Critical Issues in Tourism Gareth Shaw, 1994-01-14 Few industries have expanded faster over the last fifty years than tourism Tourism has brought employment to millions frequently in the poor and more remote parts of the world and given pleasure variety rest and recreation to countless numbers of travelers and holiday makers It has at the same time destroyed and polluted pristine environments threatened local cultures and in doing so frequently devalued just those characteristics of a place that had made it a desirable tourist objective The issues that tourism raises are of critical and vital importance throughout the world this book provides a much needed geographical perspective upon them The authors focus on both the production and consumption of tourism and show that it is this interrelationship which holds the key to understanding the ways in which tourism shapes and reshapes human and physical environments They analyze the key features of the tourism and leisure industries and place them in the context of changing social political and economic structures and behavior The argument is accompanied throughout by illustrative case studies drawn from a wide range of countries including both the developed and developing economies

Landscapes of a New Cultural Economy of Space Theano S. Terkenli, Anne-Marie d'Hauteserre, 2006-07-13 Making sense of new cultural economies it is argued needs consistent attention to the resonances of individual lives Otherwise a discussion of cultural economies remains suspended in a detached virtualism Miller 2000 The idea of the remaking of geographies and cultural economies remains necessarily a consistent search to make the subject dynamic in its resonance with the contemporary world In recent debates concerning the reframing of the cultural economies of geography there is an evidence of increasing acknowledgement of the overlooked importance of subjectivities within geographical explanation This has often been difficult when trying to attend to the large

scale apparent dynamics of change The shift of geographies to focus upon cultural economies combines two profound threads that inform this chapter the acknowledgement of the breadth and inclusivity of what economies are and the refusal mutually to isolate the cultural and the economic Thus the economic becomes engaged and even framed in relation to the cultural and vice versa Such an appraisal makes more robust the limits of either or claims from these two grounding components of geographical thinking and its representation of the world These themes are sustained in different ways across the chapters of this book This chapter seeks to build a critical discourse concerning space embodied practice and lay knowledge It does this in order to address the mechanisms through which individuals are engaged in the processes of new cultural economies

Alternative Tourism in Turkey Istvan Egresi, 2016-12-08 This book takes inventory of and evaluates the available resources for the development of alternative tourism in Turkey It examines the role of alternative tourism in future tourism development plans and proposes public policies necessary to assure sustainability Although tourism started later in Turkey than in the Western Mediterranean countries it has grown very rapidly during the last three decades and today the country ranks among the top ten countries in the world in terms of both arrivals and receipts However most of the tourism development has been in the mass tourism sector or the so called sun sea sand tourism While crucial for the economic development of Turkey mass tourism in the absence of proper planning has happened in a haphazard manner leading to numerous environmental and socio cultural problems This book argues that in order to mitigate these problems Turkey should encourage the development of alternative forms of tourism

A Research Agenda for Tourism and Development Richard Sharpley, David Harrison, 2019 Tourism is integral to local regional and national development policies as a major global economic sector it has the potential to underpin economic growth and wider development Yet transformations in both the nature of tourism and the dynamic environment within which it occurs give rise to new questions with regards to its developmental role This Research Agenda offers a state of the art review of the research into the tourism development nexus Exploring issues including governance policy philanthropy poverty reduction and tourism consumption it identifies significant gaps in the literature and proposes new and sometimes provocative avenues for future research
