Unequal Gains Peter H. Lindert, Jeffrey G. Williamson, 2016-04-19 A book that rewrites the history of American prosperity and inequality Unequal Gains offers a radically new understanding of the economic evolution of the United States providing a complete picture of the uneven progress of America from colonial times to today While other economic historians base their accounts on American wealth Peter Lindert and Jeffrey Williamson focus instead on income and the result is a bold reassessment of the American economic experience America has been exceptional in its rising inequality after an egalitarian start but not in its long run growth America had already achieved world income leadership by 1700 not just in the twentieth century as is commonly thought Long before independence American colonists enjoyed higher living standards than Britain and America's income advantage today is no greater than it was three hundred years ago But that advantage was lost during the Revolution lost again during the Civil War and lost a third time during the Great Depression though it was regained after each crisis In addition Lindert and Williamson show how income inequality among Americans rose steeply in two great waves from 1774 to 1860 and from the 1970s to today rising more than in any other wealthy nation in the world Unequal Gains also demonstrates how the widening income gaps have always touched every social group from the richest to the poorest The book sheds critical light on the forces that shaped American income history and situates that history in a broad global context Economic writing at its most stimulating Unequal Gains provides a vitally needed perspective on who has benefited most from American growth and why

Preventing Treaty Abuse Daniel Blum, Markus Seiler, 2016-09-19 Analysis of notion roots and measures of treaty abuse The OECD initiative on Base Erosion and Profit Shifting has put the issue of treaty abuse and the means to counter it on top of the global political agenda Preventing treaty abuse is therefore currently one of the most debated topics in international tax law Diverging national legal traditions in combatting abuse both under domestic and tax treaty law have led to a globally diversified legal framework in this respect and make the OECD's agenda to harmonize these attempts even more challenging The aim of this book is to analyze the notion of treaty abuse its historical roots and the measures to counter it The book's topics cover a wide range of both policy and legal issues The contributions main focus lies on analyzing the proposals put forward by the OECD in BEPS action items 6 and 7 In addition this book analyzes the lessons which can be learnt from the US tax treaty policy and elaborates on the effects the intensified fight against treaty abuse will have from a Non OECD member state perspective Also EU law is taken into account and the question raised which impact the fundamental freedoms might have on the development of new anti avoidance rules Finally the relation between domestic and treaty based anti avoidance is analyzed in great detail identifying the methodical problems of ensuring a sound and abuse safe legal framework With this book the authors and

editors hope to contribute to the discussion on selected issues of preventing treaty abuse and the challenges they present to policy makers judges tax administrations and tax advisers

Understanding Energy Security in Central and Eastern Europe Wojciech Ostrowski,Eamonn Butler,2018-04-09 The purpose of this book is to move beyond the approach which views energy as a purely geopolitical tool of the Russian state and assumes a one size fits all approach to energy security in Central and Eastern Europe CEE It argues that in order to fully understand Russian involvement in the regional energy complex the CEE Russian energy relationship should be analysed in the context of the political and economic transitions that Russia and the CEE states underwent The chapters on individual countries in the book demonstrate that although Russia has and will continue to play a substantial role in the CEE energy sector the scope of its possible influence has been overstated
