Gender Psychological Perspectives Sixth Edition:

Gender Linda Brannon, 2015-07-22 This bestselling text presents research about gender and helps students think critically about the differences between research findings and gender stereotypes. It examines the biology and social context in which women and men express gendered behaviors. Defining gender as the behaviors and attitudes that relate to but are not entirely congruent with biological sex, the book focuses on research and scholarship to provide the material for a critical review and an overall picture of gender from a psychological perspective. To highlight how research findings can relate to people's lives, the book supplements the review of scholarly research with personal narrative accounts of gender-relevant aspects of people's lives. To emphasize the cross-cultural perspective of gender, the book includes a section on diversity in most chapters but also weaves diversity issues throughout the text. The personal narrative and diversity highlights help to balance the research-based scholarship with the personal experience of gender.

The Gender of Photography Nicole Hudgins,2020-09-02 It would be unthinkable now to omit early female pioneers from any survey of photography s history in the Western world Yet for many years the gendered language of American British and French photographic literature made it appear that women s interactions with early photography did not count as significant contributions Using French and English photo journals cartoons art criticism novels and early career guides aimed at women this volume will show why and how early photographic clubs journals exhibitions and studios insisted on masculine values and authority and how Victorian women engaged with photography despite that dominant trend Focusing on the period before 1890 when women were yet to develop the self assurance that would lead to broader recognition of the value of their work this study probes the mechanisms by which exclusion took place and explores how women practiced photography anyway both as amateurs and professionals Challenging the marginalization of women s work in the early history of photography this is essential reading for students and scholars of photography history and gender studies

A Research Agenda for Social Wellbeing Neil Thin, 2020-11-27 This Research Agenda for Social Wellbeing introduces scholars and planners to the importance of a wellbeing lens for the study and promotion of social flourishing It demonstrates the importance of wellbeing

as a public good not just a property of individuals Mapping Feminist Anthropology in the Twenty-First Century Ellen Lewin, Leni M. Silverstein, 2016-07-07 Feminist anthropology emerged in the 1970s as a much needed corrective to the discipline's androcentric biases. Far from being a marginalized subfield, it has been at the forefront of developments that have revolutionized not only anthropology but also a host of other disciplines. This landmark collection of essays provides a contemporary overview of feminist anthropology's historical and theoretical origins, the transformations it has undergone, and the vital contributions it continues to make to cutting edge scholarship. Mapping Feminist Anthropology in the Twenty First Century brings together a variety of contributors giving a voice to both younger researchers and pioneering scholars who offer insider perspectives on the field's foundational moments. Some chapters reveal how the rise of feminist anthropology shaped and was shaped by the emergence of fields like women's studies, black and Latina studies, and LGBTQ studies. Others consider how feminist anthropologists are helping to frame the direction of developing disciplines like masculinity studies, affect theory, and science and technology studies. Spanning the globe from India to Canada, from Vietnam to Peru, Mapping Feminist Anthropology in the Twenty First Century reveals the important role that feminist anthropologists have played in worldwide campaigns against human rights abuses, domestic violence, and environmental degradation. It also celebrates the work they have done closer to home, helping to explode the developed world's preconceptions about sex, gender, and sexuality.

Understanding Women's Career Experiences in Moroccan Businesses Mouna Izelmaden, 2024-06-27 Existing literature on women's career development focuses on western industrialized countries and gives little attention to regions where patriarchy is prevailing, like in North African countries. The limited available research in the region takes a business-oriented perspective to investigate the topic and focuses on business process optimization for an increased profitability. In an attempt to close this gap, the present book takes a sociological lens to investigate meanings and interpretations that skilled women in Moroccan organizations give to their experiences. This project sought to understand how Moroccan professional women take decisions about their career path while taking a multi-level approach to examine contextual factors. In this book, Bourdieu's theory of practice was used as a theoretical framework to examine the interplay of the different factors impacting the development of women's career paths. Using a qualitative research approach under the interpretivist paradigm and drawing on in-depth interviews with 10 participants, this research investigated female and male conceptualization of career and work objectives.

Naming and Othering in Africa Sambulo Ndlovu, 2021-12-30 This book examines how names in Africa have been fashioned to create dominance and subjugation, inclusion and exclusion, others and self. Drawing on global and African examples but with particular reference to Zimbabwe, the author demonstrates how names are used in class, race, ethnic, national, gender, sexuality, religious, and business struggles in society as weapons by ingroups and outgroups. Using Othering theory as a framework, the chapters explore themes such as globalised names and their demonstration of the other, onomastic erasure in colonial naming, and the subsequent decoloniality in African name changes, othering of women in onomastics, and
