Gender And Us Immigration Contemporary Trends:

Gender and U.S. Immigration Pierrette Hondagneu-Sotelo, 2003-08-01 Resurgent immigration is one of the most powerful forces disrupting and realigning everyday life in the United States and elsewhere and gender is one of the fundamental social categories anchoring and shaping immigration patterns Yet the intersection of gender and immigration has received little attention in contemporary social science literature and immigration research This book brings together some of the best work in this area including essays by pioneers who have logged nearly two decades in the field of gender and immigration and new empirical work by both young scholars and well established social scientists bringing their substantial talents to this topic for the first time

New Perspectives on Gender and Migration Nicola Piper, 2013-09-13 This book discusses recent theoretical and empirical developments in international migration from a gender perspective Its main objective is to analyse the diversification and stratification of gendered migratory streams with regard to skill level labour market integration and legal status In turn a migrant's position in relation to these axes influences access to entitlements and rights Conceptually the book builds upon the recent shift in scholarly research on migration with women centred research shifting more toward the analysis of gender Migration is now viewed as a gendered phenomenon that requires more sophisticated theoretical and analytical tools than sex as a dichotomous variable Theoretical formulations of gender as relational and as spatially and temporally contextual have begun to inform gendered analyses of migration The contributions to this book elaborate in more detail the broader social factors that influence migrating women's and men's roles access to resources facilities and services Empirically all major regions are discussed pointing to common trends such as the increasing significance of the regionalization of migration flows as well as some noteworthy differences

Class, Gender and Migration María Eugenia D'Aubeterre Buznego,Alison Elizabeth Lee,María Leticia Rivermar Pérez,2020-06-07 Using a gender sensitive political economy approach this book analyzes the emergence of new migration

patterns between Central Mexico and the East Coast of the United States in the last decades of the twentieth century and return migration during and after the global economic crisis of 2007 Based on ethnographic research carried out over a decade details of the lives of women and men from two rural communities reveal how neoliberal economic restructuring led to the deterioration of livelihoods starting in the 1980s Similar restructuring processes in the United States opened up opportunities for Mexican workers to labor in US industries that relied heavily on undocumented workers to sustain their profits and grow When the Great Recession hit in the context of increasingly restrictive immigration policies some immigrants were more likely to return to Mexico than others This longitudinal study demonstrates how the interconnections among class and gender are key to understanding who stayed and who returned to Mexico during and after the global economic crisis Through these case studies the authors comment more widely on how neoliberalism has affected the livelihoods and aspirations of the working classes This book will be of key interest to scholars students and practitioners in migration studies gender studies politics and more broadly to international relations anthropology development studies and human geography

At the Heart of Work and Family Anita Iltis Garey, Karen V. Hansen, 2011 At the Heart of Work and Family presents original research on work and family by scholars who engage and build on the conceptual framework developed by well

known sociologist Arlie Russell Hochschild These concepts such as the second shift the economy of gratitude emotion work feeling rules gender strategies and the time bind are basic to sociology and have shaped both popular discussions and academic study The common thread in these essays covering the gender division of housework childcare networks families in the global economy and children of consumers is the incorporation of emotion feelings and meaning into the study of working families These examinations like Hochschild s own work connect micro level interaction to larger social and economic forces and illustrate the continued relevance of linking economic relations to emotional ones for understanding contemporary work family life Gendered Asylum Sara L McKinnon,2016-09-01 Women filing gender based asylum claims long faced

skepticism and outright rejection within the United States immigration system Despite erratic progress the United States still fails to recognize gender as an established category for experiencing persecution Gender exists in a sort of limbo segregated from other aspects of identity and experience Sara L McKinnon exposes racialized rhetorics of violence in politics and charts the development of gender as a category in American asylum law Starting with the late 1980s when gender based requests first emerged in case law McKinnon analyzes gender and sexuality related cases against the backdrop of national and transnational politics Her focus falls on cases as diverse as Guatemalan and Salvadoran women sexually abused during the Dirty Wars and transgender asylum seekers from around the world fleeing brutally violent situations She reviews the claims evidence testimony and message strategies that unfolded in these legal arguments and decisions and illuminates how legal decisions turned gender into a political construct vulnerable to American national and global interests She also explores myriad related aspects of the process including how subjects are racialized and the effects of that racialization and the consequences of policies that position gender as a signifier for women via normative assumptions about sex and heterosexuality Wide ranging and rich with human detail Gendered Asylum uses feminist immigration and legal studies to engage one of the hotly debated issues of our time American Jewish Year Book 2016 Arnold Dashefsky,Ira M.

Globalization and Families Bahira Trask, 2009-12-01 As our world becomes increasingly interconnected through economic integration technology communication and political transformation the sphere of the family is a fundamental arena where globalizing processes become realized For most individuals family in whatever configuration still remains the primary arrangement that meets certain social emotional and economic needs It is within families that decisions about work care movement and identity are negotiated contested and resolved Globalization has profound implications for how families assess the choices and challenges that accompany this process Families are integrated into the global economy through formal and informal work through production and consumption and through their relationship with nation states Moreover ever growing communication and information technologies allow families and individuals to have access to others in an unprecedented manner These relationships are accompanied by new conceptualizations of appropriate lifestyles identities and ideologies even among those who may never be able to access them Despite a general acknowledgement of the complexities and social significance inherent in globalization most analyses remain top down focused on the global economy corporate strategies and political streams This limited perspective on globalization has had profound implications for understanding social life The impact of globalization on gender ideologies work family relationships conceptualizations of children youth and the elderly have been virtually absent in mainstream approaches creating false impressions that dichotomize globalization as a separate process from the social order Moreover most approaches to globalization and social phenomena emphasize the Western experience These inaccurate assumptions have profound implications for families and for the globalization process itself In order to create and implement programs and policies that can harness globalization for the good of mankind and that could reverse some of the deleterious effects that have affected the world's most vulnerable populations we need to make the interplay between globalization and families a primary focus

Reshaping Gender and Class in Rural Spaces Belinda Leach, 2016-04-08 Leach and Pini bring together empirical and theoretical studies that consider the intersections of class gender and rurality Each chapter engages with current debates on these concepts to explore them in the context of contemporary social and economic transformations in which global processes that reconstitute gender and class interconnect with and take shape in a particular form of locality the rural The book is innovative in that it responds to calls for more critical work on the rural other contributes to scholarship on gender and rurality but does so through the lens of class This book places the question of gender rurality and

difference at its centre through its focus on class addresses the urban bias of much class scholarship as well as the lack of gender analysis in much rural and class academic work focuses on the ways that class mediates the construction and practices of rural men masculinities and rural women femininities challenges prevalent and divergent assumptions with chapters utilising contemporary theorisations of class With the empirical strongly grounded in theory this book will appeal to scholars working in the fields of gender rurality identity and class studies
