Therapeutic interventions such as Eye Movement Desensitisation and Reprocessing (EMDR) and dialectical behaviour therapy are discussed, as are relapse prevention and the specific needs of groups such as older people and young adults. Associated topics such as individuals within the criminal justice system and brain injury, the symptoms of which often mimic mental health substance use, complete this highly comprehensive guide. The volumes in this series are designed to challenge concepts and stimulate debate, exploring all aspects of the development in treatment, intervention and care response, and the adoption of research-led best practice. They are essential reading for mental health and substance use professionals, students and educators.
