Messner, 2016 *Gender Through the Prism of Difference* adopts a global transnational perspective on how race class and sexual diversity are central to the study of sex and gender In contrast with other books in this area which tend to focus on U S or European viewpoints this wide ranging anthology features many articles based on research done elsewhere throughout the world Now in its fifth edition the book opens with a revised and updated Introduction that sets the stage for understanding gender as a socially constructed experience Featuring twenty eight new readings this edition covers compelling subjects like transgendered people intersex issues men and masculinity sexual and gender violence disabilities obesity reproductive technologies educational testing aging and ageism and Occupy Wall Street

Through the Prism of Difference Maxine Baca Zinn, Pierrette Hondagneu-Sotelo, Michael A. Messner, 1997 The editors have gone beyond simply assembling a collection of readings by the leading scholars of sex and gender they introduce a new way to conceptualize the interrelationships between gender relations and other systems of inequality and difference The editors invoke the image of a prism through which different groups are seen not as distinct but in a continuous spectrum The prism approach illustrates the varied ways that gender is constructed relationally and thus experienced differently Toward this end the editors draw from the most recent studies of women and men especially studies of gender relations in the context of different sexual racial ethnic social class physical abilities age and national citizenship contexts Though the majority of articles in the book focus on issues in U S gender relations the editors have included numerous articles that focus on international and transnational factors Together the articles in this book shed critical yet at times optimistic light on the possibilities for change

Chrisler,Donald R. McCreary,2010-03-12 Donald R McCreary and Joan C Chrisler The Development of Gender Studies in Psychology Studies of sex differences are as old as the eld of psychology and they have been conducted in every sub eld of the discipline There are probably many reasons for the popularity of these studies but three reasons seem to be most prominent First social psychological studies of person perception show that sex is especially salient in social groups It is the rst thing people notice about others and it is one of the things we remember best Fiske Haslam Stangor Lynch Duan Glass 1992 For example people may not remember who uttered a witty remark but they are likely to remember whether the quip came from a woman or a man Second many people hold rm beliefs that aspects of physiology suit men and women for particular social roles Men s greater upper body strength makes them better candidates for manual labor and their greater height gives the impression that they would make good leaders i e people we look up to Women s reproductive capacity and the caretaking tasks e g breastfeeding baby minding that accompany it make them seem suitable for other roles that require gentleness and nurturance Third the logic that underlies hypothesis testing in the sciences is focused on difference

Researchers design their studies with the hope that they can reject the null hypothesis that experimental groups do not differ

Changing Societies Karin Sporre, Jan Mannberg, 2010-09-24 Education is a societal matter and takes place in relation to societal changes Today in many countries it has to grapple with diversity and differences brought about by migration and changes in gender relations Questions of values human rights and the role of religions are raised In this book scholars from Sweden Norway Germany Great Britain Canada Namibia and South Africa discuss the issues above Similarities as well as differences are highlighted The varied contributors engage in a North South dialogue Among the questions addressed are Can the Scandinavian countries be understood as more religious than their up to date seemingly secularist reputation has led us to believe How do some European Muslim Christian and secular pupils understand the religious education they receive Could a global citizenship education with a gendered understanding as an integral part be accomplished Diversity and social justice what does it take to theoretically integrate these two crucial parameters in education in South Africa and in Sweden The role of religious and values education under changing circumstances is explored through the diverse contributions that also challenge the hegemony of a Western understanding of democracy among other values The purpose of this is to assess what could now constitute global educational common ground

Gender, School and Society Dr. R. Rajalakshmi and Dr. C.E. Jayanthi, 2019-11-13 Gender is a socially constructed definition of women and men It is not the same as biological characteristics of women and men Gender is determined by the conception of tasks functions and roles attributed to women and men in society and in public and private life The Gender approaches distinct in that it focuses on women and men and not on women in isolation

Gender Inequality in Our Changing World Lori Kenschaft, Roger Clark, Desiree Ciambone, 2015-07-24 Gender Inequality in Our Changing World A Comparative Approach focuses on the contemporary United States but places it in historical and global context Written for sociology of gender courses this textbook identifies conditions that encourage greater or lesser gender inequality explains how gender and gender inequality change over time and explores how gender intersects with other hierarchies especially those related to race social class and sexual identity The authors integrate historical and international materials as they help students think both theoretically and empirically about the causes and consequences of gender inequality both in their own lives and in the lives of others worldwide
