Science, Soul, and the Spirit of Nature Irene van Lippe-Biesterfeld,2005-09-30 Irene van Lippe Biesterfeld interviews 12 respected visionary thinkers about their deep connection with the earth and their views on the relationship between humanity and nature Each contributor adds insights into the urgent change in consciousness that we must adopt in order to heal and restore our holistic relationship with the earth

Dreamed Up Reality Bernardo Kastrup,2011-06-16 A strong and growing intuition in society today is the idea that our thoughts create our own reality Yet it seems obvious that try as we might our lives are not quite what we fantasize Is the intuition thus wrong Through a rational methodic interpretation of meditative insights the validity of which is substantiated with a compelling scientific literature review the author constructs hypotheses that reconcile facts with intuition

Mesmerizing narratives of his expeditions into the unconscious suggest an amazing possibility just as dreams are seemingly autonomous manifestations of our psyche reality may be an externalized combination of the subconscious dreams of us all mixed as they are projected onto the fabric of space time Perhaps the laws of physics are an emergent by product of such synchronization of thoughts Through computer simulations the author explores the implications of these hypotheses with conclusions uncannily reminiscent of observed phenomena

Science Set Free Rupert Sheldrake,2013-09-03 The bestselling author of *Dogs That Know When Their Owners Are Coming Home* offers an intriguing new assessment of modern day science that will radically change the way we view what is possible In *Science Set Free* originally published to acclaim in the UK as *The Science Delusion* Dr Rupert Sheldrake one of the world s most innovative scientists shows the ways in which science is being constricted by assumptions that have over the years hardened into dogmas Such dogmas are not only limiting but dangerous for the future of humanity According to these principles all of reality is material or physical the world is a machine made up of inanimate matter nature is purposeless consciousness is nothing but the physical activity of the brain free will is an illusion God exists only as an idea in human minds imprisoned within our skulls But should science be a belief system or a method of enquiry Sheldrake shows that the materialist ideology is moribund under its sway increasingly expensive research is reaping diminishing returns while societies around the world are paying the price In the skeptical spirit of true science Sheldrake turns the ten fundamental dogmas of materialism into exciting questions and shows how all of them open up startling new possibilities for discovery *Science Set Free* will radically change your view of what is real and what is possible

The Bloomsbury Handbook of World Theory Jeffrey R. Di Leo,Christian Moraru,2021-11-18 Disciplines from literary studies to environmentalism have recently undergone a spectacular reorientation that has refocused entire fields methodologies and vocabularies on the world and its sister terms such as globe planet and earth The Bloomsbury Handbook of World Theory examines what world means and what it accomplishes in different zones of academic study The contributors raise questions such as What happens when world is appended to a particular form of humanistic or scientific inquiry How

exactly does worlding bear on the theoretical operating system and the history of that field What is the theory or theoretical model that allows world to function in a meaningful way in coordination with that knowledge domain With contributions from 38 leading theorists from a vast range of fields including queer studies religion and pop culture this is the first large reference work to consider the profound effect both within and outside the academy of the worlding of discourse in the 21st century

[A Psychonaut's Guide to the Invisible Landscape](#) Dan Carpenter, 2006-02-14 A bold cartography of the inner landscape visible only to those experiencing altered states Presents the psychedelic experience as an objective landscape that embodies the Other rather than a subjective state of mind Provides corroboration of phenomena encountered by those who venture into this domain Journeying into the invisible world revealed by his use of the dissociative psychedelic DXM dextromethorphan Dan Carpenter found that what he experienced was not simply subjective sensations and psychological

states but an objective world of familiar if inordinately odd landmarks and characters The running diary he kept of these voyages recounts impressions of a landscape charted by other travelers into this Inner Space and includes descriptions of many of the same phenomena recorded by such mind travelers as Terence and Dennis McKenna Alexander and Ann Shulgin and others who have experienced the hive mind the pool of all consciousness Into this territory where expression is like chaos theory where oddly symmetrical order manifests out of the seemingly anarchic swirl of images and events the author ventures with the mind set of a naturalist accepting whatever might be rather than what he hopes he might find What emerges is not a location crafted by subjective experience but a landscape that embodies the Other and that represents a conscious state in which the barriers between the self and the not self dissolve

The Presence of the Past Rupert Sheldrake, 2011-07-01 Rupert Sheldrake's theory of morphic resonance challenges the fundamental assumptions of modern science A world famous biologist Sheldrake proposes that all self organizing systems from crystals to human societies inherit a collective memory that influences their form and behaviour Rather than being ruled by fixed laws nature is essentially habitual All human beings draw upon a collective human memory and in turn contribute to it Even individual memory depends on morphic resonance rather than on physical memory traces stored within the brain Morphic resonance works through morphic fields which organize the bodies of plants and animals coordinate the activities of brains and underlie mental activity Minds are extended beyond brains both in space and time This fully revised and updated edition of The Presence of the Past summarizes the evidence for Dr Sheldrake's controversial theory reviews new research and explores its implications for biology chemistry physics psychology and sociology In place of the mechanistic worldview that has dominated biology since the nineteenth century this book offers a revolutionary alternative and opens up a new understanding of life minds and evolution

Art Is a Spiritual Path Pat B. Allen, 2005-08-09 Art is a spiritual path not a religion but a practice that helps us knit together the ideals and convictions that guide our lives Creating art can be prayer ritual and remembrance of the Divine And the sharing of this creativity with others in small groups can serve as sanctuary asylum ashram therapy group think tank and village square Pat Allen has developed a reliable guide for walking the path of art through a series of simple practices that combine drawing painting and sculpture with journal writing Designed for readers at any level of artistic experience the book shows how to awaken the creative force and connect with the divine source of creativity access inner wisdom and intuition about life issues including both personal and community concerns find a path to meaning that includes honoring celebrating and giving thanks explore the images and symbols of traditions such as Catholicism Judaism shamanism and Goddess worship join in spiritual community with others who are following the path of art discover that artmaking can help us live our ideals and be of service in the world Detailed examples from the author's own practice of art plus the stories and images of several other people are presented to illustrate how art becomes a spiritual path in action At the author's virtual studio www.patballen.com readers can post their images and writings communicate
