The second edition includes new essays on the impact of social networking technologies and new media A new section New Digital Media presents important new articles on topics including hacktivism in the age of digital power and the relationship between gaming and capitalism The extraordinary range and depth of the first edition has been maintained in this new edition Critical Digital Studies will continue to provide the leading edge to readers wanting to understand the complex intersection of digital culture and human knowledge Critical **Posthumanism and Planetary Futures** Debashish Banerji, Makarand R. Paranjape, 2016-10-07 This volume is a critical exploration of multiple posthuman possibilities in the 21st century and beyond Due to the global engagement with advanced technology we are witness to a species wise blurring of boundaries at the edge of the human On the one hand we find ourselves in a digital age in which human identity is being transformed through networked technological intervention a large part of our consciousness transferred to smart external devices On the other hand we are assisted or assailed by an unprecedented proliferation of quasi human substitutes and surrogates forming a spectrum of humanoids with fuzzy borders Under these conditions critical posthumanism asks who will occupy and control our planet Will the superhuman merely serve as another sign under which new regimes of dominance are spread across the earth Or can we discover or invent technologies of existence to counter such dominance It is issues such as these which are at the heart of this new volume of explorations of the posthuman The essays in this volume offer leading edge thought on the subject with special emphases on

postmodern and postcolonial futures. They engage with questions of subalternity and feminism vis vis posthumanism dealing with issues of subjugation dispensability and surrogacy as well as the possibilities of resistance ethical politics or subjective transformation from South Asian archives of cultural and spiritual practice This volume is a valuable addition to the on going global dialogues on posthumanism indispensable to those from across several disciplines who are interested in postcolonial and planetary futures The Digital Age and Its Discontents Matteo Stocchetti, 2020-08-11 Three decades into the digital age the promises of emancipation of the digital revolution in education are still unfulfilled Furthermore digitalization seems to generate new and unexpected challenges for example the unwarranted influence of digital monopolies the radicalization of political communication and the facilitation of mass surveillance to name a few This volume is a study of the downsides of digitalization and the re organization of the social world that seems to be associated with it In a critical perspective technological development is not a natural but a social process not autonomous from but very much dependent upon the interplay of forces and institutions in society While influential forces seek to establish the idea that the practices of formal education should conform to technological change here we support the view that education can challenge the capitalist appropriation of digital technology and therefore the nature and direction of change associated with it This volume offers its readers intellectual prerequisites for critical engagement It addresses themes such as Facebook's response to its democratic discontents the pedagogical implications of algorithmic knowledge and quantified self as well as the impact of digitalization on academic profession Finally the book offers some elements to develop a vision of the role of education what should be done in education to address the concerns that new communication technologies seem to pose more risks than opportunities for freedom and democracy *Uncoding the Digital D.* Savat, 2012-11-27 Digital media are having an enormous impact on the world From the seemingly mundane like playing World of Warcraft to posting a message on Twitter or Facebook to the operation of financial markets to transformations in science and the economy digital media continue to revolutionize how people live their daily life This book challenges how we understand our relationship with our digital machines and shows how they open up a new capacity for action in the world A capacity for action that we should no longer simply think of in terms of movement and force but also in terms of flow and viscosity A capacity for action that produces a politics of fluids and finds its expression not only in new forms of social control but also in a renewed ability for people to engage with the world and each The Routledge Companion to Media Studies and Digital Humanities Jentery Sayers, 2018-05-01 Although other media studies and digital humanities are established fields their overlaps have not been examined in depth This comprehensive collection fills that gap giving readers a critical guide to understanding the array of methodologies and projects operating at the intersections of media culture and practice Topics include access praxis social justice design interaction interfaces mediation materiality remediation data memory making programming and hacking **Digital** Identities Rob Cover, 2015-10-06 Online Identities Creating and Communicating the Online Self presents a critical

investigation of the ways in which representations of identities have shifted since the advent of digital communications technologies Critical studies over the past century have pointed to the multifaceted nature of identity with a number of different theories and approaches used to explain how everyday people have a sense of themselves their behaviors desires and representations In the era of interactive digital and networked media and communication identity can be understood as even more complex with digital users arguably playing a more extensive role in fashioning their own self representations online as well as making use of the capacity to co create common and group narratives of identity through interactivity and the proliferation of audio visual user generated content online Makes accessible complex theories of identity from the perspective of today s contemporary digital media environment Examines how digital media has added to the complexity of identity Takes readers through examples of online identity such as in interactive sites and social networking Explores implications of inter cultural access that emerges from globalization and world wide networking Engin Isin, Evelyn Ruppert, 2020-05-27 This book examines how citizens encounter and perform new sorts of rights duties opportunities and challenges through the Internet By disrupting prevailing understandings of citizenship and cyberspace the authors highlight the dynamic relationship between these two concepts This new and updated edition includes a new preface and a new chapterexploring digital citizens of the future Critical Digital Literacies: Boundary-Crossing Practices ,2021-07-05 How would you implement Critical Digital Literacies in your own classrooms and educational programs You will find a valuable resource to answer that question in this volume with a pronounced focus on social justice Seventeen contributors advance the theories and praxis of Critical Digital Literacies Aimed at literacy teacher education and English Education practitioners this volume explores critical practices with digital tools The chapters highlight activities and approaches which cross the boundaries of genre critical data literacy materiality critical self reflection preservice teacher education gender young adult literature multimodal composition assessment gaming podcasting and second language teacher education Authors also explore the challenges of carrying out both the critical and the digital within the context and confines of traditional schooling Contributors are Claire Ahn JuliAnna vila Alexander Bacalja Lourdes Cardozo Gaibisso Edison Castrill n Angel Elena Galdeano Matthew Hall Amber Jensen Elisabeth Johnson Ra l Alberto Mora Luci Pangrazio Ernesto Pe a Amy Piotrowski Amanda Miller Plaizier Holger P tzsch Mary Rice and Anna Smith Electronic Literature in Latin America Claire Taylor, 2019-11-22 This book explores one of the most exciting new developments in the literary field to emerge over recent decades the growing body of work known as electronic literature comprising literary works that take advantage of the capabilities of digital technologies in their enactment Focussing on six leading authors within Latin o America whose works have proved pioneering in the development of these new literary forms the book proposes a three fold approach of aesthetics technologics and ethics as a framework for analyzing digital literature The Critical Surf Studies Reader Dexter Zavalza Hough-Snee, Alexander Sotelo Eastman, 2017-08-17 The evolution of surfing from the first forms of

wave riding in Oceania Africa and the Americas to the inauguration of surfing as a competitive sport at the 2020 Tokyo Olympics traverses the age of empire the rise of globalization and the onset of the digital age taking on new meanings at each juncture As corporations have sought to promote surfing as a lifestyle and leisure enterprise the sport has also narrated its own epic myths that place North America at the center of surf culture and relegate Hawai i and other indigenous surfing cultures to the margins The Critical Surf Studies Reader brings together eighteen interdisciplinary essays that explore surfing s history and development as a practice embedded in complex and sometimes oppositional social political economic and cultural relations Refocusing the history and culture of surfing this volume pays particular attention to reclaiming the roles that women indigenous peoples and people of color have played in surfing Contributors Douglas Booth Peter Brosius Robin Canniford Krista Comer Kevin Dawson Clifton Evers Chris Gibson Dina Gilio Whitaker Dexter Zavalza Hough Snee Scott Laderman Kristin Lawler lisahunter Colleen McGloin Patrick Moser Tara Ruttenberg Cori Schumacher Alexander Sotelo Eastman Glen Thompson Isaiah Helekunihi Walker Andrew Warren Belinda Wheaton Critical Security Studies in the Digital Age Joseph Downing, 2023-01-23 This book demonstrates that the disciplinary boundaries present within international relations approaches to security studies are redundant when examining social media and inter and multi disciplinary analysis is key A key result of the analysis undertaken is that when examining the social media sphere security scholars need to expect the unexpected This is because social media enables users to subvert contest and create security narratives with symbols and idioms of their choice which can take into account traditional security themes but also unexpected and under explored themes such as narratives from the local context of the users towns and cities and the symbolism of football clubs The book also explores the complex topography of social media when considering constructions of security The highly dynamic topography of social media is neither elite dominated and hierarchical as the Copenhagen School conceptualises security speak However neither is it completely flat and egalitarian as suggested by the vernacular security studies non elite approach Rather social media s topography is shifting and dynamic with individuals gaining influence in security debates in unpredictable ways In examining social media this book engages with the emancipatory burden of critical security studies This book argues that it remains unfulfilled on social media and rather presents a thin notion of discursive emancipation where social media does provide the ability for previously excluded voices to participate in security debates even if this does not result in their direct emancipation from power hierarchies and structures offline
