My Aviation Journey Gerard Mofet,2023-01-30 After graduating from flight college with a Commercial Pilot Licence in 1999 and with only 250 in his wallet a suitcase a typewriter his flight bag and an abundance of grit Gerard Mofet dove head first into the highly competitive world of aviation He learned quickly that fulfilling his childhood dream of becoming the captain of a major airline would require skill perseverance sacrifice courage and a can do spirit In *My Aviation Journey* Gerard shares his personal story and the challenges and experiences he faced both the exhilarating and adverse during his past twenty five years of flying Not just a remarkable success story *My Aviation Journey* is also a road map to help prepare future pilots on where to start learning to fly how to find that first job how to prepare for all the evaluations and testing pilots must go through and how to advance in this career Get ready to feel inspired Moody's Transportation Manual ,1998

Human Factors Guidelines for Safety Audits Manual International Civil Aviation Organization,2002 Beyond Aviation Human Factors Daniel E. Maurino,James Reason,Neil Johnston,Rob B. Lee,2017-03-02 The authors believe that a systematic organizational approach to aviation safety must replace the piecemeal approaches largely favoured in the past but this change needs to be preceded by information to explain why a new approach is necessary Accident records show a flattening of the safety curve since the early Seventies instead of new kinds of accident similar safety deficiencies have become recurrent features in accident reports This suggests the need to review traditional accident prevention strategies focused almost exclusively on the action or inaction s of front line operational personnel The organizational model proposed by the authors is one alternative means to pursue safety and prevention strategies in contemporary aviation it is also applicable to other production systems The model argues for a broadened approach which considers the influence of all organizations the blunt end involved in aviation operations in addition to individual human performance the sharp end If the concepts of systems safety and organizational accidents are to be advanced aviation management at all levels must be aware of them This book is intended to provide a bridge from the academic knowledge gained from research to the needs of practitioners in aviation It comprises six chapters the fundamentals background and justification for an organizational accident causation model to the flight deck maintenance and air traffic control environments The last chapter suggest different ways to apply the model as a prevention tool which furthermore enhances organizational effectiveness The value of the organizational framework pioneered by Professor Reason in analyzing safety in high technology production systems is felt by his co authors
