PREFACE

The bulk of this volume contains an English translation of Karl Marx's main philosophical works, published for the first time in the United States.¹ Obviously, this publication is of importance, if for no other reason than that it will acquaint the American public with one of the major works of post-Hegelian philosophy, hitherto unknown in the English-speaking world. Marx's philosophy, like much of nineteenth-century thinking, represents a protest against man's alienation, his loss of himself and his transformation into a thing. It is a movement against the dehumanization and atomization of man inherent in the development of Western industrialism. It is radically critical of all "systems" to the problem of human existence which try to present solutions by forgetting or concealing the alienation inherent in such systems. Marx's philosophy is rooted in the humanist Western philosophical tradition, which reaches from Aristotle through the French and German enlightenment philosophers of the eighteenth century to Kant and Hegel, and the very essence of which is conscious for man and the realization of his potentialities.

For Marx's philosophy, which has found its most articulate expression in the Economic and Philosophical Manuscripts, the central issue is that of the existence of the real individual man, who is alien to himself, and whose "nature" is hidden and reveals itself in history. But in contrast to Hegel and others, Marx sees man in life.

Marx's Concept of Man Erich Fromm, Karl Marx, 1961 **Erich Fromm's Concept of Man** René Boivin, 1968 *Marx's Concept of Man* Erich Fromm, 1966 *That They be One* Michael Joseph Schuck, 1991

The social teaching of the Roman Catholic Church has aroused public interest in recent years with the increased involvement of North American bishops in matters of civic morality with the growth of liberation theology in Central and South America and with the ongoing political and economic statements of Pope John Paul II. A vital ingredient of Roman Catholic social teaching is the papal encyclical literature. Debate grows however over exactly what the papal letters teach. Noteworthy encyclical commentaries exist but none has attempted a comprehensive historical analysis of the complete content and overall coherence of Roman Catholic encyclical social teaching. This book appearing in advance of the 1991 centennial of *Rerum novarum* provides the kind of analysis that concerned Roman Catholics, public officials, social ethicists, theologians and students are looking for: a textually inclusive and topically broad gauged study of Catholic social teaching in its historical development with a forthright assessment of the teaching's contradictions and consistencies.

Democracy and Its Enemies Paul N. Goldstone, 2018-10-15

America it is often argued emerged from the Enlightenment. It follows that the prevailing elements of politics in the United States are echoes of struggles among what is here referred to as the moderate Enlightenment, the conservative Enlightenment and the radical Enlightenment. These lead to conflicting political doctrines which variously address the fundamental questions of who should rule and why and how. The outcome is a confusing mélange of a tripartite civil war among those who claim the Enlightenment as their own. This is accompanied by a long history of resistance to the Enlightenment itself, a phenomenon which leads to deeper concerns. Sometimes referred to as the Counter Enlightenment, this has been largely expressed by the Romantic contentions of an authoritarian nationalism. Indeed its most dramatic manifestations have been realized in fascism and Nazism. In this manner they constitute a step back into the historical mist comprising a major attack on both reason and empiricism as the foundation of a scientific approach. Out of this combination of limitation and possibility emanate the essential power configurations of the epoch yielding policies that are often perceived to be democratic either as threat or achievement. Accordingly the book explores the actual substance of the democratic argument. On this basis it contends that a progressive position necessitates a search for the material foundation of a more egalitarian pluralism as the only rational surrogate for majorities within a nation of enormous size, population and the complexities of concentration that are beyond the reach of democracy in any literal sense. This work is rooted in one of the major traditions that emerged from the Western world of the late eighteenth century. Thus it is informed by the doctrinal contentions of people like Thomas Paine, Samuel Adams and Thomas Jefferson. As such it largely opposes a

tradition that flows from the writings of Adam Smith John Adams and James Madison and even more so to that associated with Edmund Burke Alexander Hamilton and John Marshall Its focus is on how these ideas play out in a world wherein a generic fascism is also a major theme always looming

A Christian Perspective on Political Thought Stephen Charles Mott,1993 The author seeks to advance the role of biblical and theological values in the political lives of individual Christians and the public discourse of American society He argues that Americans want to make choices in terms of standards of right and wrong but tend to lack the formulation of a theory
