James Popham, 2009-05-26 High stakes testing Mandated content standards and benchmarks Public scrutiny of student and school performance Accountability Teachers today are challenged to provide instruction that will measure up to the expectations of administrators parents and taxpayers to their own professional standards and most essentially to the needs of students Policy debates rage in the press and pedagogical pundits always have a new and better solution to offer but inside the walls of the classroom instruction boils down to teachers deciding what they want their students to learn planning how to promote that learning implementing those plans and then determining if the plans worked And the best instructional decisions are informed by empirical research assessment evidence and the sound judgment of the professional educator In this book W James Popham calls on his half century in the classroom to provide a practical four stage framework for guiding teachers through their most important instructional decisions curriculum determination instructional design instructional monitoring and instructional evaluation Along the way he emphasizes the critical ways in which assessment can and should influence instruction advocates for a dash of curricular insurrection and offers advice for maintaining both teaching excellence and teachers sanity Necessary Conditions Geoff Krall, 2023-10-10 During his years working as an instructional coach for a national network of schools Geoff Krall had the chance to witness several inspirational moments when math class comes alive for middle or high school students when it is challenging but also fun creative and interactive In *Necessary Conditions Teaching Secondary Math with Academic Safety Quality Tasks and Effective Facilitation* Krall documents the essential ingredients that produce these sorts of moments on a regular basis and for all students They are Academic Safety Quality Tasks and Effective Facilitation Academic Safety Krall implements equitable classroom experiences that help fight stigmas associated with race and gender in schools This allows students to feel socially and emotionally secure while nurturing their identities as mathematicians and increasing engagement during classroom discussions Quality Tasks Teachers can adapt or

create dynamic student centered lessons that break down math into small manageable sections removing the frustrations felt by students who aren't considered math people Effective Facilitation This book shows how to incorporate teaching moves and math routines designed for engagement persistence and interactivity Teachers can allow students to explore safely while maintaining consistent classroom expectations My work as a math instructional coach for a network of schools has afforded me the unique opportunity to visit exceptional teachers across the country documenting their tasks teaching moves and academically safe learning environments You'll experience dispatches from these effective classrooms in which we'll observe how teachers attend to all three elements that make up the ecosystem Geoff Krall from his book Necessary Conditions
