Facing Hazards And Disasters Understanding Human Dimensions:

Facing Hazards and Disasters National Research Council, Division on Earth and Life Studies, Committee on Disaster Research in the Social Sciences: Future Challenges and Opportunities, 2006-08-10 Social science research conducted since the late 1970s has contributed greatly to society's ability to mitigate and adapt to natural technological and willful disasters. However, as evidenced by Hurricane Katrina, the Indian Ocean tsunami, the September 11, 2001 terrorist attacks on the United States, and other recent events, hazards and disaster research and its application could be improved greatly. In particular, more studies should be pursued that compare how the characteristics of different types of events, including predictability, forewarning, magnitude, and duration of impact, affect societal vulnerability and response. This book includes more than thirty recommendations for the hazards and disaster community.

Coastal Heritage and Cultural Resilience Lisa L. Price, Nemer E. Narchi, 2018-11-24 This book explores the knowledge, work, and life of Pacific coastal populations from the Pacific Northwest to Panama. Center stage in this volume is the knowledge people acquire on coastal and marine ecosystems. Material and aesthetic benefits from interacting with the environment contribute to the ongoing building of coastal cultures. The contributors are particularly interested in how local knowledge, either recently generated or transmitted along generations, interfaces with science, conservation policy, and artistic expression. Their observations exhibit a wide array of outcomes, ranging from resource and human exploitation to the magnification of cultural resilience and coastal heritage. The interdisciplinary nature of ethnobiology allows the chapter authors to have a broad range of freedom when examining their subject matter. They build a multifaceted understanding of coastal heritage through the different lenses offered by the humanities, social sciences, oceanography, fisheries, and conservation science, and not surprisingly, the arts. Coastal Heritage and Cultural Resilience establishes an intimate bond between coastal communities and the audience in a time when resilience of coastal life needs to be celebrated and fortified.

Case Studies in Disaster Recovery, 2022-12-02 Case Studies in Disaster Recovery, the initial release in the Disaster and Emergency Management Case Studies in Adaptation and Innovation series, explores recovery from a number of perspectives: household, community, and nation. Chapters cover the concept of social vulnerability to explain, predict, recovery outcomes, consider broader themes of sustainability, assess community vulnerability and capacity, and explore the challenges associated with long-term recovery and disaster case management. Cases explored illustrate the ways in which communities and governments used the window of opportunity after a disaster to make changes that reduce future risk and vulnerability. Included cases illustrate the diversity of change realized in communities following disasters. Presents in-depth case studies in disaster recovery, a phase of disaster management. Unites practice and research from multiple disciplines to highlight the complexity of disasters mitigation, including environmental and earth sciences.
