Culturally Affirming Literacy Practices for Urban Elementary Students Lakia M. Scott, Barbara Purdum-Cassidy, 2016-08-17 The nation s demographic of public schools are more ethnically racially and linguistically diverse than ever before Strauss 2014 However there are still educational policies and practices that call to question whether traditionally marginalized students receive an equitable education This is demonstrated in national achievement trends which highlight disproportionality ratings among

minoritized student groups Also when examining school discipline policies expulsion ratings special education services and school choice movements all seem to handicap educational opportunity for low income Black and Brown students As American schools become more and more diverse it is imperative that the literacy practices used to teach young students of color reflect the nation s changing demographic This book provides practical insights guided by conceptual and contextual knowledge in understanding how to teach urban African American and Hispanic Latino a students by discussing issues associated with critical pedagogies literacy and culturally appropriate instructional strategies that have demonstrated success for traditionally marginalized student populations This book examines culturally affirming literacy practices from three main components 1 scholarship 2 the field of practice and 3 teacher education models Each of these three are significant in understanding how to teach minoritized populations As such chapters have been organized into three main sections that address scholarship and research trends in the field and implications for teacher education models all in order to advance the literacy achievement of African American and Hispanic Latino a students

The Growing Out-of-School Time Field Helen Janc Malone,Tara Donahue,2017-10-01 The Information Age Publishing new book series Current Issues in Out of School Time is designed with a purpose to disseminate original research and promising practices that further the OST field This first book sets the foundation on which the series rests upon by offering an analysis of the progress made since the 2000s as well as by looking toward the future for areas of considerations Leading OST experts explore latest knowledge intentionally bridging research and practice and propose new areas of inquiry within each of the following six sections 1 OST as a vehicle for young people s development 2 socio cultural dimensions of OST 3 professional development within OST 4 research and evaluation informed field 5 OST advocacy and 6 future directions for the OST field The OST field has grown considerably over the last two decades Today we have the frameworks practice and research based knowledge and tools and burgeoning paths to advance the field across multiple dimensions demographic stakeholder groups contexts systems and sectors and disciplines The hallmark of the OST field has been the ability to remain agile and adaptable to change in a way that complements the field and supports all children and young people in diverse ways This anthology is designed to be a platform for research practice discussions and future directions that could further grow sustain and improve the field We hope this book inspires both reflections and conversations on the OST field Endorsements It has been clear for some time that the so called achievement gap is driven in part by gaps in educational opportunities Providing access to high quality out of school learning experiences is one of the most important measures that can be taken to reduce disparities and level the playing field The authors in this important new book show us not only how to create such programs but why it matters to our collective future Timely relevant and readable this book is an invaluable resource for anyone seeking to close gaps in educational opportunities Pedro A Noguera PhD Distinguished Professor of Education UCLA Graduate School of Education Information Studies As the chair of the NAS NRC committee that wrote the report Community programs to support youth

development I am delighted by this book When we wrote the report in 2002 there were few systematic attempts to organize and theorize the emerging field of positive youth development As the editors and chapter authors in this book make very clear a great deal has happened at all levels of scholarship in this field over the last 15 years Both this volume and the new book series that it is initiating signal the maturing of this field from childhood through adolescence and now into emerging adulthood The breadth of work discussed in this collection is exceptionally broad ranging from psychological theorizing about the impact of youth serving programs in the out of school time period to social policy analyses of how to grow the profession of OST Youth Professionals and create steady funding streams to support OST programming All topics are critically discussed and new directions are suggested I consider this book to be required reading of all students scholars professional and practitioners in the field of positive youth development and OST programming I go even further by suggesting it be read broadly by anyone interested in the education and development of young people around the world There is no better collection available for educators parents community activists and social policy makers concerned with positive youth development I believe this collection lays a very strong foundation for achieving the goal set forth by Karen Pittman for the field to move from Where and when to what and how Jacquelynne S Eccles Distinguished University Professor of Education University of California Irvine The impressive growth of OST programs represents one of the brightest spots on the American educational landscape Importantly as this book portrays what began a series of programs and local initiatives has now grown into a maturing field with standards scholarship organizations policies and funding at the national state and local levels And more than a field OST carries the urgency energy and passion of a movement for social justice The Growing Out of School Time Field offers a comprehensive review of earlier decades of work and points the way forward for the field's future development It should be read not only by those involved in the OST field but by all educators who seek to create inclusive and powerful learning environments Policymakers as well would benefit from deeper knowledge of this movement It holds a key to preparing today's youth for an uncertain future where the nature of work is changing norms of society are shifting and multicultural global perspectives are needed Milton Chen Ph D Senior Fellow Executive Director Emeritus George Lucas Educational Foundation edutopia.org Book reviews Journal of Youth Development Book Review of The Growing Out of School Time Field Past Present and Future Youth Today The Growing Out of School Time Field Past Present and Future book review

Exploring

Cultural Dynamics and Tensions Within Service-Learning Trae Stewart, Nicole Webster, 2011-09-01 Service learning is an

exciting pedagogy and field of study offering insight into how academic study and community engagement blend to create social change In its most traditional conceptualization servicelearning activities typically manifest within communities where outside individuals address a need Service learning is purported to have a transforming effect on individual student perspectives by providing students the opportunity to interact with people and enter into situations that allow students to test their predisposition towards others However the literature on the impact of service learning on participants acceptance of diversity and development of open mindedness reports mixed outcomes The purpose of this book is to explore cultural tensions and dynamics within the field of service learning It is not meant to be an exhaustive review of the interplay between culture and service learning but rather a starting point for an ongoing conversation about how this complex topic impacts the field In 18 chapters educators students and administrators investigate the cultural values of service learning itself and the tensions created when this is at odds with the values of others within K 12 and higher education in the United States and abroad Authors include community organization representatives researchers directors of offices of community engagement university administrators junior and senior faculty and former service learning undergraduate students Submissions reflect a range of genres including theoretical conceptual pieces position papers case studies and other traditional academic essays challenging how students and community members are affected by the cultural tensions within service learning engagement
