NATO and Article 5 John R. Deni, 2017-10-04 For much of the last 25 years NATO has focused on crisis management in places such as Kosovo and Afghanistan resulting in major changes to alliance strategy resourcing force structure and training Re embracing collective defense which lies at the heart of the Treaty of Washington s Article 5 commitment is no easy feat and not something NATO can do through rhetoric and official pronouncements Nonetheless this shift is vitally necessary if the alliance is to remain the bulwark of Western defense and security Russia s illegal annexation of Crimea and its invasion of Ukraine have fundamentally upended the security environment in Europe thrusting NATO into the spotlight as the primary collective defense tool most European states rely upon to ensure their security Collective defense is one of the alliance s three core missions along with crisis management and cooperative security It is defined in Article 5 the most well known and arguably most important part of NATO s founding treaty which states The Parties agree that an armed attack against one or more of them in Europe or North America shall be considered an attack against them all Although all three missions are vital to the interests of NATO s many member states collective defense has become first among equals once again However three very significant hurdles stand in the way of the alliance and its member states as they attempt to re embrace collective defense These loosely correspond to an ends ways means construct First is the alliance s strategy toward Russia Is Russia an adversary a partner neither or both How should strategy and policies change to place the alliance and its members on more solid ground when it comes to managing Russia Second are the ongoing disputes over resourcing and burden sharing In recent years it has become commonplace for American leaders to publicly berate European allies in an effort to garner more contributions to the common defense How might the alliance better measure and more equitably share security burdens Third is the alliance s readiness to fulfill its objectives Many allies have announced or are implementing increases in defense spending However governments of European NATO member states are strongly incentivized by

domestic politics to favor acquisition of military hardware or spending on personnel salaries and benefits usually at the expense of readiness. The result is that NATO military forces risk quickly becoming hollow in a way that is often underappreciated which will prevent the alliance from fulfilling the collective defense promise inherent in Article 5. The book examines all such questions to assess NATO's return to collective defense and offer a roadmap for overcoming those challenges in both the short and long term.

Ugandan Agency within China-Africa Relations Barney Walsh, 2022-09-22

In this book Barney Walsh presents an in depth study of China's involvement in East Africa through specific focus on President Museveni of Uganda who has been uniquely influential in utilising China's presence to shape regional security dynamics in his favour. Focussing primarily on the period 2010-2015 Walsh places the spotlight on the Coalition of the Willing formed between Uganda, Kenya and Rwanda who undertook high profile exciting but controversial regional integration projects without Tanzania and Burundi. Key to those efforts were Chinese funded mega infrastructure projects such as the Standard Gauge Railway and Uganda's oil pipeline. Walsh's analysis of the East African Community (EAC) reveals China's role in ongoing security issues related to terrorism resulting from the country's role in small arms and light weapons (SALW) proliferation and the global ivory trade. Additionally China is heavily implicated in the region's oil sector as it is a market for oil involved in developing the sector and a key partner in mega infrastructure construction. Throughout this though the EAC as an institution has been trying to stabilise regional security dynamics and strengthen its institutional role it has been unduly influenced by the personalities and presence of key African leaders. Here Museveni's role in such processes has been crucial as he has made great efforts to utilise Chinese engagement in order to shape regional processes.

Future Office Nicola Gillen, 2019-07-15

The office is dead. Long live the office. Despite decades of predictions that the office is on the verge of extinction it is surviving and thriving. Of course things are changing. And changing fast. Digital technologies are transforming not only the work we do but also the ways our workplaces are designed, built and operated. Automation and AI mean that some jobs will no longer exist whilst others will be created. But the very essence of the workplace, human interaction and collaboration remains as necessary as ever. In fact it is the human focus that is driving this new age with four generations now in the workplace together for the first time. Taking an interdisciplinary approach this book discusses the impacts of these changes on the future of work and workplace. The latest technologies are also explored from voice and digital twins to new materials such as graphene and battery powered buildings.

International Practices to Promote Budget Literacy Harika Masud, Helene Pfeil, Sanjay Agarwal, Alfredo Gonzalez Briseno, 2017-08-09

Budget literacy is defined as the ability to read, decipher and understand public budgets to enable and enhance meaningful citizen participation in the budget process. It is comprised of two main parts: i) a technical understanding of public budgets including familiarity with government spending, tax rates and public debt and ii) the ability to engage in the budget process comprising of practical knowledge on day to day issues as well as an elementary understanding of the economic, social and political implications of budget policies.

the stakeholders involved and when and how to provide inputs during the annual budget cycle Given that no international standards or guidelines have been established for budget literacy education to date this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries The underlying presumption is that when supply side actors in the budget process governments simplify and disseminate budget information for demand side actors citizens this information will then be used by citizens to provide feedback on the budget However since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of budget illiteracy is to provide budget literacy education in schools to youth helping them evolve into civic minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures and the confidence and sense of social responsibility to participate in the oversight of public resources This book elaborates on approaches learning outcomes pedagogical strategies and assessment approaches for budget literacy education and presents lessons that are relevant for the development improvement or scaling up of budget literacy initiatives

American Made Dan DiMicco, 2015-03-03 American manufacturing is on life support at least that s what most people think The exodus of jobs to China and other foreign markets is irreversible and anything that is built here requires specialized skills the average worker couldn t hope to gain Not so says Dan DiMicco chairman and former CEO of Nucor America s largest steel company He not only revived a major US manufacturing firm during a recession but helped galvanize the flagging domestic steel industry when many of his competitors were in

bankruptcy or headed overseas In American Made he takes to task the politicians academics and political pundits who he contends are exacerbating fears and avoiding simple solutions for the sake of nothing more than their own careers and contrasts them with the postwar leaders who rebuilt Europe and Japan put a man on the moon and kept communism at bay We need leaders of such resolve today he argues who can tackle a broken job creation engine by restoring manufacturing to its central role in the U S economy and cease creating fictitious service businesses where jobs evaporate after a year or two as in a Ponzi scheme With his trademark bluntness DiMicco tackles the false promise of green jobs and the hidden costs of outsourcing Along the way he shares the lessons he s learned about good leadership crisis management and the true meaning of innovation and maps the road back to robust economic growth middle class prosperity and American competitiveness
