of becoming prey At the same time these films expose conflicts and uncertainties in our current relationship with animals Movies considered include *King Kong* *Jaws* *The Grey* *Them* *Arachnophobia* *Jurassic Park* *Snakes on a Plane* *An American Werewolf in London* and many more Drawing on insights from film studies art history cognitive science and evolutionary psychology *Brute Force* is an engaging critical exploration and appreciation of cinema s many bad beasts The brilliance of Dominic Lennard s *Brute Force* is not only that it is long overdue but one didn t realize it was due in the first place Yet upon reflection and of course through Lennard s

engaging book one realizes not only the ubiquity of animals in horror but their utter centrality to so many classic horror films In reading this we can hear the distant rumble of footsteps of a genetically reborn Tyrannosaurus or the hurried pounding of our beloved Rover who has decided that he wants more than kibbles and bits for dinner and we look mighty appetizing Groundbreaking is often overused but in this case it truly fits David Desser coeditor of *Tough Ain't Enough New Perspectives on the Films of Clint Eastwood* Crocodile Dan Wylie, 2013-07-15 Tick tock tick tock Thanks to Peter Pan this sound if heard near water means run a hungry crocodile is on its way J M Barrie isn't fully to blame for spreading the word that crocodiles are our enemies or at least the enemies of one handed pirates innumerable songs stories and legends have characterized these reptiles as a symbol of pitiless predation and insatiable appetite Tracking twenty three crocodilian species from India and Egypt to Africa Australia and beyond Crocodile advocates that we do a complete one eighty in our views of these magnificent creatures Dan Wylie traces the crocodile in myth art and literature demonstrating that though we commonly associate the reptiles with ferocity and deceit they have also often been respected and revered in human history Discussing how crocodiles were all but wiped out in the middle of the twentieth century by hunters and skin traders and are now making a comeback he reveals that as apex predators they are today an increasingly important indicator of the health of an ecosystem and may outlive humans like they did dinosaurs Presenting a concise cogent case for why we should respect these fearsome animals this beautifully illustrated volume is a tribute to one of the world's ultimate survivors **Animals and Tourism** Kevin Markwell, 2015-05-01 This book critically examines the many ways in which tourism and animals intersect whether as tourist attractions wildlife conservation tools as travel companions or as meat to be eaten It aims to make a meaningful contribution to the growing body of knowledge concerning the relationships between animals tourists and the tourism industry The chapters are organised into three themes ethics and welfare conflict contradiction and contestation and shifting relationships Theoretically informed and empirically rich the chapters examine topics such as whale watching animal performances the objectification and commodification of animals and stakeholder conflict among a range of others It is hoped that the book will help to highlight key research questions and stimulate other researchers and students to reflect critically on the place of animals within tourism spaces experiences practices and structures Zoos and Tourism Warwick Frost, 2011 Zoos are important and popular tourist attractions Spread around the world they are typically located in major cities with visitation levels comparable to other major attractions Nature based attractions constructed in artificial settings they face the challenge of trying to balance potentially conflicting aims of conservation education and entertainment The best are continually developing fresh and effective techniques on visitor interpretation and management the worst highlight the manipulation of animals for human gratification Taking a global approach this book examines the problems and paradoxes of zoos as they try to balance their roles as visitor attractions while repositioning themselves as leading conservation agencies This book provides a detailed and critical examination of the conflicting roles and identities of the modern zoo from a tourism

perspective and as such reminds us that zoos are as much about the people who visit them as about the animals that they display At a time when they are under continual critical scrutiny this book delivers a fresh approach to our understanding and appreciation of zoos and of the challenges and opportunities that they face as they strive to remain relevant within modern society Andrew Tribe University of Queensland Australia Cave Canem Iain Ferris, 2018-02-15 Lavishly illustrated this book examines both written and archaeological sources particularly visual evidence in the form of sculptures coins mosaics wall paintings and decorated everyday items in order to shed light on animals in Roman culture **Mathematikos gamtos fakulteto darbai ...** Lietuvos universitetas (Kaunas, Lithuania). **Conservation, Biodiversity and International Law** A. Gillespie, 2013-07-01 Humanity has been gambling for generations with the extent to which it can degrade nature and continue to prosper Now the environmental debt is being called in and the ability of international diplomacy and law government policy and political will to deal with the issues is being tested Conservation Biodiversity and International Law is a must read for any practitioner in the high stakes business of restoring our ability to live in harmony with the natural world that sustains us Alastair Morrison Department of Conservation New Zealand Biodiversity is the cornerstone of life our plants animals and ecosystems are essential for livelihoods and have shaped our culture and traditions around the world However our precious biodiversity is at risk as never before Global targets to reduce biodiversity loss have not been met and we continue to lose biodiversity at an unprecedented rate In fact we are currently in the middle of an extinction crisis and scientists have advised that one species from our planet is being lost every 38 minutes The nature of this crisis and the actions taken to address it are clearly and articulately put forward in this landmark book by Professor Al Gillespie This book is particularly useful in documenting the many policy and legal actions that have been taken to address these issues and how the application of these instruments can be improved Although focused on the law the book covers a range of disciplines including science philosophy and policy which lay the foundation for international law This book makes a major and highly valued contribution to the discipline of environmental law and policy and is an invaluable reference for policy makers practitioners and academic audiences David Sheppard CEO of the Secretariat of the Pacific Regional Environment Programme SPREP This book is written by a prominent and influential scholar who also has the benefit of first hand knowledge of practical working of environmental regimes having participated in several important negotiations Gillespie's monograph therefore stands out among other publications on the subject of conservation combining thoughtful and scholarly approach to issues raised with unparallel insights into the working of environmental law and the conservation of biodiversity The book is very original in its presentation of this subject especially in the selection of topics and the approach which is not only legal but also scientific philosophical and political This book is evidence of the great erudition of the author not only in the field of conservation but also in international environmental law and general international law an example of which can be his analysis of the precautionary principle trade and a very

complex issue of the exception for indigenous peoples and science Mention also must be made of his detailed approach to various multilateral treaty regimes such as Ramsar Convention and the World Heritage Convention Gillespie wrote an exceptional book which is a must for international lawyers both practitioners and scholars It is a thought provoking very well researched and original monograph which due to its all encompassing approach will retain its importance for a very long period of time Malgosia Fitzmaurice Queen Mary University of London UK A major work this book provides a comprehensive picture of the international legal challenges of natural heritage conservation Truly an indispensable tool for policy makers experts and students The book offers a complete guide to the complex world of treaties that regulate conservation at the global scale Francesco Bandarin UNESCO Assistant Director General for Culture This important and timely book provides a rigorous overview of the defining issues presently facing conservation at international level The author provides detailed coverage of topics ranging from the classification of species right through to access and benefit sharing drawing on his personal experience at intergovernmental level Each question is examined through the prism of dozens of treaties and hundreds of decisions and resolutions of the key multilateral regimes and the law in each area is supplemented by the necessary considerations of science politics and philosophy providing much needed context for the reader Combining expert scholarship and first hand insight Conservation Biodiversity and International Law will be an invaluable resource for researchers and practitioners in international environmental law as well as providing an accessible guide for students

*Darbai* Lietuvos universitetas (Kaunas, Lithuania). Matematikos-Gamtos Fakultetas, 1931      **Matters of Engagement** Daniela Hacke, Claudia Jarzebowski, Hannes Ziegler, 2020-11-05 By drawing on a broad range of disciplinary and cross disciplinary expertise this study addresses the history of emotions in relation to cross cultural movement exchange contact and changing connections in the later medieval and early modern periods All essays in this volume focus on the performance and negotiation of identity in situations of cultural contact with particular emphasis on emotional practices They cover a wide range of thematic and disciplinary areas and are organized around the primary sources on which they are based The edited volume brings together two major areas in contemporary humanities the study of how emotions were understood expressed and performed in shaping premodern transcultural relations and the study of premodern cultural movements contacts exchanges and understandings as emotionally charged encounters In discussing these hitherto separated historiographies together this study sheds new light on the role of emotions within Europe and amongst non Europeans and Europeans between 1100 and 1800 The discussion of emotions in a wide range of sources including letters images material culture travel writing and literary accounts makes Matters of Engagement an invaluable source for both scholars and students concerned with the history of premodern emotions      **Nature's Saviours** Graham Huggan, 2013-08-22 Today's celebrity conservationists many of whom made their reputations through television and other visual media play a major role in drawing public attention to an increasingly threatened world This book one of the first to address this contribution focuses on

five key figures the English naturalist David Attenborough the French marine adventurer Jacques Yves Cousteau the American primatologist Dian Fossey the Canadian scientist broadcaster activist David Suzuki and the Australian crocodile hunter Steve Irwin Some of the issues the author addresses include What is the changing relationship between western conservation and celebrity How has the spread of television helped shape and mediate this relationship To what extent can celebrity conservation be seen as part of a global system in which conservation like celebrity is big business The book critically examines the heroic status accorded to the five figures mentioned above taking in the various discourses around nature science nation gender through which they and their work have been presented to us In doing so it fills in the cultural historical and ideological background behind contemporary celebrity conservationism as a popular expression of a chronically endangered world

Chekhov's Sakhalin Journey Jonathan Cole, 2023-12-14 Chekhov often said that I am a doctor by trade and sometimes I do literary work in my free time a surprising claim given his status as a giant of 20th century drama This literary biographical study uncovers new sides to him as both a medical professional and humanitarian and tells the story of Chekhov's trip to Sakhalin Island in the harsh wastes of Siberia Anton Chekhov practiced medicine for most of his life and engaged in humanitarian work which took him away from writing for months He placed one such trip though across the unforgiving terrain of Siberia to write about the penal island of Sakhalin above all others Chekhov's Sakhalin Journey written by a neuroscientist and practicing clinician uses this trip and Chekhov's own account of it to shed light on hitherto overlooked aspects of his life In doing so it shows that to understand the man we need his medicine as well as his literature and we need to assess his life from his perspective as well as ours

**A Year with Nature** Marty Crump, 2018-11-11 A Year with Nature is an almanac like none you've ever seen combining science and aesthetics it is a daily affirmation of the extraordinary richness of biodiversity and our enduring beguilement by its beauty With a text by herpetologist and natural history writer Marty Crump and a cornucopia of original illustrations by Bronwyn McIvor this quirky quotidian reverie gazes across the globe media and time as it celebrates date appropriate natural topics ranging from the founding of the National Park Service to annual strawberry garlic shrimp hummingbird and black bear festivals With Crump we mark the publication of classics like Carson's Silent Spring and White's Charlotte's Web and even the musical premiere of Tchaikovsky's Swan Lake We note the discovery of the structure of DNA and the mountain gorilla the rise of citizen science projects and the work of people who've shaped how we view and protect nature from Aristotle to E O Wilson Some days feature US celebrations like National Poinsettia Day and National Cat Day others highlight country specific celebrations like Australia's Wombat Day and Thailand's Monkey Buffet Festival during which thousands of macaques feast on an ornately arranged spread of fruits and vegetables Crump also highlights celebrations that span borders from World Wildlife Conservation Day to International Mountain Day and global festivities for snakes sea turtles and chocolate Interweaving fascinating facts on everything from jellyfish bodies to monthly birth flowers with folkloric entries featuring the

Loch Ness Monster unicorns and ancient Greek Roman and Egyptian mythology the almanac is as exhaustive as it is enchanting A Year with Nature celebrates the wonder and beauty of our natural world as we have expressed it in visual arts music literature science natural history and everyday experience But more than this the almanac s vignettes encourage us to contemplate how we can help ensure that future generations will be able to enjoy the landscapes and rich biodiversity we so deeply cherish *Index Veterinarius* ,2006

**Petrarch** Christopher S. Celenza,2022-08-22 An enlightening study of the contradictory character of this canonical fourteenth century Italian poet Born in Tuscany in 1304 Italian poet Francesco Petrarca is widely considered one of the fathers of the modern Italian language Though his writings inspired the humanist movement and subsequently the Renaissance Petrarch remains misunderstood He was a man of contradictions a Roman pagan devotee and a devout Christian a lover of friendship and sociability yet intensely private In this biography Christopher S Celenza revisits Petrarch s life and work for the first time in decades considering how the scholar s reputation and identity have changed since his death in 1374 He brings to light Petrarch s unrequited love for his poetic muse the anti institutional attitude he developed as he sought a path to modernity by looking backward to antiquity and his endless focus on himself Drawing on both Petrarch s Italian and Latin writings this is a revealing portrait of a figure of paradoxes a man of mystique historical importance and endless fascination It is the only book on Petrarch suitable for students general readers and scholars alike

**A Philosophy of Dirt** Olli Lagerspetz,2018-02-15 What is dirt and what does it really mean to be dirty or clean Dirt and cleaning are often associated with ideas of guilt otherness and social control but also with living responsibly and in harmony with the environment In this learned innovative study Olli Lagerspetz offers a persuasive discussion of dirt and its ramifications across philosophy and culture Writing with wit and grit he argues that questions of dirt and soiling can neither be reduced to hygiene nor to ritual pollution Instead they are integral to almost every human activity As participants in material culture we not only produce things and dispose of them but we also engage with them practically aesthetically and morally Everything in essence comes back to dirt and waste Ranging through subjects and times from Heraclitus of Ephesus to the Renaissance via Heidegger and Mary Douglas from the hygienic products of modernity to abject art Lagerspetz constantly questions current thinking on all subjects most foul Proposing a new view of dirt based on our physical engagement with the world A Philosophy of Dirt is essential reading for all students of philosophy and for anyone who s felt soiled and wants to know why *Forthcoming Books* Rose Arny,1998-06

**The Anatomy Museum** Elizabeth Hallam,2008 Anatomy museums around the world showcase preserved corpses in service of education and medical advancement but they are little known and have been largely hidden from the public eye Elizabeth Hallam here investigates the anatomy museum and how it reveals the fascination and fears that surround the dead body in Western societies Hallam explores the history of these museums and how they operate in the current cultural environment Their regulated access increasingly clashes with evolving public mores toward the exposed body as demonstrated by the international popularity of

the Body Worlds exhibition The book examines such related topics as artistic works that employ the images of dead bodies and the larger ongoing debate over the disposal of corpses Issues such as aesthetics and science organ and body donations and the dead body in Western religion and ritual are also discussed here in fascinating depth The Anatomy Museum unearths a strange and compelling cultural history that investigates the ideas of preservation human rituals of death and the spaces that our bodies occupy in this life and beyond

**Zoo** Eric Baratay, Elisabeth Hardouin-Fugier, 2004 Wild animals have fascinated human observers since time immemorial The story of our interest in collecting classifying and dominating Nature so that its inner workings could be understood also looms large in the history of science and thus it is surprising that the history of menageries zoological gardens and the zoo as we know it today has been so poorly documented This gap is addressed by Zoo a comprehensive history of the zoo in the Western world
