Juvenile Delinquency in a Diverse Society Kristin A. Bates, Richelle S. Swan, 2020-01-21 *Juvenile Delinquency in a Diverse Society* Third Edition presents students with a fresh intersectional examination of juvenile delinquency in the context of real communities and social policies integrating many social factors that shape juvenile delinquency and its control including race ethnicity class gender and sexuality Authors Kristin A Bates and Richelle S Swan use true stories and contemporary examples to link theories of delinquency not just to current public policies but to existing community programs encouraging readers to consider how theories of delinquency can be used to create new policies and programs in their own communities Readers will gain a foundational understanding of the social diversity that contextualizes varying experiences and behavior of juvenile delinquency as well as a deeper appreciation for the policies social justice and community programs that make up the juvenile system

Key Determinants of Biodiversity, Ecosystem Functioning and Restoration in Climate Change Sensitive Ecosystems Hui Zhang, Xiang Liu, Robert John, 2023-11-27 Human activities such as agriculture and mining have led to serious negative effects on biodiversity and important ecosystem services including biodiversity loss and climate change Thus it is important to quantify the key determinants of biodiversity ecosystem functioning and ecological restoration of degraded plant communities in climate change sensitive ecosystems i.e. subalpine and alpine meadow communities in Qinghai tropical rainforests and tropical mountains In this way effective management policy and methods can be developed to reduce the influence of climate change on these climate change sensitive ecosystems The aforementioned human activities continue to destroy and degrade plant communities and ecosystem functioning Climatic changes further exacerbate negative impacts and may trigger rapid loss of species precipitate decline and changes in the flows of ecosystem goods and services As the collective anthropogenic influence intensifies some ecosystems may be more sensitive than others to these changes Ecosystems that contribute greatly to human well being through the delivery of biodiversity and ecosystem benefits should be the focus of particular concern There are key knowledge gaps on the specific nature of anthropogenic impacts species and ecosystem responses and possible management and mitigation measures Comprehensive documentation of these aspects

from highly sensitive regions and ecosystems is urgently needed particularly at fine scales which is relevant for developing management and mitigation measures Pathways such as ecological restoration can offset some of the impacts but even quantifying the impacts of observed and anticipated changes is far from adequate and other mitigation measures must be considered
