[Machine Gun](#) Martin Pegler, 2013-05-20 The world's first self powered machine gun the Maxim gun became a potent symbol of Victorian colonialism in the closing years of the 19th century It was the brainchild of Sir Hiram Maxim the American born firearms inventor who founded the company bearing his name with financing from Albert Vickers who became the company's

chairman Maxim's company was absorbed by Vickers Sons and Company in 1897. Subsequent variants in British, German and Russian service: the 303in Vickers 1912 7.92mm MG 08 1908 and 7.62mm PM M1910 respectively dominated both the Eastern and Western Fronts during World War I and soldiered on into World War II while the Vickers remained in front line British service essentially unchanged until 1968. The M60 Machine Gun Kevin Dockery, 2012-11-20. The US M60 General Purpose Machine Gun, known as the Pig, was developed in the years after World War II from two revolutionary German designs. Adopted in 1957, the M60 came into its own in the jungles, hamlets and city streets of Southeast Asia during the Vietnam War. Humping the Pig became common in US military squads, with at least one soldier equipped with an M60 and every squad member carrying ammunition for it. The M60 design transformed infantry tactics as squads took advantage of the immediate volume of fire offered by the design. Although it has now been replaced by the M240 series of weapons in US infantry and mechanized units, the M60 is still in common use with the US armed forces. Meanwhile, its iconic status has been assured by its frequent appearance in many popular films and television shows, from *Full Metal Jacket* to *The A Team*. Featuring specially commissioned full color artwork, this is the full story of the M60, the innovative squad base of fire weapon that has equipped the US military from the jungles of Vietnam to the deserts of Iraq.

US Marine Corps Raider 1942-43 Ed Gilbert, 2012-04-20. The US Marine Raider was an elite within an elite. Modeled on British Commandos, they were the earliest forerunners of the various special operations units of the modern US military. These units would conduct operations with only the equipment they could carry on their backs; their heaviest weapons were light mortars and light machine guns. Highly trained in close in fighting, the Raiders were expected to be equally skilled in watercraft, jungle survival and jungle warfare. This book details the Raiders' experiences through some of the toughest raining ever to be experienced by a Marine and onto combat during the Makin Raid and through the horrific jungle battles of the Solomon Islands.

MG 34 and MG 42 Machine Guns Chris McNab, 2012-10-20. With the MG 34, the German Wehrmacht introduced an entirely new concept in automatic firepower: the general purpose machine gun (GPMG). In itself, the MG 34 was an excellent weapon: an air-cooled, recoil-operated machine gun that could deliver killing firepower at ranges of more than 1,000m. Yet simply by changing its mount and feed mechanism, the operator could radically transform its function. On its standard bipod, it was a light machine gun ideal for infantry assaults; on a tripod, it could serve as a sustained fire medium machine gun. During World War II, the MG 34 was superseded by a new GPMG, the MG 42. More efficient to manufacture and more robust, it had a blistering 1,200rpm rate of fire. Nicknamed Hitler's buzzsaw by Allied troops, it was arguably the finest all-round GPMG ever produced and, alongside the MG 34, it inflicted heavy casualties. Featuring specially commissioned full colour artwork and drawing upon numerous technical manuals and first hand accounts, this study explores the technological

development varied roles and lasting influence of the revolutionary MG 34 and MG 42 machine guns and their postwar successors
