Toward an Architecture of Enjoyment Henri Lefebvre, 2014-05-01 *Toward an Architecture of Enjoyment* is the first publication in any language of the only book devoted to architecture by Henri Lefebvre Written in 1973 but only recently discovered in a private archive this work extends Lefebvre's influential theory of urban space to the question of architecture Taking the practices and perspective of habitation as his starting place Lefebvre redefines architecture as a mode of imagination rather than a specialized process or a collection of monuments He calls for an architecture of *jouissance* of pleasure or enjoyment centered on the body and its rhythms and based on the possibilities of the senses Examining architectural examples from the Renaissance to the postwar period Lefebvre investigates the bodily pleasures of moving in and around buildings and monuments urban spaces and gardens and landscapes He argues that areas dedicated to enjoyment sensuality and desire are important sites for a society passing beyond industrial modernization Lefebvre's theories on space and urbanization fundamentally reshaped the way we understand cities *Toward an Architecture of Enjoyment* promises a similar impact on how we think about and live within architecture

basis for new directions for education research and practice the book is organized around specific case studies to provide a critical interpretive and speculative enquiry into the relevant debates in architectural theory *Women, Practice, Architecture* Naomi Stead, 2016-01-08 The image of the architect is undeniably gendered While the male architect might be celebrated as the ideal man in Hollywood romantic comedies blessed with practicality and creativity in equal measure to impeccable taste and an enviable lifestyle the image of the woman architect is not so clear cut While women have been practicing and excelling in architecture for more than a hundred years their professional identity as constructed in the media is complex and sometimes contradictory This book explores the working lives and aspirations of women in architectural practice but more than this it explores how popular media newspapers magazines and websites serve to define and describe who a woman architect should be what she should look like and how she should behave Looking further into the way that professional characteristics are reinforced through awards like the Pritzker Prize the book demonstrates how idealised characteristics such as sensitivity and vision are seen to be neither entirely masculine nor feminine but instead a complex hybrid owing much to historic concepts of genius Drawing on history sociology media analysis and feminist theories of architectural practice the book will be of interest to all of those who seek to better understand the image and identity of the architect This book was published as a double special issue of *Architectural Theory Review*

Women Architects in India Mary N. Woods,2016-10-04 As the first inclusive study of how women have shaped the modern Indian built environment from the independence struggle until today this book reveals a history that is largely unknown not only in the West but also in India

Educated in the 1930s and 1940s the very first women architects designed everything from factories to museums in the post independence period The generations that followed are now responsible for metro systems shopping malls corporate headquarters and IT campuses for a global India But they also design schools cultural centers religious pilgrimage hotels and wildlife sanctuaries Pioneers in conserving historic buildings these women also sustain and resurrect traditional crafts and materials empower rural and marginalized communities and create ecologically sustainable architectures for India Today although women make up a majority in India s ever increasing schools of architecture it is still not easy for them like their Western sisters to find their place in the profession Recounting the work and lives of Indian women as not only architects but also builders and clients opens a new window onto the complexities of feminism modernism and design practice in India and beyond Set in the design centers of Mumbai and Delhi this book is also one of the first histories of architectural education and practice in two very different cities that are now global centers The diversity of practices represented here helps us to imagine other ways to create and build apart from starchitecture And how these women negotiate tradition and modernity at work and at home is crucial for understanding gender and modern architecture in a more global and less Eurocentric context In a country where female emancipation was important for narratives of the independence movement and the new nation state feminism was nonetheless eschewed as divisive and damaging to the nationalist cause Class caste tradition and family restricted but also created opportunities for the very first women architects in India just as they do now for the growing number of young women professionals today

Where Are the Women Architects? Despina Stratigakos,2016-04-12 A timely and important search for architecture s missing women For a century and a half women have been proving their passion and talent for building and in recent decades their enrollment in architecture schools has soared Yet the number of women working as architects remains stubbornly low and the higher one looks in the profession the scarcer women become Law and medicine two equally demanding and traditionally male professions have been much more successful in retaining and integrating women So why do women still struggle to keep a toehold in architecture Where Are the Women Architects tells the story of women s stagnating numbers in a profession that remains a male citadel and explores how a new generation of activists is fighting back grabbing headlines and building coalitions that promise to bring about change Despina Stratigakos s provocative examination of the past current and potential future roles of women in the profession begins with the backstory revealing how the field has dodged the question of women s absence since the nineteenth century It then turns to the status of women in architecture today and the serious entrenched hurdles they face But the story isn t without hope and the book documents the rise of new advocates who are challenging the profession s boys club from its male dominated elite prizes to the erasure

of women architects from Wikipedia These advocates include Stratigakos herself and here she also tells the story of her involvement in the controversial creation of Architect Barbie Accessible frank and lively Where Are the Women Architects will be a revelation for readers far beyond the world of architecture Museum Architecture Suzanne MacLeod,2013-04-12

Recent decades have witnessed an explosion of museum building around the world and the subsequent publication of multiple texts dedicated to the subject Museum Architecture A new biography focuses on the stories we tell of museum buildings in order to explore the nature of museum architecture and the problems of architectural history when applied to the museum and gallery Starting from a discussion of the key issues in contemporary museum design the book explores the role of architectural history in the prioritisation of specific stories of museum building and museum architects and the exclusion of other actors from the history of museum making These omissions have contemporary relevance and impact directly on the ways in which the physical structures of museums are shaped Theoretically the book places a particular emphasis on the work of Pierre Bourdieu and Henri Lefebvre in order to establish an understanding of buildings as social relations the outcome of complex human interactions and relationships The book utilises a micro history an in depth case study of the National Gallery of the North the Walker Art Gallery in Liverpool to expose the myriad ways in which museum architecture is made Coupled with this detailed exploration is an emphasis on contemporary museum design which utilises the understanding of the social realities of museum making to explore ideas for a socially sustainable museum architecture fit for the twenty first century
