book Sample Book Insights 1 The Hierarchy of Powers is a framework of frameworks that ranks all economic competitions in terms of five types of economic power from most general to most specific The first decision investors make is what categories to invest in 2 Category power is a function of the demand for a given class of products or services relative to all other classes The more demand there is for a given category the more powerful it is To free your company s future from the pull of the past you must both objectively assess your current portfolio and identify credible category alternatives that are extremely compelling 3 Portfolio management questions are typically answered once a year with the expectation of staying the course in most years However as experienced investors will tell you category performance is the number one predictor of company performance 4 The three tiers of companies in any given sector are represented by the first tier being the ones with true company power the second by those with brand recognition and the third by unbranded companies that may or may not be producing a significant amount of the category s volume **Lean Enterprise** Jez Humble,Joanne Molesky,Barry

High Tech Products to Mainstream Customers Richard Childers,2012-04-04 ABOUT THE BOOK Since its first publication in 1991 Geoffrey Moores Crossing the Chasm Marketing and Selling High Tech Products to Mainstream Customers has set the standard for tech business moguls In fact it has become the standard for all of us trying to make our way in the confusing world of technology business Moore argues that there is a chasm that exists between early adopters of a potentially disruptive technology product and what he calls the early majority or the market segment that takes such a product to the upper ranges of success Moore believes that early adopters and visionaries have very different expectations than the pragmatists that follow In this book he explores those differences and suggests specific techniques to successfully cross the chasm These include choosing a target market understanding the whole product concept positioning the product building a successful marketing strategy and choosing the most appropriate distribution channel and pricing MEET THE AUTHOR Richard Childers is an experienced writer and a member of the Hyperink Team which works hard to bring you high

quality engaging fun content Happy reading EXCERPT FROM THE BOOK Moores major thesis is that there is something wrong with the High Tech Marketing Model There are gaps separating the major groups described in the Technology Adoption Life Cycle These gaps represent the fact that any group will have a hard time accepting a new product if it is marketed to them in the same manner it was marketed to the group that preceded them Each of these gaps is an opportunity for marketing to lose momentum and miss the transition to the next group Two of these gaps are relatively small what Moore calls cracks in the bell curve The gap between innovators and early adopters occurs when a hot new technology product cannot be transitioned into a major new benefit The enthusiast loves it for its architecture but nobody can even figure out how to start using it There is a second crack of similar size that exists between the early majority and the late majority It comes at a time in the product life cycle when the market is well developed and the technology product is in the mainstream While the early majority was quite willing and able to achieve the level of technical competence required to gain benefit from the product the late majority user is much less so In order to continue developing their market by moving into the late majority segment the product marketers must make the product easier to use and implement If they fail to do so they may fail in their attempts to transition to this next segment CHAPTER OUTLINE Quicklet on Geoffrey A Moore s Crossing the Chasm Marketing and Selling High Tech Products to Mainstream Customers Geoffrey A Moore s Crossing the Chasm Marketing and Selling High Tech Products to Mainstream Customers The High Tech Marketer s Bible About the Author About the Book Overall Summary and much more

Re-collection Richard Rinehart,Jon Ippolito,2022-11-01 The first book on the philosophy and aesthetics of digital preservation examines the challenge posed by new media to our long term social memory How will our increasingly digital civilization persist beyond our lifetimes Audio and videotapes demagnetize CDs delaminate Internet art links to websites that no longer exist Amiga

software doesn't run on iMacs In Re collection Richard Rinehart and Jon Ippolito argue that the vulnerability of new media art illustrates a larger crisis for social memory They describe a variable media approach to rescuing new media distributed across producers and consumers who can choose appropriate strategies for each endangered work New media art poses novel preservation and conservation dilemmas Given the ephemerality of their mediums software art installation art and interactive games may be heading to obsolescence and oblivion Rinehart and Ippolito both museum professionals examine the preservation of new media art from both practical and theoretical perspectives offering concrete examples that range from Nam June Paik to Danger Mouse They investigate three threats to twenty first century creativity technology because much new media art depends on rapidly changing software or hardware institutions which may rely on preservation methods developed for older mediums and law which complicates access with intellectual property constraints such as copyright and licensing Technology institutions and law however can be enlisted as allies rather than enemies of ephemeral artifacts and their preservation The variable media approach that Rinehart and Ippolito propose asks to what extent works to be preserved might be medium independent translatable into new mediums when their original formats are obsolete *IBM* James W.
