## **Freedom Of Religion And The Secular State:**

Religious Liberty and the Secular State John M. Swomley, 1987 This book examines the political and religious context in which the Constitution and The Bill of Rights were adopted Swomley reasons that those who wrote and adopted the Constitution and First Amendment intended a strict separation of church and state a government that would neither aid nor impede religion Religious Liberty and the Secular State refutes Chief Justice Rehnquist's position that the framers of the Constitution did not intend to ban all religious aid only preferential aid Swomley also refutes Rehnquist's claim that the Establishment Clause in the First Amendment was intended to prevent the establishment of a single national church Swomley concludes that the Constitution was intended to prevent the federal government from establishing one or more churches and to prevent the tax support of churches on any basis This book exposes the Supreme Court's erosion of the Establishment Clause while emphasizing the Free Exercise Clause Swomley also explores civil religion secular humanism and the current counter revolution against separation of church and state led by some religious and political conservatives who would profit from government aid He also lists the benefits churches would realize under a secular government

Jeroen Temperman,2010 This book presents a human rights based assessment of the various modes of state religion identification and of the various forms of state practice that characterize these different state religion models This book makes a case for the recognition of a state duty to remain impartial with respect to religion or belief in all regards so as to comply with people s fundamental right to be governed at all times in a religiously neutral manner As this book demonstrates through the various case studies there is increasing interest and concern at the manner in which questions concerning the enjoyment of the right to the freedom of religion or belief bear upon key questions concerning the governance of democratic society Issues raised involve matters concerning employment education expression association and more generally the interface between religion and political life The existing literature often traces these concerns back to the need to consider the place of religion in contemporary society but leaves matters there Another body of academic literature explores the theoretical dimensions of that relationship but fails to connect it to the practice of states in order to test out the propositions which are the product of these reflections The great virtue of this work is that it seeks to unite these various enterprises and engages head on with the challenges which this produces The aim is to demonstrate and illustrate the key contention that there is an emergent right to religiously neutral governance and that this is incompatible with the continuation of systems which offer preference to particular forms of belief system religious or otherwise A chief virtue of this book is that it works through the consequences of this claim in a fearless fashion posing challenges for those states which continue to use their legal frameworks to offer support directly or indirectly for historical dominant or favoured forms of religion or belief It challenges received assumptions and by driving the logic of contemporary human rights thinking to the foundations of state religion relationships performs a valuable service for those engaging with this most difficult and timely of questions Malcolm D Evans Professor of Public International Law University of Bristol **Freedom of Religion and Religious Diversity** Md

**Turkish Secularism** Tarlan Masmaliyeva, 2023-12-14 There are any number of studies on Turkish secularism However to date there has never been a comprehensive analysis of the constitutional protection of secularism one that systematically covers all relevant aspects Addressing that gap this book presents a comprehensive and coherent analysis of the constitutional framework of this principle within the Turkish legal system Secularism is a common fundamental principle of all three Turkish constitutions 1924 1961 1982 The principle has been granted an irrevocable status and has been strictly constructed within the Turkish constitutional system Despite the guarantee of irrevocability however its interpretation and application have undergone a drastic transformation in response to changing social and political circumstances Today the complaints filed before the domestic and international judiciary predominantly concern the Turkish State s neutrality and impartiality towards religion and the exercise of freedom of religion by religious minorities While many observers have interpreted these problems in light of the contemporary policies pursued in the field of religion a closer look reveals that the problem lies deeper in Turkey s general constitutional framework While the 1982 Constitution declares the principle as an unamendable characteristic of the Republic and protects it with multi layered mechanisms certain anti democratic features of the Constitution including the President s predominant role in forming the high ranking judiciary affect the proper and consistent application of the principle of secularism The consolidation of the secular state order depends on various factors other than a suitable constitution However it goes without saying that constitutions can help or hinder efforts to find solutions Therefore this book identifies the deficiencies in the Turkish constitutional and legal framework regarding the protection of secularism It presents the historical development and

definition of a secular state analyzes the jurisprudence of the Turkish Constitutional Court and the European Court of Human Rights studies the application of the party prohibition mechanism as a means of protecting the principle and assesses the constitutional amendments of 2001 2010 and 2017 Moreover it proposes much needed constitutional and legal amendments with a view to improving the application of the principle of secularism Freedom of Religion or Belief Paul T. Babie, Neville G. Rochow, Brett G. Scharffs, 2020-05-29 Using the metaphor of constitutional space this thought provoking book describes the confluence and convergence of powers in a constitutional system comprised of the principled exercise of the legislative executive and judicial powers of constitutional government Addressing the issues surrounding the freedom of religion or belief the book explores the dimensions of constitutional space and the content of this freedom as well as comparative approaches to defining and protecting this freedom *The Changing Terrain of Religious Freedom* Heather J. Sharkey, Jeffrey Edward Green, 2021-09-24 This volume offers theoretical historical and legal perspectives on religious freedom as an experience value and right Drawing on examples from around the world its essays show how the terrain of religious freedom has never been smooth and how in recent years the landscape of religious freedom has shifted

*Introduction to Political Theory* Devoreaux Ford, 2018-11-19 Political Theory at Stanford approaches the study of justice legitimacy and power by conjoining normative theory positive theory and the intellectual history of political thought Among the topics with which our faculty and students are concerned are democracy equality global justice international relations realism and idealism education deliberation institutional innovation and the organization of knowledge This book on Political Theory examines a fairly wide range of issues on political theory and explores the major issues of it by presenting the perspectives of major theorists This gracefully structured intellectually rigorous book gives students necessary historical background while examining basic themes and assessing the validity of basic arguments It elaborates the nature and significance of political theory presented in a clear direct style which can be easily understood by the students with little previous exposure to political science Rather than simply presenting an abstract of the major issues of political theory it examines leading arguments with all the major concepts It is particularly designed to cater to the need of the students and teachers of several universities colleges and for the students preparing for various competitive examinations e **Religious Politics and Secular States** Scott W. Hibbard, 2010-10-15 2011 Winner of the Charles H Levine Memorial Book Prize of the International Political Science Association This comparative analysis probes why conservative renderings of religious tradition in the United States India and Egypt remain so influential in the politics of these three ostensibly secular societies The United States Egypt and India were quintessential models of secular modernity in the 1950s and 1960s By the 1980s and 1990s conservative Islamists challenged the Egyptian government India witnessed a surge in Hindu nationalism and the Christian right in the United States rose to dominate the Republican Party and large swaths of the public discourse Using a nuanced theoretical framework that emphasizes the interaction of religion and politics Scott W Hibbard argues that three

interrelated issues led to this state of affairs First as an essential part of the construction of collective identities religion serves as a basis for social solidarity and political mobilization Second in providing a moral framework religion s traditional elements make it relevant to modern political life Third and most significant in manipulating religion for political gain political elites undermined the secular consensus of the modern state that had been in place since the end of World War II Together these factors sparked a new era of right wing religious populism in the three nations Although much has been written about the resurgence of religious politics scholars have paid less attention to the role of state actors in promoting new visions of religion and society Religious Politics and Secular States fills this gap by situating this trend within long standing debates over the proper role of religion in public life      *India as a Secular State* Donald Eugene Smith,2015-12-08 Throughout India s history religion has been the most powerful single factor in the development of her civilization Today despite her religious tradition India is emerging as a secular state In this book Donald E Smith explores the origin of the concept of secularization as it is found both in Indian culture and in the example of the western nations He emphasizes the important role of secularization in India s total democratic experiment and points out that the degree of its realization will undoubtedly affect the eventual character of democracy in India In addition the success or failure of the secular state in India cannot fail to influence the attitudes of her neighbors Professor Smith considers the many aspects and implications of India s attempt to secularize her government Originally published in 1963 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905      Religion in the 21st Century Lisbet Christoffersen,Margit Warburg,2016-04-08 In spite of the debate about secularization or de secularization the existential bodily need for religion is basically the same as always What have been changed are the horizons within which religions are interpreted and the relationships within which religions are integrated This book explores how religions continue to challenge secular democracy and science and how religions are themselves being challenged by secular values and practices All traditions whether religious or secular experience a struggle over authority and this struggle seems to intensify with globalization as it has brought people around the world in closer contact with each other In this book internationally leading scholars from sociology law political science religious studies theology and the religion and science debate take stock of the current interdisciplinary research on religion and open new perspectives at the cutting edge of the debate on religion in the 21st century      *The Social Equality of Religion or Belief* A. Carling,2016-05-30 Some countries like the UK give special recognition by the state to one or a few religions other countries like France and the US give recognition to none This book is about a new approach that gives equal recognition to all religions and non religious belief systems

Religious Minorities, Islam and the Law Al Khanif, 2020-09-03 This book examines the legal conundrum of reconciling international human rights law in a Muslim majority country and identifies a trajectory for negotiating the protection of religious minorities within Islam The work explores the history of religious minorities within Islam in Indonesia which contains the world's largest Muslim population as well as the present day ways by which the government may address issues through reconciling international human rights law and Islamic law Given the context of multiple sets of religious norms in Indonesia this is a complicated endeavour In addition to amending and enacting human rights norms the government is also negotiating with the long history of Islamisation in Indonesia Particularly relevant is the practice of customary law which puts the rights of community over individualism This practice directly affects the rights of religious minorities within Islam Readers especially those conducting research will also be provided with information and references which are relevant to the field of human rights especially in relation to religious minorities and international law The book will be a valuable resource for academics and researchers in the fields of International Human Rights Law Law and Religion and Islamic Studies
