Molecular Function and Regulation of Non-coding RNAs in Multifactorial Diseases Mohammadreza Hajjari, Seyed Javad Mowla, Mohammad Ali Faghihi, 2016-12-14

Our understanding of the mechanisms underlying the development of multifactorial diseases such as diabetes autism Alzheimer's disease and cancer has been greatly advanced Non coding RNAs ncRNAs generally including microRNAs and long non coding RNAs have recently been found to have potential roles in these diseases and provide new opportunities for developing both specific biomarkers and therapeutic targets However the molecular function and regulation of these RNAs still remains challenging Numerous studies are focusing on this field in order to fully appreciate the role and regulation of these molecules in human medicine and biology This e book aims to bring together new findings on Non coding RNAs in different complex diseases It will highlight the characterization roles mechanism and mode of action of these RNAs in complex disorders We believe that the publications on this topic would be exponentially extended in future The improved approaches at multiple levels may pave the way for designing and applying new biomarker and therapeutic targets for specific diseases based on these attractive molecules
