Counseling and Motivational Interviewing in Speech-Language Pathology Jerry Hoepner, 2024-06-01 Written as a helpful guide for speech language pathologists and students Counseling and Motivational Interviewing in Speech Language Pathology provides a solid base in theoretical

foundations while prioritizing skill development and practical applications of counseling in speech language pathology. Now more than ever there is a burgeoning need for speech language pathologists to incorporate counseling into their everyday practice. However, most practitioners currently lack the training and knowledge necessary to fulfill that role. *Counseling and Motivational Interviewing in Speech Language Pathology* seeks to remedy that by providing techniques and tools for counseling across the lifespan and practice settings. The book is divided into two main parts. Chapters 1 through 4 cover the foundational principles of motivational interviewing, including several self-assessment tools to support learners in the process. Chapters 5 through 8 address specific counseling techniques and topics, providing readers with practical examples of how to properly counsel individuals with communication, cognition, and swallowing disorders. What's included in *Counseling and Motivational Interviewing in Speech Language Pathology*: sample dialogues between clinicians and clients, case examples, thinking exercises, and potential assignments for readers to apply the knowledge and skills addressed in the book. A chapter dedicated to communicatively accessible structured interview approaches, eliciting and monitoring collaborative goals, and screening for other mental health concerns. *Counseling and Motivational Interviewing in Speech Language Pathology* is an approachable guide that will address the issues of scope of practice while proving why speech language pathologists are uniquely suited to provide counseling.
