Gendering Disability Bonnie G. Smith, Beth Hutchison, 2004 Disability and gender are becoming increasingly complex in light of recent politics and scholarship This volume provides findings not only about the discrimination practised against women and people with disabilities but also about the productive parallelism between the two categories **Gendering Disability** Bonnie G. Smith, Beth Hutchison, 2004 Disability and gender terms that have previously seemed so clear cut are becoming increasingly complex in light of new politics and scholarship These words now suggest complicated sets of practices and ways of being Contributors to this innovative collection explore the intersection of gender and disability in the arts consumer culture healing the personal and private realms and the appearance of disability in the public sphere both in public fantasies and in public activism Beginning as separate enterprises that followed activist and scholarly paths gender and disability studies have reached a point where they can move beyond their boundaries for a common landscape to inspire new areas of inquiry Whether from a perspective in the humanities social sciences sciences or arts the shared subject matter of gender and disability studies the body social and cultural hierarchy identity discrimination and inequality representation and political activism insistently calls for deeper conversation This volume provides fresh findings not only about the discrimination practiced against women and people with disabilities but also about the productive parallelism between these two categories **Gendering Disability an Analysis of Identity and Gendered Messages Directed Toward People with Disabilities** Jessica M. Samens, 2006 **Disability, Gender, Bodies and Boundaries** Hannah Mason-Bish, 2025-04-26 This book outlines the ways that disabled women experience unwanted touching and intrusive questions when navigating public space Using the framework of feminist disability studies this book takes an intersectional approach to fill a gap in the understanding of how disability and gender are factors in the nature and impacts of unwanted touching It draws on research from over 70 women and non binary people to elicit stories and examples with some people living what some described as a smaller life The methodology was a co production with a disability activist This book develops the new concept of Ableist Intrusions to investigate the nature and impacts of such experiences It considers how non disabled people should interact with disabled people in order to respect boundaries and bodies **Gender, Disability, and Tourism in Africa** Erisher Woyo, Hellen Venganai, 2022-11-10 This book explores the intersection of gender and disability in the context of tourism In part the book foregrounds feminist theorising of intersectionality by examining how gender can overlap with other social identities to contribute to more systemic oppression domination discrimination and marginalisation of certain categories of people Our point of departure is that disability does not operate in isolation as it is constituted and experienced within an already gendered social and tourism environment With substantial research on the intersection of gender and tourism on the one hand and the intersection of disability and tourism on the other hand the interconnectedness of gender and disability and the implications this has on tourism policy and practice remains

understudied Thus the book provides a critical lens that helps unpack underlying assumptions about gender and disability while questioning the dominant ideas about gender and disability reproduced through tourism policies and institutional practices in an African context This book will be of interest to scholars and researchers in Gender Studies Disability Studies and Tourism Studies particularly those with a research interest in Africa

Drawing on multidisciplinary perspectives and scholarship, it summarizes the complex intertwining of illness and culture in the context of the rising frequency of mental disorders. The book is divided into three sections: the first of which examines the fundamental and conceptual underpinnings of mental health, well-being, and wellness from a gender perspective in order to present an overview of mental health through a holistic gender lens. The second section focuses on the mental health scenario in India, examining the epidemiological data and etiology of mental illness from a psychosocial standpoint. Disability and Mobile Citizenship in Postsocialist Ukraine Sarah D. Phillips, 2010-11-26 Sarah D. Phillips examines the struggles of disabled persons in Ukraine and the other former Soviet states to secure their rights during the tumultuous political, economic, and social reforms of the last two decades. Through participant observation and interviews with disabled Ukrainians across the social spectrum—rights activists, politicians, students, workers, entrepreneurs, athletes, and others—Phillips documents the creative strategies used by people on the margins of postsocialist societies to assert claims to mobile citizenship. She draws on this rich ethnographic material to argue that public storytelling is a powerful means to expand notions of relatedness, kinship, and social responsibility, and which help shape a more tolerant and inclusive society.

Discourses on Disability Anju Sosan George, 2023-03-31 *Discourses on Disability* bridges academic and personal voices from India to address the diverse and fluid conversations on disability. It seeks to critically engage with the concept of being disabled, attempting to deconstruct ableism while advocating for inclusive politics. Narratives from people with bipolar disorder, autism, and locomotor disabilities serve to examine how it feels to exist in a world conditioned by deep-seated cultural taboos about disability. The chapters in this book show how India still has a systemic silence about people with disabilities.

Handbook of Disability Human Rights Hierarchies Stephen Meyers, Megan McCloskey, Gabor Petri, 2023-10-31 Disability is defined by hierarchy Regardless of culture or context persons with disabilities are almost always pushed to the bottom of the social hierarchy With the advent of the Convention on the Rights of Persons with Disabilities 2006 disability human rights seemingly provided a path forward for tearing down ableist social hierarchies and ensuring that all persons with disabilities everywhere were treated equally Despite important progress the disability human rights project not only remains incomplete but has often created new hierarchies among persons with disabilities themselves or across the human rights it promotes Certain groups of persons with disabilities have gained new voices while others remain silenced and certain rights are prioritized over others depending on what states international organizations or advocates want rather than what those on the ground need most This volume was inspired both by the continued need to expose human rights violations against persons with disabilities but to also explore the nuanced role that hierarchies play in the spread implementation and protection of disability human rights The enjoyment of human rights is not equal nor is the recognition of specific individuals and groups rights In order to change this situation inequalities across the disability human rights movement must be explored Divided into five parts Who counts as disabled Political social and cultural context Which rights on top whose rights on bottom Pushed to the periphery in the disability rights movement Representations of disability and comprised of 34 newly written chapters including case studies from the Anglophone Caribbean Bangladesh Bosnia Herzegovina China Ghana Haiti Hungary India Israel Kenya Latin America Poland Russia Scotland Serbia and South Africa and other countries this book will be of interest to all scholars and students of disability studies sociology human rights law and social policy
