Katsap, Fredrick L. Silverman, 2015-12-17 Ethnomathematics of Negev Bedouins Existence in Forms Symbols and Geometric Patterns provokes a journey into the world of Negev Bedouins and attests to the beauty and sophistication of mathematics that occurs naturally in their craftwork structures games and throughout Bedouin life The major focus is Bedouin women s traditional craftwork by which they reflect social and cultural activities in their weaving embroidery and similar pursuits Their creations reveal mathematical ideas incorporated in embroidery compositions in repeated patterns of flowers and geometric figures in varying scales The women use ground staked looms stabilized by block stones to make multi color repeating pattern strip rugs in a process practiced for generations An image of this appears in the book s cover photo collage Bedouin men construct dwellings tents desert wells and such They and their children play games attuned to sand and other specific desert conditions These activities of Bedouin women men and children require mathematical thinking and strategic reasoning to achieve desired outcomes The book opens with a narrative of Bedouin history followed by a brief overview of ethnomathematics and concludes with discussion about bridging the gap between school mathematics experiences and those outside school It considers mathematically problematic situations embedded in Bedouin sociocultural heritage likely to appeal to teachers for use with school students The book is intended for a diverse audience from Bedouin communities in different countries to the general public and professionals including ethnomathematicians and mathematics educators Numerous photographs document the examples of Bedouin ethnomathematics They are the subject of considerable analysis and appear throughout the book

[M.C. Escher's Legacy](#) Michele Emmer,Doris Schattschneider,2007-05-08 From the reviews of the hardcover edition This conference to celebrate the centennial of the birth of Escher resulted in an immensely interesting collection of articles Although Escher himself is no longer among us M C Escher's Legacy like a garden of continually blooming flowers allows us to appreciate his heritage anew Notices of the AMS April 2003 It is a handsome volume and contains articles from 41 people which cover a wide range of artistic and analytical endeavour A quick dip into each section produces small gems there is enough here to provide rich pickings for any interested party no matter what their particular discipline is Embedded in the various articles are even snippets which illuminate Escher's intentions and his relationships with his mathematician friends Even though short these are rewarding to read the CD ROM is an excellent addition to the book and contains much more material including video excerpts from some of the lectures Australian Math Soc GAZETTE May 2003

M.C. Escher's Legacy Doris Schattschneider,2003 The CD ROM is an extension of the book It contains color versions of many of the art works that are shown in the book in black and white as well as additional work by the artists It gives vignettes of the conference animations short videos and interactive puzzles Page vii
