**Weight Loss Fitness Tracker Planner Journal** Kristy Jenkins, 2021-08-24 When you measure something you tend to pay attention to it When you record something write something down in a journal or notebook or otherwise monitor the progress of anything you do you increase your level of control over it This not only shows you how far you have to go to achieve a particular goal or set of results it also reinforces sticking to a regular schedule You are naturally more inclined to adhere to a regular workout schedule when you keep an exercise journal A written out budget has been proven to lead to more financial security and savings than handling your finances without a written plan and record Any plan of action you undertake has a better chance of delivering the results you re looking for when you routinely record your efforts and progress This is why journaling your whole foods weight loss journey can dramatically improve your results Your Brain Is Begging You to Journal Did you know that the human brain is hardwired for keeping records It s true The human mind craves order and repetition It especially likes it when you do the same thing at the same time on a regular schedule This improves the success rate of everything you undertake because of the difference between the processing power of your conscious and subconscious minds However if one takes up the practice after a short period of time conscious habits are directed to the unconscious part of your brain You do something enough over and over on a given routine or schedule and your conscious brain sends the task to your subconscious Your consciousness has noticed that this is something that doesn t need to be focused on You have done it again and again regularly and repetitively so your brain instantly realizes no conscious effort or focus is needed Since the conscious part of your mind cannot handle too much information at once it is more than happy to give the task over to the incredible processing power of your subconscious By weight loss fitness journaling on a regular schedule your conscious behaviors eventually become unconscious That means your subconscious brain automatically prepares your body and mind for whatever your journaling requires the next time a regularly scheduled food journal session arises How Tracking Progress Makes It Easier Now comes the exciting part You plan to start keeping a weight loss fitness journal that focuses on eating whole foods and maintaining fitness exercises for weight loss You want to eat more healthier foods while cutting back on the types of foods and beverages that are not that good for you You plan on sticking to a diet

accompanied with a fitness exercise routine for at least 30 days You have this journal and start tracking and monitor s how it affects you When your desire is to lose weight you will begin to notice food consumption and exercise patterns where your routine behavior either causes your body weight to rise or fall With your conscious effort on losing weight your focus will tend towards what eating behaviors and your physical training schedule at different timing and types of clean whole foods and different exercise routine schedule results and lead you in that direction and away from weight gain So you begin reschedule your tracked exercise program and eating concisely based on your tracker performance You journal your results and you begin to notice your weight loss progression increasing and doing the right exercise with a proven track measurement

**Money Loves Clarity -Money Mindset Planner Journal** Hillary Scholl,2021-07-27 Money Loves Clarity Is Having a Money Mindset Necessary to Make Money There are many ways people can make money The question is why do you even need a money mindset if making money is easy While the dynamics of making money may be easy if you are not taking the right steps you won t be making enough for it to be worthwhile You not

only want to optimize your money making abilities but you also want to keep the money that you do make Further you want to make it grow in the fastest possible manner and by the most amount For this you certainly want to consider taking on a money mindset You need to focus your efforts on opportunities that will give you the highest return Most people aren't taught how to do this They learn it by trial and error Which means they will likely do the wrong things that will cost them a lot of money That money took a long time to make As people age they have less time to recoup the losses It's also tougher to get jobs when you get older Learning about the right approaches to money management can counter all of these problems You can try trending passive income techniques to earn money for yourself but like everybody you will want to invest your money and get them earning more for you instead Changing Your Financial Outlook with the Proper Money Mindset If you look at the profiles of wealthy people you will find they have a different mindset than others They know the value of money and they know the fundamental factors of how to make their money grow If you are not yet wealthy and feel you are struggling take some tips from these wealthy people If your money grows on its own and the money that you earn ends up growing as well it's only a matter of time when this amounts to a decent sum of money And if you keep adding to the balance that money will also grow along with it The situation is a bit more complicated today with government taxing the growth of money But you can invest in an IRA or 401K and have that tax deferred until some future period Stay out of debt as much as possible The debt will drain your savings and your portfolio There can be smart uses of debt as long as the result of using that debt brings in more money than the debt itself But most debt should be avoided to keep your financial outlook stable
