Guided error correction. Exercises for advanced Spanish-speaking learners of English. Book 2. Kennedy-Scanlon, Michael, Cebrian, Juli, Bradbury, John, 2024-10-09 This book is the result of years of experience teaching English to Spanish undergraduates studying for a degree in English Language and Literature The focus of the book reflects the assumption that a large majority of the mistakes made by advanced level learners are the result of interference from their native language The approach adopted in this book is based on the idea that correcting one's own mistakes involves two separate operations namely first recognising the error as such and then providing the correction for it In the first two thirds of the book errors are explicitly identified for the learner whose task is simply to correct the errors In the final third however learners must carry out both operations It is this two step approach that the term guided error correction tries to reflect In order to provide sufficient practice each of the errors all characteristic of Spanish speakers learning English occurs on six separate occasions in the book In addition the book includes a section of brief explanatory notes at the back of the book where each of the errors is explained with Spanish translations provided to enhance comprehension of nuances in meaning

These notes are cross referenced with each error in the exercises for handy referral but at the same time represent in themselves a compact reference source for common errors This book will be useful for advanced level Spanish speaking learners of English in any context though it has been designed primarily not for systematic consecutive classroom use but rather as a series of self correcting one page exercises that can be pursued sporadically at the learner s convenience This book is part of a series of three books *1500 Questions in Psychiatry E-Book* Albert Michael,Ben Underwood,2007-06-21 This title is directed primarily towards postgraduate trainees in psychiatry preparing for examinations such as the MRCPsych It contains 1525 questions with answers explanations and references ideal for self testing before exams The questions specifically focus on topics which occur most frequently in the real exams The combination of comprehensive answers and targeted exam relevant topics make this book invaluable for anybody revising for their MRCPsych Prepared by organisers of the Cambridge MRCPsych course which has a pass rate nearly double the UK average Offers a wide variety of questions on targeted exam relevant topics together with explanatory answers with a level of detail beyond most self testing books Topics selected to reflect those most frequently found in real exams Topics presented in manageable chapters each containing 25 questions ideal for dipping in and out when time is limited Answers contain full explanations and references for further detail perfect for general revision and improving areas of need *Leading and Managing in Contemporary Health and Social Care,E-Book* Elizabeth Anne Rosser,Cate Wood,2022-01-18 An understanding of leadership and management theory and practice is integral to the success of a new generation of health and social care professionals and managers of services It is equally important for educators in the field *Leading and Managing in Contemporary Health and Social Care* by Elizabeth Rosser and Cate Wood supports the development of all health and social care professionals as managers and leaders in today s rapidly evolving environment This new title addresses pertinent topics including integration and enhancement of health and social care services interprofessional working the importance of a strong organizational culture developing individual resilience leading innovation and practising successful project and financial management within global and culturally sensitive contexts With a growing mandate for health and social care professionals to understand leadership and management within their organizations and a strong appreciation of these skills by employers this new book is an important contribution that students and educators alike will welcome Comprehensive and authoritative text written by experts in their field Fifteen chapters offer current thinking from a range of different perspectives Presents leadership management theory that can be applied across a wide range of workplaces Includes summary points and case studies for reflection and application Ideal reference for Master s students and those undertaking MBA courses with a focus on health and social care
