This book reports on the outcomes of an international policy research project concerned with how power is being used in education to construct and discharge obligations between stakeholders and to suggest how such processes might better serve educational ends *Citizenship Education in the Era of Globalization*, 2008-01-01 This collection of timely articles is the first to explore the dynamics between globalization and education from a specifically Canadian perspective The articles engage with emergent debates and new discourses around global orientations to citizenship education currently defining scholarly work and teaching practices in Canada This book will therefore be of great interest to Canadian teacher educators who are seeking to infuse a global perspective into their pre service programs as well as to globally oriented undergraduate and graduate course instructors from a range of scholarly disciplines both in Canada and elsewhere The Canadian perspective proves to be not surprisingly global in essence The articles contained in *Citizenship Education in the Era of Globalization* Canadian Perspectives map the history of citizenship education and global studies and probe the notion of global citizenship for its possibilities and impossibilities Recognizing the importance of engaging with the lives of students and teachers the contributions also include articles reporting on research and theory about such topics as the complexities of second generation youth identity and the extent to which mainstream teachers can bring global citizenship education into their classrooms The collection presents an engaging look into the theory and practice of citizenship education in Canada during a time when bringing global issues to the classroom is an imperative of democratic schooling Brave New Teachers Rovell Patrick Solomon, 2011 *Brave New Teachers* is a timely investigation of democratic teacher practice in culturally diverse school systems Based on an original study of the Urban Diversity Teacher Education Program at York University it investigates the extent to which graduates of a teacher education program grounded in the democratic principles of equity diversity and social justice can hold true to these principles in a climate of conservative school culture and state mandated educational reform that focuses on standardization and accountability The result is a critical Canadian perspective on both the challenges and the possibilities of working for social justice in the classroom **Alberta Journal of Educational Research**, 2003 **How School Leaders Contribute to Student Success** Kenneth Leithwood, Jingping Sun, Katina Pollock, 2017-03-15 While considerable evidence indicates that school leaders are able to make important contributions to the success of their students much less is known about how such contributions are made This book provides a comprehensive account of research aimed at filling this gap in our knowledge along with guidelines about how school leaders might use this knowledge for their own school improvement work Leadership practices known to be effective for improving student success are outlined in the first section of the book while the remaining sections identify four paths along which the influence of those practices flow to exercise an influence on student success Each of the Rational Emotional Organizational and Family paths are populated by conditions or variables known to have relatively direct effects on student success and also open to influence by effective leadership practices While the Four Path framework narrows the attention of

school leaders to a still considerable number conditions known to contribute to student success it leaves school leaders the autonomy to select for improvement efforts the sub set of conditions that make the most sense in their own local circumstances The approach to leadership described in this book provides evidence based guidance on what to lead and flexibility on how to lead for purposes of improving student learning *Critical Approaches Toward a Cosmopolitan Education* Sandra R. Schecter, Carl E. James, 2021-08-29 This book aims to reconceptualize teaching and learning in spaces with diverse populations of young people Chapters focus on the schooling experiences and social and cultural adaptation issues of individuals who through the meaning that they assign to their lived experiences ascribe to multiple identity qualifiers Contributors explore the impact of this cosmopolitan awareness on students educators and educational institutions presenting issues such as curricular concerns around civic engagement individual subjectivity versus social identity and the convergence of context specific policy and teaching environments on global dynamics in education reform An emphasis on this understanding promises to better equip educators and policy makers to plan instructional approaches and devise pedagogic resources that serve the needs and career aspirations of an expanding cohort of multifaceted learners **Eqao Test Ready Math and Language 6** Janis Barr, 2020 *EQAO 6 Cards* Nelson Education Nelson Education, 2017-02-24
