EC Law Aspects of Hybrid Entities Gijsbert Karel Fibbe, 2009 This study discusses the impact of the EC Treaty on the recognition of entities in the internal market The EC Treaty envisages the internal market as an area without internal frontiers in which the free movement of goods persons services and capital is ensured in accordance with the provisions of the EC Treaty One of the key questions discussed in this study is how this rationale reflects the relation between tax laws of Member States and specifically the relation between the application of autonomous classification methods by Member States and the free allocation of economic resources in the internal market This study also contains an examination of how the different approaches to hybrid entities in tax treaties interfere with EC law This part of the study contains an analysis of how the interrelation between domestic tax laws and the approach to classification conflicts under existing bilateral tax treaties relates to EC law
