Physics of the Human Temporality Ihor Lubashevsky,Natalie Plavinska,2021-10-21 This book presents a novel account of the human temporal dimension called the human temporality and develops a special mathematical formalism for describing such an object as the human mind One of the characteristic features of the human mind is its temporal extent For objects of physical reality only the present exists which may be conceived as a point like moment in time In the human temporality the past retained in the memory the imaginary future and the present coexist and are closely intertwined and impact one another This book focuses on one of the fragments of the human temporality called the complex present A detailed analysis of the classical and modern concepts has enabled the authors to put forward the idea of the multi component structure of the present For the concept of the complex present the authors proposed a novel account that involves a qualitative description and a special mathematical formalism This formalism takes into account human goal oriented behavior and uncertainty in human perception The present book can be interesting for theoreticians physicists dealing with modeling systems where the human factor plays a crucial role philosophers who are interested in applying philosophical concepts to constructing mathematical models and psychologists whose research is related to modeling mental processes

ECONOMIC PARADOXISM AND MESON ECONOMICS Gheorghe Săvoiu,Vasile Dinu, The structure of the paper brings together three major sections following the general approach to the impact of paradoxes in economic theory The first section describes a necessary investigation in the synthesized universe of paradoxes to capitalize on Quine s paradox taxonomy and to reveal the importance of really paraconsistent paradoxes defining in a relative and innovative manner economic paradoxism in the sense of excess of creative capitalization of paradoxes in the area of science as initiated by mathematician and logician Florentin Smarandache

Adsensory Financialisation Pamela Odih,2016-09-23 Adsensory technology presupposes a neoliberal entrepreneurial self as an integral feature of its biopolitical

financialisation of healthcare regimes According to Michel Foucault neoliberalism is indebted to the endeavour of its self disciplined subjects investing human capital in a self regulated entrepreneurial pursuit of responsible healthcare and well being Primarily informed by social network analytics and virtual ethnographic observations this book identifies the biopolitical basis of adsensory technologies It argues that a paradoxical feature of adsensory technologies dissimulating that there is nothing Jean Baudrillard is the proliferation of risk This is because the dissimulation of nothing opens up the possibility that everything can be a risk in so far as the type of event it falls under can be treated according to the principles of insurance technology Francois Ewald Adsensory wearable technologies are called upon as a strategy of deterrence Jean Baudrillard to indemnify capitalism s production of signs which dissimulate their simulation In a context in which much that was certain now feigns its own existence the insurance professed by adsensory technologies provides for an unrealisable guarantee against indefinable unknowable risks Based also on case studies of European Court of Justice personal finance insurance rulings this book engages critically with the neoliberal construct of the entrepreneurial lifestyle insurance subject Social network analytics are utilised here to map bio technology onto neoliberal regimes of financialised well being and healthcare provision In so doing the book situates adsensory technologies within the marketising healthcare management programmes that are currently aligning the neoliberal reengineering of health and well being citizenship with the biopolitical healthcare financialisation of populations Paradoxically in their endeavour to actor network virtual well being health communities adsensory technologies proliferate the individuating marketised conditions of neoliberal self regulating entrepreneurialism This gives rise to aleatory materialist dialectics of financialised surveillance far exceeding the regulatory time and space modalities of Foucauldian panoptics and Mathiesen synoptics Adsensory technologies are integral to a seismic transformation in the cultural economies of time presently eliding digital advertising and insurantial technologies Axiomatic with the synchronic times of the adsensory technologies valorised by lifestyle insurance much riskier asynchronic embodied times transgressively dissimulating the limits of financialisation are beginning to emerge

practical achievements Complexity in Economic and Social Systems Stanisław Drożdż, Jarosław Kwapien, Paweł Oświecimka, 2021-05-11 There is no term that better describes the essential features of human society than complexity On various levels from the decision making processes of individuals through to the interactions between individuals leading to the spontaneous formation of groups and social hierarchies up to the collective herding processes that reshape whole societies all these features share the property of irreducibility i e they require a holistic multi level approach formed by researchers from different disciplines This Special Issue aims to collect research studies that by exploiting the latest advances in physics economics complex networks and data science make a step towards understanding these economic and social systems The majority of submissions are devoted to financial market analysis and modeling including the stock and cryptocurrency markets in the COVID 19 pandemic systemic risk quantification and control wealth condensation the innovation related performance of companies and more Looking more at societies there are papers that deal with regional development land speculation and the fake news fighting strategies the issues which are of central interest in contemporary society On top of this one of the contributions proposes a new improved complexity measure **Adsensory Urban Ecology (Volume Two)** Pamela Odih, 2019-03-14 Adsensory sign technology which depicts the human body as both object and subject of inscriptive advertising technologies is integral to a western capitalist insurantal financialisation of health and wellbeing Developing further the theme of adsensory technologies of the sign in conjunction with Daniel Bell s theory of the codification of knowledge as an axial feature of the structuring of post industrial society this book explores gentrification in heterotopic post industrial urban spaces It brings together case studies from the City of Bath s decommissioned Bath Press print works London s Trafalgar Square busking community and its dialectics of audio sensory gentrification and London s Brick Lane and its gentrification of street art These studies illustrate empirically the extent to which advertising adsensory technologies have become integral to the gentrification of post industrial urban spaces Several of the case studies engage critically with the empirical observation that in the post industrial urban ecology of inner city regeneration adsensory technologies extend avariciously into the infrastructure of neoliberal managerialist gentrification In addition the book explores the forms of capital accumulation which are emerging from the integration of adsensory technology into the gentrification of post industrial urban spaces and examines a new form of capital accumulation in inner city gentrification predicated on the degenerative integrity of adsensory financialisation *Methods and Finance* Emiliano Ippoliti, Ping Chen, 2016-12-23 The book offers an interdisciplinary perspective on finance with a special focus on stock markets It presents new methodologies for analyzing stock markets behavior and discusses theories and methods of finance from different angles such as the mathematical physical and philosophical ones The book which aims at philosophers and economists alike represents a rare yet important attempt to unify the externalist with the internalist conceptions of finance **Econophysics and Sociophysics: Recent Progress and Future Directions** Frédéric Abergel, Hideaki Aoyama, Bikas K. Chakrabarti, Anirban

Chakraborti, Nivedita Deo, Dhruv Raina, Irena Vodenska, 2017-01-11 This book presents the proceedings from ECONOPHYS 2015 an international workshop held in New Delhi India on the interrelated fields of econophysics and sociophysics which have emerged from the application of statistical physics to economics and sociology Leading researchers from varied communities including economists sociologists financial analysts mathematicians physicists statisticians and others report on their recent work discuss topical issues and review the relevant contemporary literature A society can be described as a group of people who inhabit the same geographical or social territory and are mutually involved through their shared participation in different aspects of life It is possible to observe and characterize average behaviors of members of a society an example being voting behavior Moreover the dynamic nature of interaction within any economic sector comprising numerous cooperatively interacting agents has many features in common with the interacting systems of statistical physics It is on these bases that interest has grown in the application within sociology and economics of the tools of statistical mechanics This book will be of value for all with an interest in this flourishing field
