Critical Thinking Using Primary Sources in U.S. History Wendy S. Wilson, Gerald H. Herman, 2000-08 *Resources in Education*, 2001-04 *Research in Education*, 1972 **The Status of Social Studies** Jeff Passe, Paul G. Fitchett, 2013-10-01 A team of researchers from 35 states across the country developed a survey designed to create a snapshot of social studies teaching and learning in the United States With over 12 000 responses it is the largest survey of social studies teachers in over three decades We asked teachers about their curricular goals their methods of instruction their use of technology and the way they address the needs of English language learners and students with disabilities We gathered demographic data too along with inquiries about the teachers training their professional development experiences and even whether they serve as coaches The enormous data set from this project was analyzed by multiple research teams each with its own chapter This volume would be a valuable resource for any professor doctoral student or Master s student examining the field of social studies education It is hard to imagine a research study topical article or professional development session concerning social studies that would not quote findings from this book about the current status of social studies With chapters on such key issues as the teaching of history how teachers address religion social studies teachers use of technology and how teachers adapt their instruction for students with disabilities or for English language learners the book s content will immediately be relevant and useful **Preserving History** Scott Monroe Waring, 2011-06-01 What and how to teach in the K 16 classroom history has been a perennial and at times heated debate Beginning as early as 1892 the question of what knowledge is of the most worth and what should be the central function of the history curriculum became a focus of many interested in education It was felt that the teachers needed to move away from traditional methods of teaching history such as rote memorization and the dry and lifeless system of instruction by textbook and find new and engaging ways to broaden and cultivate the mind Unfortunately these recommendations faced many critics and did not take hold in K 16 classrooms at this time or frankly at any point since then Even though we tend to have a nostalgic memory of earlier time periods and in turn the educational capabilities of the children from various times in our nation s past the results from multiple studies examining the historical knowledge base of America s youth has remained fairly discouraging Much of the lack of knowledge present stems from the manner in which history is traditionally taught Ineffective instructional methods greatly impact the interest levels or more frequently the distaste generated for learning about historical content and thus the public s corresponding perception of the importance of history within K 16 curricula This book makes an effort at overcoming the persistent boredom and lack of historical knowledge present in our students by focusing on ways in which history instruction can be improved **Military Review**, 1996 Contemporary Curriculum John D. McNeil, 2014-11-17 The Eighth Edition of *Contemporary Curriculum In Thought and Action* prepares readers to participate in the discussion of curriculum control and other matters important to K 12 and university educators The text highlights major philosophies and
