Genera of British Plants Humphrey Gilbert-Carter, 1913      *Genera of British Plants* Humphrey Gilbert-Carter, 2018-05  
Excerpt from *Genera of British Plants Arranged According to Engler's Syllabus Der Pflanzenfamilien* Seventh Edition 1912  
With the Addition of the Characters of the Genera While specialists may criticise it in one detail or another and while it is certain that we are as yet far from finality owing to the numerous lacunae which still exist in our knowledge of different groups there can be little if any doubt that no other published system of classification rivals Professor Engler's in broad grasp of principle and masterly treatment of complicated detail It is the conspicuous merit of Professor Engler and his collaborators that they have kept constantly presented to botanists in the successive editions of the Syllabus the best scheme that could in their judgment be devised at the moment About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works      Genera of British Plants Arranged According to Engler's Syllabus Der Pflanzenfamilien (seventh Edition 1912) with the Addition of the Characters of the Genera Humphrey Gilbert-Carter, 1913      **Genera of British plants arranged according to Engler's Syllabus der pflanzenfamilien (seventh edition 1912) with the addition of the characters of the genera**, 1913      *Report of the Botanical Society and Exchange Club of the British Isles* Botanical Society and Exchange Club of the British Isles, 1915      *Journal of Botany, British and Foreign* Berthold Seemann, 1914      *The Annals of the Bolus Herbarium* Bolus Herbarium, 1914      The Anthocyanin Pigments of Plants Muriel Wheldale Onslow, 1916      **International Catalogue of Scientific Literature, 1901-1914**, 1916      **The Journal of Botany, British and Foreign**, 1917      Organizing the Green World: A Conceptual History of Botanical Classification Tod F. Stuessy, 2025-09-02 This book focuses on plant systematics and evolution with special interest on the history and philosophy of botanical classification Tracing the history of how humans have dealt with ordering the plant world is very much a glimpse of how human culture and science have progressed over the past 2000 years The objective in this book is to present ideas on plant classification beginning with classical Greek and Roman scholars through the Middle Ages into the Renaissance and finally to the modern 21st century Significant quantitative methods in classification have originated within the past 70 years which have never before been integrated with previous historical perspectives Most textbooks of systematic botany contain an historical introduction or perhaps a chapter on the history of classification but this book presents much greater detail on the classifications themselves and the cultural dimensions of the different time periods Biographical detail is also provided to give a better appreciation of the individual botanists who have

contributed new ideas in the search for maximally predictive systems     *The Journal of Ecology* ,1921     *Nature Study Lessons* J. B.
