Media Mediocrity-Waging War Against Science Richard Zurawski,2011-03-01T00:00:00Z We have all at some point seen science in action on television Whether it was a show about disasters or weather nature or the universe a science commentator even a crime show depicting forensic evidence we have all gleaned tidbits of scientific information while being entertained by our televisions Or have we From science channels and documentaries to fictional and children s programming television brings a myriad of scientific discoveries and theories into the homes of people around the world But how accurately do these programs represent science In *Media Mediocrity* television producer and broadcaster Richard Zurawski argues that the science we learn on television is inaccurate misleading and sometimes even dangerous Dealing with issues such as tobacco consumption global warming and Intelligent Design and a host of pseudoscientific pursuits like UFOs ghosts and the afterlife *Media Mediocrity* examines how television producers pursuit of ratings and profit trump any desire to provide the audience with an accurate knowledge of science and argues that there are real consequences for this lack of knowledge Four out of five viewers gather the bulk of their scientific knowledge from television making television an important intermediary between society and its understanding of science If television gives us misleading or blatantly false scientific information how can we hope to make informed decisions about scientific issues Equally importantly who is it that is feeding us this false science And what do they gain from doing so If you think your TV has made you an expert then read this book and think again **Being of Difference** Pasquale De Marco, In *Being of Difference* Pasquale De Marco takes us on an intellectual journey that challenges conventional notions of unity and explores the profound impact of difference in shaping our lives Delving into the enigmatic nature of difference this book unveils the paradoxical interplay between unity and diversity fluidity and interconnectedness We discover the significance of difference in shaping our perceptions of reality our understanding of identity and our interactions with the world around us In the realm of identity Pasquale De Marco confronts the fluidity and malleability of the self acknowledging the myriad factors that shape our sense of who we are Embracing the dynamic interplay of difference within each individual this book challenges the notion of a fixed and monolithic identity We explore the complexities of identity formation the challenges of navigating social categories and the transformative power of embracing our multifaceted selves Venturing into the realm of power dynamics *Being of Difference* lays bare the stark realities of differential treatment marginalization and social injustice We confront the insidious ways in which difference is weaponized to perpetuate hierarchies and maintain unjust structures Yet we also find inspiration in the resilience of those who challenge these imbalances forging alliances across boundaries and demanding recognition of their

inherent worth Our journey continues as we delve into the intricacies of communication where difference manifests in linguistic diversity cultural nuances and the myriad ways in which we make meaning We grapple with the challenges of miscommunication and the barriers that arise when we seek to bridge cultural divides Yet we also discover the immense potential for understanding and connection that lies within our differences recognizing the importance of empathy respect and a willingness to listen The pursuit of knowledge is not immune to the pervasive influence of difference Being of Difference examines the ways in which dominant narratives and perspectives shape the production of knowledge often marginalizing and excluding alternative viewpoints We advocate for a decolonized approach to knowledge creation one that embraces diverse voices acknowledges situatedness and seeks to weave together multiple strands of understanding Only through this inclusive approach can we hope to gain a more comprehensive and nuanced understanding of the world If you like this book write a review

Genetic and Genomic Resources of Grain Legume Improvement Mohar Singh, Hari D. Upadhyaya, Ishwari Singh Bisht, 2013-07-18 Grain legumes mainly consisting of common bean pea chickpea faba bean cowpea lentil pigeon pea peanut Asian Vigna species grass pea and horsegram are under cultivation in a considerable area worldwide With their higher protein content and symbiotic nitrogen fixing bacteria in root nodules enabling them to fix their own nitrogen reducing the fertilizer use in agriculture has become very important for the production systems For most of these important grain legumes a large number of germplasm accessions were characterized and evaluated for various agro morphological traits including biotic abiotic and quality parameters Core and mini core collections have also been developed for the majority of grain legumes they were further evaluated for different parameters From these genetic resources potential donors of desirable traits have been selected after evaluation and characterization and have been utilized in the genetic improvement of cultivars Current available genomic resources and technologies can facilitate allele mining for novel traits of interest and incorporation from wild relatives into elite domestic genetic backgrounds

Biology for Engineers Dr. Annamma Odaneth, 2025-01-01 **Agroecology, Ecosystems and Sustainability in the Tropics** G. Poyyamoli, 2017-06-26 Tropical ecosystems are some of the most biologically and ecologically diverse in the world Traditional local agroecosystems in the tropics reflect this diversity and provide excellent examples of how nature can be used as the model for designing and managing sustainable agroecosystems This book brings together such examples Using

an agroecological approach the collection of chapters demonstrates how agroecology must simultaneously be a science a practice and a movement for social change towards a paradigm of sustainability that engages all parts of the food system from the field to the table Chapter contributors were selected from multiple countries and backgrounds providing a valuable diversity of approaches and knowledge systems and the interaction of these systems gives this book the important transdisciplinarity that has become a key component of agroecology Working across disciplines and knowledge systems is necessary in order to link the multiple components of food systems that promote effective change As food systems return to the diversity complexity and resilience they once had it is collections of experiences as presented in this book that provide examples of the path we must be on Steve Gliessman Professor Emeritus of Agroecology University of California Santa Cruz USA
