Critical Care Neurology Part I, 2017-01-25 Critical Care Neurology Part I Neurocritical Care focuses on the care specialists and general neurologists that consult in the ICU and their work with patients in acute life threatening situations who are dealing with neurologic or neurosurgical crises emanating from either a preexisting neurologic syndrome or from a new neurologic complication appearing as a result of another medical or surgical critical illness These two separate clinical situations form the pillars of neurocritical care hence these practices are addressed via two separate but closely related HCN volumes Chapters in both focus on pathophysiology and management and are tailored for both general neurologists and active neurocritical specialists with a specific focus on management over diagnostics Part I addresses the principles of neurocritical care and the management of various neurologic diseases Part II addresses the interplay between neurologic complications and the surgical medical cardiac and trauma of critical illnesses that most typically present in the ICU Provides an essential neurocritical care overview for general neurologists Presents neurocritical care specialists with an update on severe neurological illness management Offers coverage of all the most frequent neurologic diseases requiring intensive care Includes chapters authored by global leaders in the field providing the broadest most expert coverage available on the topics discussed

**Thrombolytic Therapy for Acute Stroke** Patrick D. Lyden, 2007-11-08 It often takes time for a new therapeutic modality to mature into an accepted treatment option After initial approval new drugs devices and procedures all go through this process until they become vetted by the scientific community as well as the medical community at large Thrombolysis for treatment of stroke is no exception Thrombolytic Therapy for Acute Stroke Second Edition comes four years after the first edition and provides a very comprehensive updated perspective on the use of intravenous rt TPA in acute stroke The authors provide longer term follow up on the pivotal clinical trials that led to Food and Drug Administration approval data concerning phase 4 trials in larger numbers of patients and most importantly the community experience that has accumulated since its release They add to this the latest promising information concerning intra arterial thrombolysis which is still under investigation and more speculative sections concerning possible new avenues of clinical research such as

combining intravenous thrombolysis with neuroprotective therapies or intra arterial thrombolysis A wealth of factual information is supplemented by chapters containing sage opinion from Drs Lyden and Caplan concerning the logistical economic and procedural issues that have been generated since the advent of this technology Importantly diagnosis does not take a back seat to therapeutics as illustrated by sections devoted to evaluation of the stroke patient very useful illustrative cases and clinical comments and chapters on the latest in imaging as applied to this field     **Management of**
