Making Minds Paul Kelley, 2007-08-07 Making Minds is a controversial critique of our education systems. The author is a school leader at the forefront of scientific and technological advancement in schools who, as an American, felt comfortable taking on the British establishment. The Times Educational Supplement Making Minds is written for general readers, especially parents, as well as educational professionals. The book examines the underlying limitations that have been accepted in education over the past two thousand years. The author challenges common assumptions about education through evidence-based political, ethical, and emotional arguments, as well as examining case studies such as university admissions and the autism epidemic. Making Minds describes a more productive scientific approach to learning, drawing on recent research findings, particularly in the US and UK. The author illustrates how new research methods, new technologies, and very recent discoveries in neuroscience that will, in the end, allow us to make minds.

ICT for Education, Development, and Social Justice Charalambos Vrasidas, Michalinos Zembylas, Gene V Glass, 2009-03-01 This volume provides examples of current developments on the role of ICT for education, development, and social justice within an international context. Chapters draw on advanced contemporary thinking from scholars and practitioners in the field to present case studies of how ICT can be used to promote sustainable development and social justice. Social justice is understood in a wide sense as the pursuit of democracy, justice, and development in the struggle against any form of oppression. It is within this context that ICT is explored as a tool for social change. The objectives of this book are: To analyze the philosophical, historical, political, and cultural backgrounds and contexts that are constitutive of contemporary challenges and tensions in the role of ICT for education, development, and social justice around the world; To appreciate the contextual and international dimensions of the tensions and challenges faced by educators around the world; and to contribute to ongoing efforts to sketch a vision for addressing their needs. To explore ways in which ICT in education can promote social justice and contribute toward sustaining communities around the world

Microcredentials for Excellence Rebecca Ferguson, Denise Whitelock, 2024-09-19 Institutions all over the world are setting up microcredentials in response to calls from governments and industry. These are short courses usually offered online with an emphasis on the needs of the workplace. More targeted than typical degree courses, they cover role-specific knowledge and help with essential workplace skills. They enable learners to study alongside their work, refreshing and updating their skills. With microcredentials, individuals can access the qualifications they need to get the jobs they want, retraining and upskilling whenever necessary. These are exciting possibilities, but how can they be achieved? Written for everyone with an interest in the policy, practice, or production of microcredentials, this book takes a realistic look at what is possible. Rooted in experience, research, and practice, it identifies what makes these new courses distinctive and provides guidance on how to go about producing them and supporting learners. Differences in scale, funding, learners, and presentation are just some of the factors that mean

microcredentials are not typical courses Setting them up and sustaining them effectively requires thought and change in all areas of an institution as well as new or extended partnerships with employers and professional organisations

Microcredentials for Excellence A Practical Guide examines the range of roles that contribute to a successful microcredential as well as processes and frameworks developed to help with the development of a microcredentials programme The book describes approaches to teaching and learning that work well with these courses identifies methods of course production and learning design that have proved successful when making the move to microcredentials suggests ways in which learners can be supported during their studies especially in terms of wellbeing accessibility and mental health examines innovative practices in assessment and feedback that address some of the challenges for microcredentials in these areas explores the internal and external quality standards that may be applied together with ways of evaluating and developing courses to meet these standards and looks ahead to possible futures for microcredentials taking into account the different visions proposed by those developing them and those influencing that development
